SIMNET INTEGRATION (Single Sign On only)

STEP 1: Login to your Bb course and select Tools from the course links.

STEP 2: Select the McGraw-Hill Higher Education Tool
STEP 3: From the SimNet section, select Pair with a McGraw-Hill SimNet Course. *(NOTE: Contact your institution system administrator and/or McGraw-Hill Digital Learning Consultant if the SimNet pairing option does not appear within your Blackboard course.)*

STEP 4: Enter your McGraw-Hill *(Connect)* username and password. If you do not have a McGraw-Hill login, please contact your local sales rep.
**STEP 5:** Enter the school specific URL provided by SimNet when the school registered. If the school specific URL is unknown, click the link below the entry box to search for it. (Note: If you do not have your institution’s Simnet web address, contact your McGraw-Hill rep for additional help in locating the school-specific URL OR, refer to the SimNet registration email that was sent after your SimNet account was created.)

**STEP 6:** Enter your SimNet login information provided by SimNet when registering.

![SimNet Login Screen](image)
STEP 7: Select from the school listing of existing SimNet courses or choose to create a new course.

STEP 8: Complete! Select between Return to Bb or Go to SimNet section. Please be advised that the link to SimNet must be deployed into a content folder. From within any content folder in your Blackboard course, select Build Content > McGraw-Hill Content > SimNet to deploy the link.

A link to SimNet will now appear in the Content folder of your choice. Instructors and Students will have single sign on access to their SimNet course *(students will have to register on the first access)*.
