The appraisal system of the Company before disbursements is scientific and professional. Hence the risk of defaults is minimum. Although the risk of default by the counter party is inherent in the business of the Company, the diversified retail nature of the business in terms of geographical locations, products, customer segments results in a low average exposure per customer. Allotment Advice/Refund Order (if any) would be sent directly to the Applicant by the Registrars to the Issue. # **CREDIT MANAGEMENT**

Credit Management is a key function in any organization and more so and crucial for a financial services company. Dhandapani Finance Limited (DFL) has a strong credit appraisal process to ensure and maintain quality of the portfolio and consistent monitoring of the assessment procedures. The Credit Management consists of

- Selection of Borrowers
- · Sourcing of Business
- · Pre-Disbursement Formalities and
- · Post-Disbursement monitoring of the account

Selection Of Borrowers: This is paramount to ensure that the portfolio built up would reflect the

strength of quality individual borrowers. The assessment includes business in which the borrower operates, his financial status and standing in the market, track record of his past financial transactions, etc. Even though the emphasis will be on the asset that is financed and also marketability of the asset and its value assessment would be crucial by selecting the right borrower and his ability to service the borrowings within and without the assets financed.

**Sourcing Of Business:** DFL is well supported by the dealership fraternity in respect of various vehicle assets financed by them. DFL's forthright and ethical practices have always helped to source continuous referral of business from vehicle manufacturers / dealers. The wide network of branches achieved by DFL has enabled access to a large market spread over the South/West markets and also to have the right choice of business. DFL as a rule does not allow dealer recommendations or assessment of their borrowers. DFL avoids payment of brokerage on business referrals in Toto.

**Pre-Disbursement Formalities:** Once a proposal is sanctioned, the process of documentation begins. The documentation would be a water tight compartment. All the necessary documents such as offer letters, Hire Purchase/ Lease Agreements, Loan Agreements and any other documents pertaining to lending along with the DPN would be obtained. Care would be taken to ensure that the agreements/documents are adequately stamped and signed by the Hirer/Lessee/Guarantor respectively as the transaction demands in the presence of Company Officials.

In cases where collateral securities are taken DFL takes legal opinion, valuation report, up to date E.C., Tax paid receipts, Original Patta etc., and gets the clearances to ensure that the borrower has clear marketable title over the property and is also the correct owner to create equitable mortgage. Memorandum of Deposit of Title Deeds should be duly executed by the title holder and witnessed. Physical inspection of the collateral offered is done. In cases where buildings are offered as security, they must also be insured against all risks.

Payment would be released only on completion of all the formalities mentioned above and also on receipts of Service charges, Upfront instalments, Margin Money etc. To the maximum extent possible no compromise is encouraged in this area.

**Post Disbursement Monitoring:** Once the process is completed and payment are disbursed, the company ensures that the assets are delivered / taken delivery as mentioned in the predisbursement process and the company also confirm s that they are put to use. Periodical inspection of the assets will ensure that the assets are used effectively. It is also ensured that the vehicles are registered within the reasonable time frame and R.C. Books are obtained with the necessary endorsements in favor of the Company. It also ensures that the assets are insured adequately against all risks and special care taken when assets are insured by the borrowers. The company maintains an insurance register indicating all the details including date of expiry in order to enable them to protect against risks uninsured.

Post dated cheques are taken in as many cases as practicable taking into account the nature of hirer's business and access to banking.

# PRODUCTS

The company offers a set of innovative financial solutions through a range of products and services to meet the diverse needs of both Corporate and retail customers in the following segments:

- a) Rural and Semi Rural Cargo movement
- b) Rural and Semi Urban passenger transport needs
- c) Infrastructure development equipment for roads and ports

A sectoral cap of 30% of the annual business has been fixed on each of the above segments and through a network of 46 branches these services are rendered.

#### **Cargo And Transport**

Rural and Semi Rural Cargo movement is a vital segment constituting an important part of the broader small and medium enterprise market and remains a critical part of the

cargo transportation infrastructure in the Country. The most effective form of moving essential commodities is by the Hub and spoke arrangement. Not only does this system facilitate quick movement of goods into the redistribution channel, it also helps accessibility to the hinterland. This helps reduce downtime, and make it cost effective. Ferrying of fruits and vegetables from green houses (growing centres) to distribution points which was found unremunerative in the past (owing to use of larger vehicles operating at high costs) has now become a meaningful proposition with the advent of these 3 wheelers, whose overall operational efficiency remains unchallenged by the LCV's too. The cargo vehicles (3 wheelers) are often used to showcase products, (which was not possible in the past) or can otherwise be called a medium of advertisement. This segment has now constituted the main theme of strengthening of the Public Distribution System.

#### **Rural And Semi Urban Passenger Transport:**

As there are restrictions, on the movement of larger vehicles (trucks and buses), the onus is on logistics and to this effect the Company has carved for itself a segment where the use of light commercial vehicles and 3 wheelers form the backbone of the business. There is a huge

opportunity to buttress the public transport system for which these light commercial vehicles and small commercial vehicles are a boon. For the purchase of such commercial vehicles financial support is absolutely essential which is made available through tailor-made schemes.

#### **Two Wheelers**

An advent into the two wheeler segment particularly in the rural and semi urban divides have helped in increasing the market share of the Company in its existing geographical networks (at no extra cost) and allowed the company to be named a complete financial solutions provider. The company finances from 2 wheelers to infrastructure related equipments.

## **Infrastructure Development Projects**

The company has a huge potential to fund these equipments. These equipments have good resale value and are backed up by adequate collateral security in the form of immovable properties secured by deposit of title deeds.

### MARKETING

The company has an extensive network of 46 branches in India. The Company has also established itself in Maharashtra with four branches already in existence and plans are afoot to open a few more branches during the current year. The company continues its policy of opening branches in rural and semi-urban areas. This allows the company to spread its risk over a wider and diversified base.

### Marketing set-up

The Marketing set-up of the Company is networked through graded hierarchy starting with the field officers upwards upto the level of the General Managers. While the Branch Managers and the concerned field officers of the various branches interact regularly with both new and used vehicles dealers, there is also an ever increasing flow of clientele referred to the company by existing hirers. This process has ensured comprehensively the shackles which form the basis of Corporate tie-ups and its lacuna of poor hirers (marginally complimented by subvention) and allows the company a free and fair playing field at times bettering the peers in the industry. However, as a mark of caution the management at its level has retained the option to maintain a good working relationship at the grass root (dealer levels) who like the company form the foot soldiers of the manufacturer. Without saturating the existing markets, each branch creates a new branch in its immediate vicinity by dividing on its capabilities and potential that the new area has to offer and in turn the cycle is maintained together with the risk being well distributed.

# **FUTURE PROSPECTS**

DFL is at present having its major presence in South India. Post liberalisation and the Government's commitment to give a major boost to infrastructure sector has opened lot of opportunities for the Company to growth both in size and volumes in the years to come. Towards this end DFL is gearing itself to expand its base to other parts of India and is simultaneously augmenting its long-term working capital requirements.

l

DFL's longstanding experience and expertise in infrastructure equipment financing has helped the Company to build up a strong customer base. Recently, both Central and State Governments have announced their commitment to strengthen infrastructure activity and the work is likely to begin within a short span of time. There is a huge potential to tap natural resources for Infrastructure Development in the country.
