# 5.6 USING FILE INFO

DIRECTIONS: Back in chapter 1, we learned about writing photo cutlines. Often, the photo credit is designed as part of the cutline. Practice placing a caption using the Link File Info… command in Adobe InDesign. Start by typing a complete caption in the File Info fields of a photo in Adobe Photoshop. Place that photo on the page and select Link File Info… from the Links palette in Adobe InDesign. Copy and paste the caption on the page and apply whatever styles you've created for the caption and the photo credit, ensuring the appropriate amount of space between the photo and the credit line, the credit line and the cutline and the cutline and the text.

MATT STAMEY / THE HOUMA COURIER

A diver starts his dive to look for remaining pieces of a boat in Little Caillou in Chauvin, La., Aug. 14, 2007. The remnants of the boat are seen on the barge in the background. Workers scooped the rotten remains of aging shrimp boats from Bayou Little Caillou this month, nearing the end of a yearlong project to rid area waterways of the abandoned, sunken vessels that have cluttered them since hurricanes Katrina and Rita.

CREDIT LINE: Allow 3 points between photos and credit lines.

CUTLINE: Allow 3 points between credit lines and cutlines. Allow 3 points between photos and cutlines if there's no credit line.

TEXT: Allow 1 pica between cutlines and text.
