

6.7 RATE YOUR FAVORITE FILMS

DIRECTIONS: Tim Harrower says, "The juicier your facts, the more effective your list." For this exercise, you can have some fun creating a list of your top 10 favorite movies. Below is a simple example, but you can do more, researching who the leading actors were, how much money the movie grossed or just about anything that interests you. You can create a list with commentary, data. You can use bullets (to signify that you're not sure of the order) or numbers. You can even do it "Saturday Night Live" style and begin with your 10th favorite.
