

7.3 CREATE A DISPLAY HEAD

DIRECTIONS: You have a unique opportunity as a designer: an open page screaming for a display head. A professor at a local university is an expert on edible members of the order Agaricales, also known as mushrooms or fungi. Turns out that not only does he study mushrooms, he's also known around campus as the "class clown" for the antics he performs in his introductory botany classes to get students interested in the topic. Design a display head for the page.

BY JEFF BARNARD

Mycologist **Gregory Phillip** has been researching a honey fungus, the largest living organism ever found, for 20 years.

But Phillip's expertise doesn't stop there. He's also known around campus for being the "class clown" and for his knowledge of edible mushrooms.
