

# Contents

Preface xv

## CHAPTER 1

### Natural Disasters and the Human Population 1

- Natural Disasters in 2004 and 2005 2
- Pakistan Earthquake, 8 October 2005 2
- Hurricane Katrina, 29 August 2005 2
- Great Natural Disasters 3
- Human Fatalities in Natural Disasters 4
  - Human Responses to Disaster 4
- Economic Losses from Natural Disasters 7
  - Insured Portion of Economic Losses 7
- Natural Hazards 7
  - Popocatepetl Volcano, Mexico 9 • Magnitude, Frequency, and Return Period 10 • Role of Population Growth 10
- Overview of Human Population History 11
- The Power of an Exponent on Growth 11
- The Last 10,000 Years of Human History 12
- The Human Population Today 13
- Future World Population 13
- Side Note** Interest Paid on Money: An Example of Exponential Growth 13
  - The Demographic Divide 15 • Carrying Capacity 16
- Summary 19; Terms to Remember 20; Questions for Review 20; Questions for Further Thought 20*

## CHAPTER 2

### Energy Flows in Earth History and Natural Disasters 21

- Energy Sources of Disasters 22
- Earth: An Energetic Planet 22

Origin of the Sun and Planets 26

Impact Origin of the Moon 27

Earth History 27

The Layered Earth 28

**Side Note** Mother Earth 29

Behavior of Materials 30

**Side Note** Volcanoes and the Origin of the Ocean, Atmosphere, and Life 30

Isostasy 32

Internal Sources of Energy 33

Impact Energy and Gravitational Energy 33 •  
Radioactive Isotopes 33

**In Greater Depth** Radioactive Isotopes 35

Gravity 36

**In Greater Depth** Radioactivity Disasters 36

**In Greater Depth** Energy, Force, Work, Power, and Heat 37

External Sources of Energy 38

The Sun 38

**In Greater Depth** Water—The Most Peculiar Substance on Earth? 42

Processes of Construction Versus Destruction 44

Impacts with Asteroids and Comets 46

How We Understand the Earth 46

Uniformitarianism 47

*Summary 47; Terms to Remember 48; Questions for Review 48; Questions for Further Thought 48*

## CHAPTER 3

### Plate Tectonics and Earthquakes 49

Plate Tectonics 50

Development of the Plate Tectonics Concept 51

**In Greater Depth** Earth's Magnetic Field 53

- Magnetization of Volcanic Rocks 54
- Magnetization Patterns on the Seafloors 55
- Other Evidence of Plate Tectonics 55
  - Earthquake Epicenters Outline the Plates 55 • Deep Earthquakes 56 • Ages from the Ocean Basins 57 • Oceanic Mountain Ranges and Deep Trenches 57 • Systematic Increases in Seafloor Depth 57 • The Fit of the Continents 58
- The Grand Unifying Theory 59
- Plate Tectonics and Earthquakes 61
- Spreading Centers and Earthquakes 62
  - Iceland 63 • Red Sea and Gulf of Aden 63
- Convergent Zones and Earthquakes 65
  - Subduction Zones 65 • Continent-Continent Collisions 69
- Transform Faults and Earthquakes 71
- The Arabian Plate 71
  - Continent-Continent Collision Earthquakes 72 • Transform Fault Earthquakes 73

**Side Note** Historical Perspective 75

*Summary 75; Terms to Remember 76; Questions for Review 76; Questions for Further Thought 76*

## CHAPTER 4

### Earthquake Geology and Seismology 77

- The Lisbon Earthquake of 1755 78
- What Is an Earthquake? 79
- Faults and Geologic Mapping 80
- Types of Faults 82
  - Dip-Slip Faults 82 • Strike-Slip Faults 84 • Transform Faults 85
- Development of Seismology 86
  - Waves 88
- Seismic Waves 88
  - Body Waves 88 • Seismic Waves and the Earth's Interior 90 • Surface Waves 90 • Sound Waves and Seismic Waves 91
- Locating the Source of an Earthquake 91
- Magnitude of Earthquakes 92
  - Richter Scale 92 • Other Measures of Earthquake Size 93 • Foreshocks, Mainshock, and

Aftershocks 95 • Magnitude, Fault-Rupture Length, and Seismic-Wave Frequencies 95

- Ground Motion During Earthquakes 95
  - Acceleration 95 • Periods of Buildings and Responses of Foundations 97

Earthquake Intensity— What We Feel During an Earthquake 97

Mercalli Scale Variables 99

**In Greater Depth** What to Do Before and During an Earthquake 99

- A Case History of Mercalli Variables 100
  - The San Fernando Valley, California, Earthquake of 1971 100

Building in Earthquake Country 101

Shear Walls 102 • Braced Frames 103 • Retrofit Buildings 103 • Base Isolation 103 • Retrofit Bridges 105 • Houses 105

*Summary 106; Terms to Remember 107; Questions for Review 107; Questions for Further Thought 107*

## CHAPTER 5

### Tsunami 109

- Indian Ocean Tsunami, 26 December 2004 110
- Tsunami 111
- Tsunami Versus Wind-Caused Waves 112
  - Tsunami at the Shoreline 113
- Causes of Tsunami 116
- Earthquake-Caused Tsunami 117
  - Tsunami Warnings 117 • Alaska, 1 April 1946 117 • Chile, 22 May 1960 117 • Alaska, 27 March 1964 118 • British Columbia, Washington, and Oregon—Upcoming 119
- Volcano-Caused Tsunami 120
  - Krakatau, Indonesia, 26-27 August 1883 120
- Landslide-Caused Tsunami 121
  - Volcano Collapses 121 • Earthquake-Triggered Movements 122 • In Bays and Lakes 124
- Seiches 125
- Tsunami and You 126
  - If You Feel the Earthquake 126 • Tsunami Warnings 127
- Summary 128; Terms to Remember 129; Questions for Review 129; Questions for Further Thought 129*

## CHAPTER 6

### Some Earthquakes in Western North America 131

#### Subduction Zone Earthquakes 133

The Good Friday Earthquake, Alaska, 1964 133 • Mexico City, 1985 134 • Pacific Northwest, the Upcoming Earthquake 135

#### Spreading-Center Earthquakes 137

#### Transform Fault Earthquakes in California 138

San Francisco, 1906 138 • San Andreas Fault Earthquakes 139

#### In Greater Depth Neotectonics and Paleoseismology 142

World Series (Loma Prieta) Earthquake, 1989 144 • Bay Area Earthquakes—Past and Future 148 • Kobe, Japan, 1995 Versus Oakland, California, 20?? 150

#### How Faults Work 152

Old View 152 • Newer View 152 • Southern San Andreas Fault 154

#### Thrust Fault Earthquakes in Southern California 155

#### In Greater Depth Earthquake Prediction—Short Term 155

Northridge, California, 1994 156

#### The “Big One” 158

The Biggest One 158 • Annualized Earthquake Losses 158

*Summary 159; Terms to Remember 160; Questions for Review 160; Questions for Further Thought 160*

## CHAPTER 7

### More US and Canadian Earthquakes 161

#### Western North America: Plate Tectonic-Related Earthquakes 163

Pacific Northwest: Oregon, Washington, and British Columbia 163

#### In Greater Depth Human-Triggered Earthquakes 165

Western Great Basin: Eastern California, Western Nevada 166 • The Intermountain Seismic Belt 168 • Intermountain Belt: Utah, Idaho, Wyoming, Montana 168 • Rio Grande Rift: New Mexico, Colorado, Westernmost Texas, Mexico 170

#### Intraplate Earthquakes: “Stable” Central United States 171

New Madrid, Missouri, 1811–1812 171 • Reelfoot Rift: Missouri, Arkansas, Tennessee, Kentucky, Illinois 175 • Ancient Rifts in the Central United States 176

#### Intraplate Earthquakes: Eastern North America 177

New England Earthquakes 177 • St. Lawrence River Valley Earthquakes 179

#### Fracture-Zone Hypothesis of Major Earthquakes 179

Charleston, South Carolina, 1886 179

#### Earthquakes and Volcanism in Hawaii 180

*Summary 182; Terms to Remember 183; Questions for Review 183; Questions for Further Thought 183*

## CHAPTER 8

### Volcanic Eruptions: Plate Tectonics and Magmas 185

The Hazards of Studying Volcanoes 188 • How We Understand Volcanic Eruptions 188

#### Plate-Tectonic Setting of Volcanoes 188

#### Chemical and Mineral Composition of Magmas 190

#### Viscosity, Temperature, and Water Content of Magmas 192

Plate-Tectonic Setting of Volcanoes Revisited 193

#### How a Volcano Erupts 194

Eruption Styles and the Role of Water Content 194 • Some Volcanic Materials 196

#### Side Note How a Geyser Erupts 198

#### The Three Vs of Volcanology: Viscosity, Volatiles, Volume 199

Shield Volcanoes: Low Viscosity, Low Volatiles, Large Volume 199 • Flood Basalts: Low Viscosity, Low Volatiles, Very Large Volume 201

#### In Greater Depth Volcanic Explosivity Index (VEI) 201

Scoria Cones: Medium Viscosity, Medium Volatiles, Small Volume 202 • Stratovolcanoes: High Viscosity, High Volatiles, Large Volume 203 • Lava Domes: High Viscosity, Low Volatiles, Small Volume 205

#### Side Note British Airways Flight 9 205

Calderas: High Viscosity, High Volatiles, Very Large Volume 206

**In Greater Depth** Hot Spots 211

*Summary 214; Terms to Remember 215; Questions for Review 215; Questions for Further Thought 215*

## CHAPTER 9

### Volcano Case Histories: Killer Events 217

Volcanism at Spreading Centers 218  
Iceland 218

Volcanism at Subduction Zones 219  
Cascade Range, Pacific Coast of United States and Canada 220

Killer Events and Processes 229  
The Historic Record of Volcano Fatalities 229 •  
Pyroclastic Flows 229 • Tsunami 234  
Lahars 234 • Indirect—Famine 236

**Side Note** Death at Ashfall, Nebraska 237  
Gas 238 • Lava Flows 240

VEIs of Some Killer Eruptions 240  
Volcano Monitoring and Warning 240  
Signs of Impending Eruption 241 • Volcano  
Observatories 243

*Summary 244; Terms to Remember 244; Questions for Review 244; Questions for Further Thought 244*

## CHAPTER 10

### Mass Movements 245

The Role of Gravity 246  
Creep 247

External Causes of Slope Failures 248  
Water in Its External Roles 249

Internal Causes of Slope Failures 249  
Inherently Weak Materials 249 • Canadian Quick-  
Clay Slope Failures 250 • Water in Its Internal  
Roles 250

**In Greater Depth** Analysis of Slope  
Stability 251

Decreases in Cohesion 254 • Adverse Geologic  
Structures 254 • Triggers of Mass  
Movements 255

Classification of Mass Movements 255

Falls 256

Yosemite National Park, California 256

Slides 257

Rotational Slides 257 • Translational Slides 260

Flows 261

Portuguese Bend, California, Earthflow 262 •  
La Conchita, California Slump and Debris Flows,  
1995 and 2005 263 • Long-Runout Debris  
Flows 265

Snow Avalanches 269

Mitigation 270

Submarine Mass Movements 271

Subsidence 272

Slow Subsidence 272 • Catastrophic  
Subsidence 275

**Side Note** How to Create a Cave 275

*Summary 277; Terms to Remember 277; Questions for Review 277; Questions for Further Thought 278*

## CHAPTER 11

### Atmosphere, Oceans, and Long-Term Climate Change 279

The Mayan Civilization and Climate Change 280

Weather Versus Climate 280

Solar Radiation Received by Earth 280

Water and Heat 282

**Side Note** Temperature Scales 282

Vertical Movement of Air 283

Differential Heating of Land and Water 284

Layering of the Lower Atmosphere 284

General Circulation of the Atmosphere 285

Low Latitudes 285 • Middle and High  
Latitudes 286

**In Greater Depth** Coriolis Effect 290

Observed Circulation of the Atmosphere 291

General Circulation of the Oceans 292

Surface Circulation 292 • Deep-Ocean  
Circulation 292

Early Earth Climate—An Intense  
Greenhouse 292

Climate History of the Earth: Timescale in  
Millions of Years 296

Late Paleozoic Ice Age 297 • Late Paleocene  
Torrid Age 298 • Late Cenozoic Ice Age 299

**In Greater Depth** Oxygen Isotopes and Temperature 299

Glacial Advance and Retreat: Timescale in Thousands of Years 300

Climate Variations: Timescale in Hundreds of Years 303

Shorter-Term Climate Changes: Timescale in Multiple Years 305

El Niño 305 • La Niña 307 • Pacific Decadal Oscillation 308

Volcanism and Climate 308

Volcanic Climate Effects 310

*Summary 311; Terms to Remember 312; Questions for Review 312; Questions for Further Thought 312*

## CHAPTER 12

### Short-Term Climate Change and Severe Weather 313

The Last Thousand Years 314

The 20th and 21st Centuries 314

**Side Note** Stradivari Violins 315

The Greenhouse Effect Today 316

**In Greater Depth** When Did Humans Begin Adding to Greenhouse Warming? 316

The 21st Century 318

Severe Weather 319

Extreme Heat 320

Drought and Famine 320

US Dust Bowl, 1930s 321

Heat Wave 322

Heat Wave in Chicago, July 1995 322 • Europe's Heat Wave, 2003 322

Midlatitude Cyclones 323

The Eastern US "White Hurricane" of 1993 323

**In Greater Depth** Doppler Radar 325

Blizzards 326 • Ice Storms 326

How a Thunderstorm Works 327

Microbursts: An Airplane's Enemy 329

Thunderstorms in the Conterminous United States 330

Heavy Rains and Flash Floods 331 • Hail 332 • Lightning 333 • Winds 336

Tornadoes 338

Tri-State Tornado, 18 March 1925 338 • How a Tornado Works 329 • Tornadoes in the United States and Canada 340 • The Super Outbreak, 3–4 April 1974 344 • Tornadoes and Cities 345

*Summary 347; Terms to Remember 347; Questions for Review 347; Questions for Further Thought 348*

## CHAPTER 13

### Hurricanes and the Coastline 349

Hurricane Katrina 350

Were the Katrina-Caused Deaths and Destruction a Surprise? 351 • New Orleans: Can This Setting Be Protected? 351

Hurricanes 353

How a Hurricane Works 353

Hurricane Energy Release 354 • The Eye 354

Hurricane Origins 355

North Atlantic Ocean Hurricanes 356

Cape Verde-type Hurricanes 357 • Caribbean Sea- and Gulf of Mexico-type Hurricanes 360 • Forecasting the Hurricane Season 362 • Hurricane Damages 362

**In Greater Depth** The Role of Global Warming in Hurricane Frequency and Intensity 364

Hurricanes and the Gulf of Mexico Coastline 366

Galveston, Texas, September 1900 366

Hurricanes and the Atlantic Coastline 367

Hugo, September 1989 367

The Evacuation Dilemma 367

Reduction of Hurricane Damages 368

Building Codes 368 • Land-Use Planning 368 • Coastal Development Restrictions 368

Global Rise in Sea Level 369

Hurricanes and the Pacific Coastline 370

Iniki, September 1992 370

Cyclones and Bangladesh 371

Coastline 372

Waves in Water 373

Rogue Waves 373

Waves on the Coastline 374

Why a Wave Breaks 374 • Summer Versus Winter Beaches 375 • Wave Refraction 376 • Longshore Drift 376

**In Greater Depth** Deep-Water Wave Velocity, Length, Period, and Energy 376

Human Effects on the Coast 377

Dams 377 • Cliff Armoring 378 • Groins 378 • Breakwaters 379 • Jetties 379

**Side Note** You Can Never Do Just One Thing 380

*Summary 380; Terms to Remember 381; Questions for Review 381; Questions for Further Thought 381*

## CHAPTER 14

### Floods 383

How Rivers and Streams Work 385

Longitudinal Cross Section of a Stream 385

**Side Note** A Different Kind of Killer Flood 385

The Equilibrium Stream 386

The Floodplain 388

Flood Frequency 388

**Side Note** Feedback Mechanisms 389

**In Greater Depth** Constructing Flood-Frequency Curves 390

Flood Styles 391

Flash Floods 391

Antelope Canyon, Arizona, 1997 391 • Big Thompson Canyon, Colorado, 1976 392 • Rapid Creek, Black Hills, South Dakota, 1972 393

Regional Floods 395

Red River of the North 395 • Mississippi River System 397 • China 400

Societal Responses to Flood Hazards 401

Dams 401 • Levees 402 • Sandbagging 402 • Forecasting 402 • Zoning and Land Use 402 • Insurance 403 • Presidential Disaster Declarations 403

Urbanization and Floods 403

Hydrographs 403 • Flood Frequencies 403 • Channelization 403

The Biggest Floods 408

Ancient Tales of Deluge 408 • Ice-Dam Failure Floods 409

*Summary 411; Terms to Remember 411; Questions for Review 411; Questions for Further Thought 412*

## CHAPTER 15

### Fire 413

What Is Fire? 415

The Need for Fire 416

The Fire Triangle 416

**Side Note** The Burning of Rome, 64 CE 416

**Side Note** An Ancient View of Fire 417

The Stages of Fire 418

The Spread of Fire 419

Fuel 419 • Wind 419 • Topography 419 • Fire Behavior 419

The Fuels of Fire 421

Grasses 421 • Shrubs 421 • Forests 423

Fire Weather 423

Winds of Fire 423

Cold-front Winds 423 • Foehn Winds 423 • Local Winds 424 • Great Lakes Region 425 • California 426

Home Design and Fire 429

How Well Have Californians Learned? 430

**Side Note** The Winds of Madness 432

Fire Suppression 433

Yellowstone National Park 434 • California Versus Baja California: Pay Now or Pay Later 434 • The Western and Southern United States in 2000 437 • Prescribed Fires 438 • Australia 438

The Similarities of Fire and Flood 439

*Summary 439; Terms to Remember 440; Questions for Review 440; Questions for Further Thought 440*

## CHAPTER 16

### The Great Dyings 441

Fossils 442

Early Understanding of Extinctions and Geologic Time 443

Brief History of Life 445

Species and the Fossil Record 447

The Tropical Reef Example 448

Mass Extinctions During Phanerozoic Time 448

Possible Causes of Mass Extinctions 450

Plate-Tectonic Causes 450 • Volcanic Causes 453 • Climate Change Causes 453 • Ocean Composition Causes 453 • Extraterrestrial Causes 453 •

Biologic Causes 454 • Multiple Causes of Mass Extinction 455

Examples of Mass Extinctions 455

Closing of Permian Time (Ended 253 Million Years Ago) 456 • Close of Cretaceous Time (Ended 65 Million Years Ago) 457

Living Fossils 460

Quaternary Extinctions 461

**In Greater Depth** La Brea Tar Pits, Metropolitan Los Angeles 463

**Side Note** The Rewilding of North America 465

*Summary 465; Terms to Remember 466; Questions for Review 466; Questions for Further Thought 466*

## CHAPTER 17

### Impacts with Space Objects 467

Impact Scars 468

Sources of Extraterrestrial Debris 469

Asteroids 469 • Comets 471

Rates of Meteoroid Influx 474

Cosmic Dust 474 • Shooting Stars 474

**In Greater Depth** Shoemaker-Levy 9 Comet Impacts on Jupiter 475

Meteorites 476

The Crater-Forming Process 476

Crater-Forming Impacts 478

Meteor Crater, Arizona 478

Impact Origin of Chesapeake Bay 481

The Cretaceous/Tertiary Boundary Event 481

Evidence of the K/T Impact 482 • Site of the K/T Impact 483 • Angle of Impact 483

Problems for Life from Impacts 484

Biggest Event of the 20th Century 485

Tunguska, Siberia, 1908 485

Biggest “Near Events” of the 20th Century 485

Frequency of Large Impacts 486

A Defense Plan 487

*Summary 489; Terms to Remember 489; Questions for Review 489; Questions for Further Thought 490*

Glossary 491

Credits 500

Index 501
