## Further Readings for Ch. 40

- Ashley, S. March 2001. Scratching an old theory. *Scientific American* 284(3):23. Certain spinal cord neurons connected to the thalamus are responsible for feeling an itch.
- Bennet-Clark, H. May 1998. How cicadas make their noise. *Scientific American* 278(5):58. Article examines how the Australian cicada, an insect only 2.3 inches long, can make as much noise as an alarm system.
- LeVay, S. March 2000. Brain invaders. *Scientific American* 282(3):27. A new auditory prosthesis implanted directly into the brain stem may restore hearing.
- Mader, S. S. 2001. *Human biology*. 7th ed. Dubuque, Iowa: WCB/McGraw-Hill, Inc. A student-friendly text that covers the principles of biology with emphasis on human anatomy and physiology.
- Mader, S. S. 2000. *Understanding anatomy and physiology*. 4th ed. Dubuque, Iowa: Wm. C. Brown Publishers. A text that emphasizes the basics for beginning allied health students.
- Schiffman, H. 2001. *Sensation and perception: An integrated approach*. 5th ed. New York: John Wiley and Sons Publishing. This student-friendly text examines how the senses transform, integrate, and process stimulations that enable perception of the environment.
- Smith, D. V. and Margolskee, R. F. March 2001. Making sense of taste. *Scientific American* 284(3):32. Article explores how taste cells on the tongue register sensations, and how the brain interprets these sensations as various tastes.
