Energy Flows 1

Processes of Construction Versus
Destruction 5

Terms to Remember 6

CHAPTER 1

Natural Disasters and the Human Population 7

Natural Disasters in 2008 9

Great Natural Disasters 9

Human Fatalities in Natural Disasters 10

The Role of Government in Natural-Disaster Death
Totals 10 • Human Responses to Disaster 10

Economic Losses from Natural Disasters 12

Insured Portion of Economic Losses 12

Natural Hazards 12

Popocatepetl Volcano, Mexico 12 • Magnitude,
Frequency, and Return Period 14 • Role
of Population Growth 15

Overview of Human Population History 15

The Power of Exponential Growth 15

• The Last 10,000 Years of Human History 16

Side Note: Interest Paid on Money:

An Example of Exponential Growth 17

The Human Population Today 18

Future World Population 19

The Demographic Divide 20 • Urbanization
and Earthquake Fatalities 21 • Carrying
Capacity 21 • Easter Island (Rapa Nui) 22

Summary 23; *Terms to Remember* 24; *Questions
for Review* 24; *Questions for Further Thought* 24

CHAPTER 2

Internal Energy and Plate Tectonics 25

Origin of the Sun and Planets 26

Impact Origin of the Moon 27

Earth History 27

The Layered Earth 28

Side Note: Mother Earth 29

Side Note: Volcanoes and the Origin
of the Ocean, Atmosphere, and Life 30

Behavior of Materials 30

Isostasy 31

Internal Sources of Energy 32

Impact Energy and Gravitational Energy 32

• Radioactive Isotopes 32 • Age of Earth 34

In Greater Depth: Radioactive Isotopes 34

In Greater Depth: Radioactivity
Disasters 35

Plate Tectonics 35

Development of the Plate Tectonics Concept 36

In Greater Depth: Earth's Magnetic Field 38

Magnetization of Volcanic Rocks 39

Magnetization Patterns on the Seafloors 40

Other Evidence of Plate Tectonics 41

Earthquake Epicenters on the Plates 41

• Deep Earthquakes 42 • Ages from the

Ocean Basins 42 • Oceanic Mountain

Ranges and Deep Trenches 43 • Systematic

Increases in Seafloor Depth 43 • The Fit
of the Continents 43

The Grand Unifying Theory 45

How We Understand the Earth 47

Uniformitarianism 47

Summary 47; *Terms to Remember* 48; *Questions
for Review* 48; *Questions for Further Thought* 48

CHAPTER 3

Earthquake Geology and Seismology 49

- A Classic Disaster:** The Lisbon Earthquake of 1755 50
- What Is an Earthquake? 51
- Faults and Geologic Mapping 51
- Types of Faults 53
 - Dip-Slip Faults 53 • Strike-Slip Faults 54
 - Transform Faults 56
- Development of Seismology 58
 - Waves 58
- Seismic Waves 59
 - Body Waves 59 • Seismic Waves and the Earth's Interior 59 • Surface Waves 60 • Sound Waves and Seismic Waves 60
- Locating the Source of an Earthquake 62
- Magnitude of Earthquakes 63
 - Richter Scale 63 • Other Measures of Earthquake Size 64 • Foreshocks, Mainshock, and Aftershocks 65 • Magnitude, Fault-Rupture Length, and Seismic-Wave Frequencies 66
- Ground Motion During Earthquakes 66
 - Acceleration 66 • Periods of Buildings and Responses of Foundations 67
- Earthquake Intensity—What We Feel During an Earthquake 67
 - Mercalli Scale Variables 69
- In Greater Depth:** What to Do Before and During an Earthquake 69
- Case History of Mercalli Variables 70
 - The San Fernando Valley, California, Earthquake of 1971 70
- Building in Earthquake Country 71
 - Shear Walls 72 • Braced Frames 72 • Retrofit Buildings 73 • Base Isolation 73 • Retrofit Bridges 73 • House Construction and Retrofit 75
- Summary 76; Terms to Remember 77; Questions for Review 77; Questions for Further Thought 77*

CHAPTER 4

Plate Tectonics and Earthquakes 78

- Tectonic-Plate Edge and Earthquakes 79
- Spreading-Center Earthquakes 80
 - Iceland 80 • Red Sea and Gulf of Aden 81
 - Gulf of California 82

- Convergent Zone and Earthquakes 84
- Subduction-Zone Earthquakes 84

A Classic Disaster: The Tokyo Earthquake of 1923 86

- Indonesia, 2004 to 2009, and Ongoing 86
- Mexico City, 1985 86 • The Good Friday Earthquake, Alaska, 1964 87 • Pacific Northwest, the Upcoming Earthquake 89
- Continent-Continent Collision Earthquakes 90
 - China, Pakistan, and India, 2008, 2005, and 2001 92 • Shaanxi Province, China, 1556 92
 - Tangshan, China, 1976 92
- The Arabian Plate 93
 - Continent-Continent Collision Earthquakes 93
 - Transform-Fault Earthquakes 93
- Transform-Fault Earthquakes 94
 - Turkey, 1999 94

Side Note: Historical Perspective 95

- San Andreas Fault Tectonics 95 • San Andreas Fault Earthquakes 96 • Bay Area Earthquakes—Past and Future 103

A Classic Disaster: San Francisco, 1906 104

- Kobe, Japan, 1995, Versus Oakland, California, 20?? 105

Summary 107; Terms to Remember 108; Questions for Review 108; Questions for Further Thought 109

CHAPTER 5

Earthquake Lessons and Regional Settings 110

- How Faults Work 111
 - Old View 111 • Newer View 111
- Thrust-Fault Earthquakes 113
 - Northridge, California, 1994 113 • Seattle, Washington 114
- Normal-Fault Earthquakes 115
 - Puget Sound, Washington, 1949, 1965, 2001 115
- Neotectonics and Paleoseismology 115
- Earthquake Prediction 117
 - Long-Term Forecasts 117 • Short-Term Forecasts 118
- Human-Triggered Earthquakes 119
 - Ohio Rocks 119 • Dam Earthquakes 119
 - Bomb Blasts 120

Earthquake-Shaking Maps 120
 Did You Feel It? 120 • ShakeMaps 120

California Earthquake Scenario 121
 Annualized Earthquake Losses 122
 • Great California Shakeout 122

United States and Canada Earthquakes 122

Western North America: Plate Boundary–
 Zone Earthquakes 123
 Western Great Basin: Eastern California, Western
 Nevada 124 • The Intermountain Seismic Belt 127
 • Intermountain Belt: Utah, Idaho, Wyoming,
 Montana 128 • Rio Grande Rift: New Mexico,
 Colorado, Westernmost Texas, Mexico 129

Intraplate Earthquakes: “Stable” Central
 United States 130
 New Madrid, Missouri, 1811–1812 131 • Reelfoot
 Rift: Missouri, Arkansas, Tennessee, Kentucky,
 Illinois 133 • Ancient Rifts in the Central United
 States 134

Intraplate Earthquakes: Eastern
 North America 135
 New England 135 • St. Lawrence River
 Valley 136 • Charleston, South Carolina, 1886 136

Earthquakes and Volcanism in Hawaii 138
 Earthquake in 1975 138 • Earthquakes
 in 2006 139
*Summary 139; Terms to Remember 140; Questions
 for Review 140; Questions for Further Thought 140*

CHAPTER 6

Volcanic Eruptions: Plate Tectonics and Magmas 141

How We Understand Volcanic Eruptions 142
 Plate-Tectonic Setting of Volcanoes 142

A Classic Disaster: Eruption of Mount
 Vesuvius, 79 CE 144

Chemical Composition of Magmas 146
 Viscosity, Temperature, and Water Content
 of Magmas 146

In Greater Depth: Minerals and Volcanic
 Rocks 147
 Plate-Tectonic Setting of Volcanoes Revisited 149

How a Volcano Erupts 150
 Eruption Styles and the Role of Water
 Content 151 • Some Volcanic Materials 152

Side Note: How a Geyser Erupts 154

The Three Vs of Volcanology: Viscosity,
 Volatiles, Volume 155
 Shield Volcanoes: Low Viscosity, Low Volatiles,
 Large Volume 155

In Greater Depth: Volcanic Explosivity
 Index (VEI) 157

Flood Basalts: Low Viscosity, Low Volatiles,
 Very Large Volume 157 • Scoria Cones:
 Medium Viscosity, Medium Volatiles, Small
 Volume 158 • Stratovolcanoes: High Viscosity,
 High Volatiles, Large Volume 158 • Lava
 Domes: High Viscosity, Low Volatiles, Small
 Volume 160

Side Note: British Airways Flight 9 161

Calderas: High Viscosity, High Volatiles, Very
 Large Volume 162

In Greater Depth: Hot Spots 167

*Summary 170; Terms to Remember 170;
 Questions for Review 171; Questions for
 Further Thought 171*

CHAPTER 7

Volcano Case Histories: Killer Events 172

Volcanism as a Spreading Center 173
 Iceland 173

Volcanism as a Subduction Zone 175
 Cascade Range, Pacific Coast of United States
 and Canada 175

Killer Eruptions and Processes 184
 The Historic Record of Volcano Fatalities 184
 • Pyroclastic Flows 184 • Tsunami 188
 • Mount Unzen, Japan, 1792–188 • Lahars 189
 • Indirect—Famine 191

Side Note: Death at Ashfall,
 Nebraska 192

Gas 193 • Lava Flows 194

VEIs of Some Killer Eruptions 194

Volcano Monitoring and Warning 195
 Long Valley, California, 1982–195 • Mount
 Pinatubo, Philippines, 1991–197 • Signs
 of Impending Eruption 197 • Volcano
 Observatories 198

*Summary 199; Terms to Remember 199;
 Questions for Review 199; Questions for
 Further Thought 199*

CHAPTER 8

Tsunami Versus Wind-Caused Waves 200

Indian Ocean Tsunami, 26 December 2004 201

Waves in Water 202

Wind-Caused Waves 202

Why a Wind-Blown Wave Breaks 203

• Rogue Waves 203

In Greater Depth: Deep-Water

Wave Velocity, Length, Period,
and Energy 204

Tsunami 205

Tsunami Versus Wind-Caused Waves 206

Tsunami at the Shoreline 208

A Classic Disaster: The Chile Tsunami
of 1868 209

Causes of Tsunami 210

Earthquake-Caused Tsunami 211

Alaska, 1 April 1946 211 • Chile, 22 May

1960 211 • Alaska, 27 March 1964 212

• British Columbia, Washington, and

Oregon—Upcoming 212 • Puerto Rico,

11 October 1918 213

Volcano-Caused Tsunami 213

Krakatau, Indonesia, 26–27 August 1883 213

Landslide-Caused Tsunami 214

Volcano Collapses 214 • Earthquake-Triggered

Movements 216 • In Bays and Lakes 217

Seiches 218

Hebgen Lake, Montana, 17 August 1959 219

Tsunami and You 219

If You Felt the Earthquake 219 • Tsunami

Warnings 221

Summary 221; Terms to Remember 222;

Questions for Review 222; Questions for

Further Thought 222

CHAPTER 9

External Energy Fuels Weather and Climate 223

External Sources of Energy 224

The Sun 224

Solar Radiation Received by Earth 225

Outgoing Terrestrial Radiation 226

Greenhouse Effect 226 • Albedo 226

The Hydrologic Cycle 227

Water and Heat 228

In Greater Depth: Water—The Most
Peculiar Substance on Earth? 229

Convection 229 • Water Vapor and Humidity 229

• Latent Heat 230 • Adiabatic Processes 230

• Lapse Rates 230 • Differential Heating
of Land and Water 231

Energy Transfer in the Atmosphere 231

Energy Transfer in the World Ocean 232

Layering of the Lower Atmosphere 232

Temperature 232 • Pressure 233

Atmospheric Pressure and Winds 234

Why Winds Blow 234 • Coriolis Effect 234

• Rotating Air Bodies 235

General Circulation of the Atmosphere 236

Low Latitudes 237 • High Latitudes 237

• Middle Latitudes 238 • Observed Circulation
of the Atmosphere 240

General Circulation of the Oceans 242

Surface Circulation 242 • Deep-Ocean

Circulation 243

*Summary 243; Terms to Remember 244; Questions
for Review 244; Questions for Further Thought 245*

CHAPTER 10

Tornadoes, Lightning, Heat, and Cold 246

Severe Weather 247

Winter Storms 248

Cold 248 • Precipitation 248 • Nor'easters 248

In Greater Depth: Doppler Radar 250

Blizzards 250 • Ice Storms 251 • Lake-Effect

Snow 251

How Thunderstorms Work 251

Air-Mass Thunderstorms 252

Severe Thunderstorms 254

In Greater Depth: Downbursts:

An Airplane's Enemy 255

Supercells 256 • Lifting a Fair 256

• Thunderstorms in North America 257 • Heavy

Rain and Flash Floods 257 • Hail 258

• Derechos 259

Tornadoes 260

Tornadoes in 2008 260

How Tornadoes Form 260
Regional Scale 260 • Supercell Thunderstorm
Scale 261 • Vortex Scale 262 • Final Stage
of a Tornado 262 • Tornadoes in the United States
and Canada 263

A Classic Disaster: The Tri-State Tornado
of 1925 267

Tornado Outbreaks 267
Tornado Outbreak of February 2008 267 • The
Super Outbreak, 3–4 April 1974 267 • Tornadoes
and Cities 268

Tornado Safety 268
Safe Rooms 268

In Greater Depth: Waterspouts
and Dust Devils 269

Lightning 269
How Lightning Works 271 • Don't Get
Struck 273

Heat 274
Heat Wave in Chicago, July 1995 274 • City
Weather 275 • Europe's Heat Wave, 2003 275

*Summary 276; Terms to Remember 276; Questions
for Review 277; Questions for Further Thought 277*

CHAPTER 11

Hurricanes 278

Hurricanes 280
How a Hurricane Forms 280
How a Hurricane Works 281
Eyewall and Eye 282 • Tornadoes Within
Hurricanes 283 • Energy Flow in a Hurricane 283
• Hurricane Energy Release 283

Hurricane Origins 284
North Atlantic Ocean Hurricanes 285
Cape Verde–type Hurricanes 285 • Caribbean
Sea and Gulf of Mexico–type Hurricanes 289

Hurricane Forecasts 290
How Hurricanes Get Their Names 291
• Hurricane Trends in the Atlantic Basin 292

Hurricane Damages 294
Storm-Surge Hazards 294 • Heavy Rains
and Inland Flooding 297

Hurricanes and the Gulf of Mexico
Coastline 297
Hurricane Katrina 297

A Classic Disaster: The Galveston Hurricane
of 1900 298

Hurricanes in the Atlantic Coastline 301
Hugo, September 1989 301
The Evacuation Dilemma 301
Reduction of Hurricane Damages 302
Building Codes 302 • Land-Use Planning 302
• Coastal Development Restrictions 303
Global Rise in Sea Level 303
Hurricanes in the Pacific Coastline 303
Iniki, September 1992 304
Cyclones in Bangladesh 304
*Summary 306; Terms to Remember 306; Questions
for Review 306; Questions for Further Thought 307*

CHAPTER 12

Climate Change 308

Early Earth Climate—An Intense
Greenhouse 309
Climate History of the Earth: Timescale
in Millions of Years 310

In Greater Depth: Equilibrium Between
Tectonics, Rock Weathering, and Climate 311

Late Paleozoic Ice Age 311 • Late Paleocene
Terrestrial Ice 312 • Late Cenozoic Ice Age 314

In Greater Depth: Oxygen Isotopes
and Temperature 314

Glacial Advance and Retreat: Timescale
in Thousands of Years 315
The Last Glacial Maximum 316

Climate Variations: Timescale in Hundreds
of Years 318

Shorter-Term Climate Changes: Timescale
in Multiple Years 319
El Niño 319 • La Niña 321 • Pacific Decadal
Oscillation 322 • Volcanism and Climate 323
• Volcanic Climate Effects 325

In Greater Depth: The Mayan Civilization
and Climate Change 325

The Last Thousand Years 326
The 20th Century 327

Side Note: Stradivari Violins 328

Solar Energy Variation 328
Greenhouse Gases and Aerosols 328
Water Vapor 328 • Carbon Dioxide (CO₂) 328

In Greater Depth: When Did Humans Begin
Adding to Greenhouse Warming? 329

Methane(C H₄) 330 • NitrousO xide(N₂O) 330
• Ozone(O₃) 331 • Chlorofluorocarbons
(CFCs) 331 • 20th-Century Greenhouse Gas
Increases 331 • Aerosols 331
The21 stC entury 331
Warmest Years 331 • Global Climate Models 332
• Droughta ndF amine 334 • IceM elting 335

In Greater Depth: Tipping Points 336

In Greater Depth: Lag Times 337

Sea-LevelR ise 337 • OceanC irculation 337
• Signs of Change 337

MitigationO ptions 337

ControllingC O₂C ontentof A tmosphere 337

CHAPTER 15

Mass Movements 400

Gravity 401

In Greater Depth: Energy, Force, Work,
Power, and Heat 402

The Role of Gravity in Mass Movements 403

Creep 404

ExternalC ausesof S lopeF ailures 405

WaterinIts Exte rnalR oles 406

InternalC ausesof S lopeF ailures 406

InherentlyW eakM aterials 406 • Water
in Its InternalR oles 407

In Greater Depth: Analysis of Slope Stability 408

Decreases in Cohesion 409

A Classic Disaster: Vaiont Dam, Italy, 1963 410

Adverse Geological Structures 410 • Triggers of Mass Movements 411

Classification of Mass Movements 412

Falls 413

Yosemite National Park, California 413

Slides 414

Rotational Slides 414 • Translational Slides 415

Flows 418

Portuguese Bend, California, Earthflow 419

• La Conchita, California, Slump and Debris Flows, 1995 and 2005 420 • Long-Runout Debris Flows 421

Snow Avalanches 424

Submarine Mass Movements 426

Mitigation Efforts 426

Subsidence 427

Catastrophic Subsidence 427

• Slow Subsidence 428

In Greater Depth: How to Create a Cave 428

Sea-Cliff Collapse and Coastal Erosion 431

Beach Sand Supply 431 • Summer Versus Winter Beaches 432 • Seawalls 433 • Cliff Armoring 434 • Wave Refraction 434

• Longshore Drift 435 • Groins 436

• Breakwaters 436 • Jetties 436

Side Note: You Can Never Do Just One Thing 437

Summary 437; Terms to Remember 438; Questions for Review 438; Questions for Further Thought 439

CHAPTER 16

Impacts with Space Objects 440

Energy and Impacts 441

Impact Scars 442

Sources of Extraterrestrial Debris 442

Asteroids 443

Side Note: Dwarf Planets 444

Comets 446

Rates of Meteoroid Influx 447

Cosmic Dust 448 • Shooting Stars 448

• Meteorites 448

In Greater Depth: Shoemaker-Levy 9 Comet Impacts on Jupiter 449

The Crater-Forming Process 450

Crater-Forming Impacts 452

Meteor Crater, Arizona 452

Impact Origin of Chesapeake Bay 455

The Cretaceous/Tertiary Boundary Event 455

Evidence of the K/T Impact 456 • Site of the K/T

Impact 457 • Angkor Wat Impact 457

Problems for Life from Impacts 458

Biggest Event of the 20th Century 459

Tunguska, Siberia, 1908 459

Biggest “Near Events” of the 20th and 21st Centuries 459

Frequency of Large Impacts 460

Lifetime Risk of Impact 461 • Prevention of Impacts 462

Summary 463; Terms to Remember 463; Questions for Review 463; Questions for Further Thought 463

EPILOGUE
