

What's New in the Sixth Edition?

- **Powerful digital tools: Connect® French** is McGraw-Hill's digital platform, which houses the eBook, the Workbook / Laboratory Manual activities, integrated audio and video, peer-editing writing tools, and voice tools, all of which vastly improve the quality of students' out-of-class work.
- **McGraw-Hill LearnSmart®** is the only super-adaptive learning tool on the market that is proven to significantly improve students' learning and course outcomes. As students work on each chapter's grammar and vocabulary modules, **LearnSmart** identifies the areas that students are struggling with most and provides them with the practice they need to master them. **LearnSmart** gives each student a unique learning experience tailored just for them. The **LearnSmart** mobile app allows students to study anytime and anywhere!
- **Contemporary language:** The **64 mini-dialogues** that introduce the grammar points in context have been completely rewritten and now feature the blog characters from the video and **Le blog de...** readings. The line art has been replaced by beautiful photos and the dialogues are presented in appealing, student-friendly formats: text messages, Blackboard IM video messages, and Facebook instant messages, in addition to face-to-face conversations. As in prior editions, the activity following each dialogue prompts students to use the structure in context before they delve into the explanation.
- **More pronunciation practice:** In response to reviewer feedback, the sixth edition offers a more robust treatment of pronunciation. These contextualized activities, which focus on the recognition and production of key sounds in French, build on the **Prononcez bien!** explanations that appear in the margins of each chapter. Both the explanations and the activities have been recorded and may be accessed and assigned in **Connect**.
- **Updated culture:** The **Reportage** readings between **Leçons 2** and **3** have been updated in **Chapitres 6, 9, 10, and 11** to reflect the interests of today's students. The **Lecture** section of **Leçon 4** has also been revised. Among the five completely new readings in **Chapitres 1, 3, 9, 11, and 13** are two literary texts, an article on Vélib' and Autolib', and a text with practical information on shopping in France.
