RUBRIC

Oral Presentation

	Rating
The student makes an excellent presentation. He or she has masterful control of the science content and uses superb oral presentation skills. Strategies, such as visual aids, props, and/or humor, are especially effective. The audience is completely involved and has time to think about what is being said.	
The student clearly knows the subject. Science concepts are used correctly. Visual aids, which are interesting and clear, can be seen by everyone in the audience. The speaker is enthusiastic, can be easily heard by everyone, and uses eye contact and other body language to increase the effectiveness of the presentation. The audience is involved and has time to think about what is being said.	
The student does not have a strong command of the topic. Science concepts are not used well, and supporting details are lacking. Visual aids are poor or lacking. The talk is more like a reading than an oral presentation. Characteristics like volume, enthusiasm, and body language do not work for the student. The audience is not involved in the presentation.	
The work is very poorly done or has not been completed.
