Video Editing Project

Directions: Create a finished video presentation by editing two or more video clips together with narration, background music, and animated text. You may use the space below to plan your video presentation.

Your final video presentation should be one and a half to two minutes in length and must include:

- ◆ A title (from a title program with a solid background). The title text should be animated.
- ◆ Two or three clips placed consecutively with transitions between each.
- ◆ Narration during the clips to describe the action.
- ◆ Background music appropriate to the theme of the video. The music should not cover up the narration.
- ◆ Some text with a solid background that can be superimposed over video. This can be accomplished by setting the background of the text as a solid color and then using chroma key to make the background transparent.
- ◆ A music fade-out and scrolling credits and the end of the video. If the clips are not original, be sure to cite the sources or obtain permission, as needed.
