

Internet Media Catalogs

Directions: Create a catalog of media resources available on the Internet that you may use for upcoming projects. With your teacher's supervision, locate Internet sites that can supply the following types of media: animation, video, clip art, photographs, music, and other sound files. Locate four sites for each type of media. Complete the following charts, listing the site, the person or company that created or owns the media, the type of media, a short description of the media, and suggestions for its use in production development.

Internet Media List—Animation File Catalog

	Site Address	Creator/Owner	Media Type	Description	Suggested Use
1			Animation		
2			Animation		
3			Animation		
4			Animation
