

## Reading Tip

Make connections with memorable events, places, or people in your life. The better the connection, the more likely you will remember.

### Target Your Reading

Use this to focus on the main ideas as you read the chapter.

- 1 Before you read** the chapter, respond to the statements below on your worksheet or on a numbered sheet of paper.
  - Write an **A** if you **agree** with the statement.
  - Write a **D** if you **disagree** with the statement.
- 2 After you read** the chapter, look back to this page to see if you've changed your mind about any of the statements.
  - If any of your answers changed, explain why.
  - Change any false statements into true statements.
  - Use your revised statements as a study guide.

Before You Read A or D	Statement	After You Read A or D
	<b>1</b> Water often causes sheet erosion when it flows in thin, broad sheets.	
	<b>2</b> Streams are classified as young, mature, or old.	
	<b>3</b> The stages of development of a stream depend only on the actual age of the stream.	
	<b>4</b> The largest drainage basin in the United States is the Grand Canyon.	
	<b>5</b> Water that soaks into the ground and collects in tiny pores in underlying rock is called groundwater.	
	<b>6</b> The water table below Earth's surface always remains at the same depth.	
	<b>7</b> The three major forces at work on a shoreline are waves, currents, and tides.	
	<b>8</b> A longshore current runs perpendicular to the shoreline.	
	<b>9</b> All sand is made of the mineral quartz.
