## Lesson 8-3

## Example 1 Display Data in a Stem-and-Leaf Plot

AGE The ages of the teachers at Valley View Middle School are shown in the table below. Make a stem-and-leaf plot of the data.

| Age |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| 48 | 52 | 33 | 28 | 61 |
| 38 | 32 | 34 | 43 | 46 |
| 55 | 58 | 27 | 44 | 52 |
| 31 | 40 | 55 | 36 | 60 |

Step 1 The digits in the least place value will form the leaves and the remaining digits will form the stems. In this data, 27 is the least value, and 61 is the greatest. So, the ones digits will form the leaves and the tens digits will form the stems.

Step 2 List the stems 2 to 6 in order from least to greatest in the Stem column. Write the leaves, the ones digits of the ages, to the right of the corresponding stems.

Step 3 Order the leaves and write a key that explains how to read the stems and leaves.

| Stem | Leaf |  |  |  |  |  |  |  |
| ---: | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 2 | 7 | 8 |  |  |  |  |  |  |
| 3 | 1 | 2 | 3 | 4 | 6 | 8 |  |  |
| 4 | 0 | 3 | 4 | 6 | 8 |  |  |  |
| 5 | 2 | 2 | 5 | 5 | 8 |  |  |  |
| 6 | 0 | 1 |  |  |  |  | $3 \mid 1=31$ | $y r$ |

## Example 2 Describe Data

SCHOOL ATTENDANCE The stem-and-leaf plot shows the number of days of school missed each year for a group of students. Find the range, median, and mode of the data.

| Stem | Leaf |  |  |  |  |  |
| ---: | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 0 | 3 | 4 | 5 | 5 | 8 |  |
| 1 | 0 | 0 | 2 | 4 | 4 | 4 |
| 2 | 1 | 1 | 3 | 6 |  |  |
| 3 | 4 |  |  | $1 \mid 2=12$ days |  |  |

range: $\quad$ greatest number of days - least number of days $=34-3$ or 31 days
median: middle value, or 13 days
mode: most frequent value, or 14 days

## Example 3 Analyze Data to Make Inferences

HOCKEY The table shows the number of goals scored by each player on a hockey team during the regular season. Make a stem-and-leaf plot of the data. Based on the data, what inferences can be made about the number of goals scored during the regular season?

| Number of Goals |  |  |  |  |
| ---: | ---: | ---: | ---: | ---: |
| 12 | 6 | 2 | 18 | 24 |
| 10 | 39 | 25 | 14 | 19 |
| 5 | 8 | 14 | 12 | 23 |

The least value is 2 , and the greatest value is 39 . So, the tens digits form the stems, and the ones digits form the leaves.

| Stem | Leaf |  |  |  |  |  |  |
| ---: | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 0 | 2 | 5 | 6 | 8 |  | $l l l l$ |  |
| 1 | 0 | 2 | 2 | 4 | 4 | 8 | 9 |
| 2 | 3 | 4 | 5 |  |  |  |  |
| 3 | 9 |  |  | $1 \mid 2$ | $=12$ | goals |  |

- Most of the players scored less than 20 goals during the regular season.
- Twelve and fourteen were the most common number of goals scored.
- One player scored many more goals than all the others, 39.
