

About the Author

Raj Kamal (b. 1949) did his MSc at the age of 17, published his first research paper in a UK journal at the age of 18, and his first program, written in FORTRAN that ran at ICT 1904, also at the age of 18. He completed his PhD from the Indian Institute of Technology Delhi, at 22. He did his postdoctoral studies (1978–79) at Uppsala University, Uppsala, Sweden, a world-class university.

Dr Raj Kamal has 46 years of experience in research and teaching and for postdoctoral studies. He has, thus far, successfully guided 15 PhD students and has published about 130 research papers in journals and conferences of

both international and national repute.

Due to his constant drive for understanding emerging technologies and passion for acquiring latest knowledge and its dissemination, he is lovingly described by a few colleagues as the ‘learning machine’ and the ‘human dynamo’ by a few. He has authored ten textbooks for students of Computer, Electronics, Communication and Information Technology, including books on Embedded Systems, Computer Architecture (a Schaum Series adaptation) and Internet and Web Technologies published from McGraw-Hill India, McGraw-Hill China, McGraw-Hill South Korea, McGraw-Hill Singapore, and McGraw-Hill USA.

He is immensely popular among students of emerging fields in Computer Science, Electronics and Information Technology areas. He has worked at Punjab University, Patiala, Punjab (1978–79), Kalasalingam University, Srivilliputtur, Tamil Nadu (2002–04) and Guru Nanak Engineering College, Hyderabad, Andhra Pradesh (2007–2008). He is working at present as Professor at Devi Ahilya Viswavidyalaya, Indore, since the last 25 years.
