Conversion Factors and Some Physical Constants 1027

CONTENTS

Preface xv

CHAPTER ONE

INTRODUCTION AND OVERVIEW 1

- 1-1** Introduction to Thermal-Fluid Sciences 2
 - Application Areas of Thermal-Fluid Sciences 2
- 1-2** Thermodynamics 3
- 1-3** Heat Transfer 5
- 1-4** Fluid Mechanics 6
- 1-5** Importance of Dimensions and Units 7
 - Some SI and English Units 9
 - Dimensional Homogeneity 11
 - Unity Conversion Ratios 12
- 1-6** Problem-Solving Technique 13
 - Step 1: Problem Statement 13
 - Step 2: Schematic 14
 - Step 3: Assumptions and Approximations 14
 - Step 4: Physical Laws 14
 - Step 5: Properties 14
 - Step 6: Calculations 14
 - Step 7: Reasoning, Verification, and Discussion 14
 - Engineering Software Packages 15
 - A Remark on Significant Digits 16
 - Summary 17
 - References and Suggested Readings 18
 - Problems 18

PART 1 THERMODYNAMICS 21

CHAPTER TWO

BASIC CONCEPTS OF THERMODYNAMICS 23

- 2-1** Systems and Control Volumes 24
- 2-2** Properties of a System 25
 - Continuum 26
- 2-3** Density and Specific Gravity 26
- 2-4** State and Equilibrium 27
 - The State Postulate 28

- 2-5** Processes and Cycles 29
 - The Steady-Flow Process 30
- 2-6** Temperature and the Zeroth Law of Thermodynamics 30
 - Temperature Scales 31
 - The International Temperature Scale of 1990 (ITS-90) 33
- 2-7** Pressure 35
 - Variation of Pressure with Depth 37
- 2-8** Pressure Measurement Devices 40
 - The Barometer 40
 - The Manometer 43
 - Other Pressure Measurement Devices 46
 - Summary 47
 - References and Suggested Readings 48
 - Problems 48

CHAPTER THREE

ENERGY, ENERGY TRANSFER, AND GENERAL ENERGY ANALYSIS 57

- 3-1** Introduction 58
- 3-2** Forms of Energy 59
 - Some Physical Insight to Internal Energy 61
 - More on Nuclear Energy 62
 - Mechanical Energy 64
- 3-3** Energy Transfer by Heat 66
 - Historical Background on Heat 67
- 3-4** Energy Transfer by Work 68
 - Electrical Work 71
- 3-5** Mechanical Forms of Work 72
 - Shaft Work 72
 - Spring Work 73
 - Work Done on Elastic Solid Bars 73
 - Work Associated with the Stretching of a Liquid Film 74
 - Work Done to Raise or to Accelerate a Body 74
 - Nonmechanical Forms of Work 76
- 3-6** The First Law of Thermodynamics 76
 - Energy Balance 78
 - Energy Change of a System, ΔE_{system} 78
 - Mechanisms of Energy Transfer, E_{in} and E_{out} 79

- 3-7** Energy Conversion Efficiencies 84
 Efficiencies of Mechanical
 and Electrical Devices 88
 Summary 91
 References and Suggested Readings 92
 Problems 92

CHAPTER FOUR

PROPERTIES OF PURE SUBSTANCES 101

- 4-1** Pure Substance 102
- 4-2** Phases of a Pure Substance 102
- 4-3** Phase-Change Processes of Pure
 Substances 103
 Compressed Liquid and Saturated Liquid 104
 Saturated Vapor and Superheated Vapor 104
 Saturation Temperature and Saturation Pressure 105
 Some Consequences of T_{sat} and P_{sat} Dependence 106
- 4-4** Property Diagrams for Phase-Change
 Processes 108
 1 The T - v Diagram 108
 2 The P - v Diagram 110
 Extending the Diagrams to Include
 the Solid Phase 110
 3 The P - T Diagram 112
 The P - v - T Surface 113
- 4-5** Property Tables 114
 Enthalpy—A Combination Property 114
 1a Saturated Liquid and Saturated Vapor States 115
 1b Saturated Liquid–Vapor Mixture 117
 2 Superheated Vapor 120
 3 Compressed Liquid 121
 Reference State and Reference Values 122
- 4-6** The Ideal-Gas Equation of State 124
 Is Water Vapor an Ideal Gas? 127
- 4-7** Compressibility Factor—A Measure
 of Deviation From Ideal-Gas Behavior 128
 Summary 132
 References and Suggested Readings 132
 Problems 133

CHAPTER FIVE

ENERGY ANALYSIS OF CLOSED SYSTEMS 141

- 5-1** Moving Boundary Work 142
 Polytropic Process 146

- 5-2** Energy Balance for Closed Systems 147
- 5-3** Specific Heats 152
- 5-4** Internal Energy, Enthalpy, and Specific Heats
 of Ideal Gases 154
 Specific Heat Relations of Ideal Gases 156
- 5-5** Internal Energy, Enthalpy, and Specific Heats
 of Solids and Liquids 161
 Internal Energy Changes 162
 Enthalpy Changes 162
 Summary 165
 References and Suggested Readings 166
 Problems 166

CHAPTER SIX

MASS AND ENERGY ANALYSIS OF CONTROL VOLUMES 179

- 6-1** Conservation of Mass 180
 Mass and Volume Flow Rates 180
 Conservation of Mass Principle 182
 Mass Balance for Steady-Flow Processes 184
 Special Case: Incompressible Flow 185
- 6-2** Flow Work and the Energy
 of a Flowing Fluid 187
 Total Energy of a Flowing Fluid 188
 Energy Transport by Mass 189
- 6-3** Energy Analysis of Steady-Flow Systems 191
- 6-4** Some Steady-Flow Engineering Devices 194
 1 Nozzles and Diffusers 195
 2 Turbines and Compressors 198
 3 Throttling Valves 200
 4a Mixing Chambers 202
 4b Heat Exchangers 204
 5 Pipe and Duct Flow 206
- 6-5** Energy Analysis of Unsteady-Flow
 Processes 208
 Summary 213
 References and Suggested Readings 214
 Problems 214

CHAPTER SEVEN

THE SECOND LAW OF THERMODYNAMICS 233

- 7-1** Introduction to the Second Law 234
- 7-2** Thermal Energy Reservoirs 235

7-3	Heat Engines	236
	Thermal Efficiency	237
	Can We Save Q_{out} ?	239
	The Second Law of Thermodynamics:	
	Kelvin–Planck Statement	241
7-4	Refrigerators and Heat Pumps	241
	Coefficient of Performance	242
	Heat Pumps	243
	Performance of Refrigerators, Air Conditioners, and Heat Pumps	244
	The Second Law of Thermodynamics:	
	Clausius Statement	246
	Equivalence of the Two Statements	247
7-5	Reversible and Irreversible Processes	248
	Irreversibilities	249
	Internally and Externally Reversible Processes	250
7-6	The Carnot Cycle	251
	The Reversed Carnot Cycle	253
7-7	The Carnot Principles	253
7-8	The Thermodynamic Temperature Scale	255
7-9	The Carnot Heat Engine	257
	The Quality of Energy	258
7-10	The Carnot Refrigerator and Heat Pump	259
	Summary	262
	References and Suggested Readings	263
	Problems	263

CHAPTER EIGHT

ENTROPY 275

8-1	Entropy	276
	A Special Case: Internally Reversible Isothermal Heat Transfer Processes	279
8-2	The Increase of Entropy Principle	280
	Some Remarks about Entropy	282
8-3	Entropy Change of Pure Substances	283
8-4	Isentropic Processes	286
8-5	Property Diagrams Involving Entropy	288
8-6	What is Entropy?	289
	Entropy and Entropy Generation in Daily Life	292
8-7	The $T ds$ Relations	293
8-8	Entropy Change of Liquids and Solids	295
8-9	The Entropy Change of Ideal Gases	298
	Constant Specific Heats (Approximate Analysis)	299
	Variable Specific Heats (Exact Analysis)	299

	Isentropic Processes of Ideal Gases	301
	Constant Specific Heats (Approximate Analysis)	301
	Variable Specific Heats (Exact Analysis)	302
	Relative Pressure and Relative Specific Volume	302
8-10	Reversible Steady-Flow Work	305
	Proof That Steady-Flow Devices Deliver the Most and Consume the Least Work When the Process Is Reversible	308
8-11	Isentropic Efficiencies of Steady-Flow Devices	309
	Isentropic Efficiency of Turbines	310
	Isentropic Efficiencies of Compressors and Pumps	312
	Isentropic Efficiency of Nozzles	314
8-12	Entropy Balance	316
	Entropy Change of a System, ΔS_{system}	316
	Mechanisms of Entropy Transfer, S_{in} and S_{out}	317
	1 Heat Transfer	317
	2 Mass Flow	318
	Entropy Generation, S_{gen}	318
	Closed Systems	319
	Control Volumes	320
	Summary	326
	References and Suggested Readings	327
	Problems	327

CHAPTER NINE

POWER AND REFRIGERATION CYCLES 345

9-1	Basic Considerations in the Analysis of Power Cycles	346
9-2	The Carnot Cycle and its Value in Engineering	348
9-3	Air-Standard Assumptions	350
9-4	An Overview of Reciprocating Engines	350
9-5	Otto Cycle: The Ideal Cycle for Spark-Ignition Engines	352
9-6	Diesel Cycle: The Ideal Cycle for Compression-Ignition Engines	359
9-7	Brayton Cycle: The Ideal Cycle for Gas-Turbine Engines	362
	Development of Gas Turbines	365
	Deviation of Actual Gas-Turbine Cycles from Idealized Ones	368
9-8	The Brayton Cycle with Regeneration	369
9-9	The Carnot Vapor Cycle	372

- 9-10** Rankine Cycle: The Ideal Cycle for Vapor Power Cycles 373
Energy Analysis of the Ideal Rankine Cycle 373
- 9-11** Deviation of Actual Vapor Power Cycles from Idealized Ones 376
- 9-12** How Can We Increase The Efficiency of The Rankine Cycle? 379
Lowering the Condenser Pressure (*Lowers* $T_{low,avg}$) 379
Superheating the Steam to High Temperatures (*Increases* $T_{high,avg}$) 380
Increasing the Boiler Pressure (*Increases* $T_{high,avg}$) 380
- 9-13** The Ideal Reheat Rankine Cycle 383
- 9-14** Refrigerators and Heat Pumps 387
- 9-15** The Reversed Carnot Cycle 388
- 9-16** The Ideal Vapor-Compression Refrigeration Cycle 389
- 9-17** Actual Vapor-Compression Refrigeration Cycle 392
- 9-18** Heat Pump Systems 394
Summary 396
References and Suggested Readings 397
Problems 398

PART 2 FLUID MECHANICS 415

CHAPTER TEN

INTRODUCTION AND PROPERTIES OF FLUIDS 417

- 10-1** The No-Slip Condition 418
- 10-2** Classification of Fluid Flows 419
Viscous versus Inviscid Regions of Flow 419
Internal versus External Flow 419
Compressible versus Incompressible Flow 419
Laminar versus Turbulent Flow 420
Natural (or Unforced) versus Forced Flow 420
Steady versus Unsteady Flow 421
One-, Two-, and Three-Dimensional Flows 422
- 10-3** Vapor Pressure and Cavitation 424
- 10-4** Viscosity 425
- 10-5** Surface Tension and Capillary Effect 430
Capillary Effect 433
Summary 436
References and Suggested Reading 436
Problems 437

CHAPTER ELEVEN

FLUID STATICS 443

- 11-1** Introduction to Fluid Statics 444
- 11-2** Hydrostatic Forces on Submerged Plane Surfaces 444
Special Case: Submerged Rectangular Plate 447
- 11-3** Hydrostatic Forces on Submerged Curved Surfaces 450
- 11-4** Buoyancy and Stability 453
Stability of Immersed and Floating Bodies 456
Summary 458
References and Suggested Readings 459
Problems 459

CHAPTER TWELVE

BERNOULLI AND ENERGY EQUATIONS 465

- 12-1** The Bernoulli Equation 466
Acceleration of a Fluid Particle 466
Derivation of the Bernoulli Equation 467
Force Balance across Streamlines 469
Unsteady, Compressible Flow 469
Static, Dynamic, and Stagnation Pressures 469
Limitations on the Use of the Bernoulli Equation 471
Hydraulic Grade Line (HGL) and Energy Grade Line (EGL) 472
Applications of the Bernoulli Equation 474
- 12-2** Energy Analysis of Steady Flows 478
Special Case: Incompressible Flow with No Mechanical Work Devices and Negligible Friction 481
Kinetic Energy Correction Factor, α 481
Summary 486
References and Suggested Reading 486
Problems 487

CHAPTER THIRTEEN

MOMENTUM ANALYSIS OF FLOW SYSTEMS 495

- 13-1** Newton's Laws 496
- 13-2** Choosing a Control Volume 497
- 13-3** Forces Acting on a Control Volume 498
- 13-4** The Reynolds Transport Theorem 500
An Application: Conservation of Mass 505

- 13–5** The Linear Momentum Equation 506
 Special Cases 507
 Momentum-Flux Correction Factor, β 508
 Steady Flow 510
 Flow with No External Forces 510
 Summary 517
 References and Suggested Readings 518
 Problems 518

CHAPTER FOURTEEN

INTERNAL FLOW 527

- 14–1** Introduction 528
14–2 Laminar and Turbulent Flows 529
 Reynolds Number 530
14–3 The Entrance Region 531
 Entry Lengths 532
14–4 Laminar Flow in Pipes 533
 Pressure Drop and Head Loss 535
 Effect of Gravity on Velocity and Flow Rate
 in Laminar Flow 537
 Laminar Flow in Noncircular Pipes 538
14–5 Turbulent Flow in Pipes 541
 Turbulent Velocity Profile 542
 The Moody Chart and the Colebrook Equation 542
 Types of Fluid Flow Problems 545
14–6 Minor Losses 549
14–7 Piping Networks and Pump Selection 557
 Series and Parallel Pipes 557
 Piping Systems with Pumps and Turbines 558
 Summary 564
 References and Suggested Reading 565
 Problems 566

CHAPTER FIFTEEN

EXTERNAL FLOW: DRAG AND LIFT 577

- 15–1** Introduction 578
15–2 Drag and Lift 580
15–3 Friction and Pressure Drag 584
 Reducing Drag by Streamlining 585
 Flow Separation 586
15–4 Drag Coefficients of Common Geometries 587
 Biological Systems and Drag 588
 Drag Coefficients of Vehicles 591
 Superposition 593

- 15–5** Parallel Flow Over Flat Plates 595
 Friction Coefficient 597
15–6 Flow Over Cylinders and Spheres 599
 Effect of Surface Roughness 602
15–7 Lift 604
 Finite-Span Wings and Induced Drag 608
 Summary 611
 References and Suggested Reading 613
 Problems 613

PART 3 HEAT TRANSFER 623

CHAPTER SIXTEEN

MECHANISMS OF HEAT TRANSFER 625

- 16–1** Introduction 626
16–2 Conduction 626
 Thermal Conductivity 628
 Thermal Diffusivity 632
16–3 Convection 634
16–4 Radiation 636
16–5 Simultaneous Heat Transfer Mechanisms 639
 Summary 644
 References and Suggested Reading 645
 Problems 645

CHAPTER SEVENTEEN

STEADY HEAT CONDUCTION 655

- 17–1** Steady Heat Conduction in
 Plane Walls 656
 Thermal Resistance Concept 657
 Thermal Resistance Network 659
 Multilayer Plane Walls 661
17–2 Thermal Contact Resistance 666
17–3 Generalized Thermal Resistance
 Networks 671
17–4 Heat Conduction in Cylinders
 and Spheres 674
 Multilayered Cylinders and Spheres 675
17–5 Critical Radius of Insulation 680

17-6 Heat Transfer from Finned Surfaces 683

Fin Equation 684
 Fin Efficiency 689
 Fin Effectiveness 691
 Proper Length of a Fin 694

Summary 699
 References and Suggested Reading 700
 Problems 700

CHAPTER EIGHTEEN**TRANSIENT HEAT CONDUCTION 717****18-1 Lumped System Analysis 718**

Criteria for Lumped System Analysis 719
 Some Remarks on Heat Transfer in
 Lumped Systems 721

**18-2 Transient Heat Conduction in
Large Plane Walls, Long Cylinders,
and Spheres with Spatial Effects 723**

Nondimensionalized One-Dimensional Transient
 Conduction Problem 724
 Approximate Analytical and Graphical Solutions 727

**18-3 Transient Heat Conduction in
Semi-Infinite Solids 738**

Contact of Two Semi-Infinite Solids 743

**18-4 Transient Heat Conduction in
Multidimensional Systems 746**

Summary 751
 References and Suggested Reading 752
 Problems 753

CHAPTER NINETEEN**FORCED CONVECTION 765****19-1 Physical Mechanism of Convection 766**

Nusselt Number 768

19-2 Thermal Boundary Layer 769

Prandtl Number 769

19-3 Parallel Flow Over Flat Plates 770

Flat Plate with Unheated Starting Length 772
 Uniform Heat Flux 773

19-4 Flow Across Cylinders and Spheres 776**19-5 General Considerations for Pipe Flow 781**

Thermal Entrance Region 782
 Entry Lengths 784

19-6 General Thermal Analysis 785

Constant Surface Heat Flux
 ($\dot{q}_s = \text{constant}$) 786
 Constant Surface Temperature
 ($T_s = \text{constant}$) 787

19-7 Laminar Flow in Tubes 790

Constant Surface Heat Flux 791
 Constant Surface Temperature 792
 Laminar Flow in Noncircular Tubes 792
 Developing Laminar Flow in the
 Entrance Region 793

19-8 Turbulent Flow in Tubes 795

Developing Turbulent Flow in the
 Entrance Region 797
 Turbulent Flow in Noncircular Tubes 797
 Flow through Tube Annulus 797
 Heat Transfer Enhancement 798

Summary 802
 References and Suggested Reading 803
 Problems 804

CHAPTER TWENTY**NATURAL CONVECTION 821****20-1 Physical Mechanism
of Natural Convection 822****20-2 Equation of Motion and
the Grashof Number 825**

The Grashof Number 827

20-3 Natural Convection Over Surfaces 828

Vertical Plates ($T_s = \text{constant}$) 829
 Vertical Plates ($\dot{q}_s = \text{constant}$) 829
 Vertical Cylinders 831
 Inclined Plates 831
 Horizontal Plates 832
 Horizontal Cylinders and Spheres 832

**20-4 Natural Convection Inside
Enclosures 836**

Effective Thermal Conductivity 836
 Horizontal Rectangular Enclosures 837
 Inclined Rectangular Enclosures 838
 Vertical Rectangular Enclosures 838
 Concentric Cylinders 839
 Concentric Spheres 839
 Combined Natural Convection
 and Radiation 840

Summary 844
 References and Suggested Reading 845
 Problems 846

CHAPTER TWENTY ONE

RADIATION HEAT TRANSFER 859

- 21-1** Introduction 860
 - 21-2** Thermal Radiation 861
 - 21-3** Blackbody Radiation 863
 - 21-4** Radiative Properties 870
 - Emissivity 870
 - Absorptivity, Reflectivity, and Transmissivity 874
 - Kirchhoff's Law 876
 - The Greenhouse Effect 877
 - 21-5** The View Factor 877
 - View Factor Relations 880
 - 1 The Reciprocity Relation 883
 - 2 The Summation Rule 883
 - 3 The Superposition Rule 885
 - 4 The Symmetry Rule 886
 - View Factors between Infinitely Long Surfaces:
 - The Crossed-Strings Method 888
 - 21-6** Radiation Heat Transfer: Black Surfaces 890
 - 21-7** Radiation Heat Transfer: Diffuse, Gray Surfaces 892
 - Radiosity 892
 - Net Radiation Heat Transfer to or from a Surface 893
 - Net Radiation Heat Transfer between Any Two Surfaces 894
 - Methods of Solving Radiation Problems 895
 - Radiation Heat Transfer in Two-Surface Enclosures 896
 - Radiation Heat Transfer in Three-Surface Enclosures 898
- Summary 901
References and Suggested Readings 903
Problems 903

CHAPTER TWENTY TWO

HEAT EXCHANGERS 919

- 22-1** Types of Heat Exchangers 920
- 22-2** The Overall Heat Transfer Coefficient 923
 - Fouling Factor 926
- 22-3** Analysis of Heat Exchangers 930
- 22-4** The Log Mean Temperature Difference Method 932
 - Counter-Flow Heat Exchangers 934
 - Multipass and Cross-Flow Heat Exchangers: Use of a Correction Factor 935

22-5 The Effectiveness–NTU Method 942

- Summary 953
- References and Suggested Reading 954
- Problems 955
