BOXED READINGS

There are four kinds of boxed readings—**Focus On**; **Going Green**; **Science, Politics, & Policy**; and **Issues & Analysis**. All provide an opportunity to look at a particular topic in greater depth. Often the content presents a global perspective on the content in the text. In addition, each reading has a specific purpose.

The **Focus On** feature looks at a particular topic in greater depth, while not compromising the flow of the content in the text.

The **Going Green** feature shows positive environmental trends or activities that are often unnoticed because of the tendency to focus on problems.

The **Science, Politics, & Policy** feature highlights the complex and often messy interplay of political and social forces with scientific facts that occurs in the forming of policy.

The **Issues & Analysis** feature describes a particular environmental situation and asks students to think about approaches for dealing with the problem.
