

## Road Map to Learning Software Engineering

The content of the book can be viewed and used in the following manner, with some variations, if required.

Course and Sessions	Target	Syllabus Contents
Basic: 25 sessions	Entry Level: For Students and Developers	Introduction to SE, SSAD (Chapter 8 through Chapter 11), OOSAD (Chapter 13 through Chapter 17), Term Project.
Higher level: 40 sessions	Software Engineer/ Professionals	Basic Course Plus Special Topics and Advanced Topics, Study and Analysis of Case Solution and Chapter 2 through Chapter 5
Advanced: 60 sessions	Project Managers, Leaders and QA Professionals	Higher Level Plus Software Development Process Management (Chapter 20 through 22), Term Project.

*Note:* Glossary, references and resources, and Web site for more learning is a common support for all three courses.
