

CONTENTS

Preface	xv	<i>Development of a Pollution Control System</i>	42
Prologue	xix	<i>Air Pollution Abatement</i>	42
CHAPTER 1			
Introduction	1	<i>Water Pollution Abatement</i>	47
Chemical Engineering Plant Design	1	<i>Solid Waste Disposal</i>	50
General Overall Design Considerations	2	<i>Thermal Pollution Control</i>	51
<i>Process Design Development</i>	2	<i>Noise Control</i>	52
<i>Flowsheet Development</i>	5	Plant Location	52
<i>Computer-Aided Design</i>	6	<i>Factors Involved</i>	53
<i>Cost Estimation</i>	6	<i>Selection of the Plant Site</i>	56
<i>Profitability Analysis of Investments</i>	7	Plant Layout	56
<i>Optimum Design</i>	8	<i>Preparation of the Layout</i>	57
Practical Considerations in Design	11	Plant Operation and Control	57
<i>The Design Approach</i>	12	<i>Instrumentation</i>	57
Engineering Ethics in Design	13	<i>Maintenance</i>	58
CHAPTER 2			
General Design Considerations	15	<i>Utilities</i>	59
Health and Safety Hazards	15	<i>Structural Design</i>	60
<i>Sources of Exposure</i>	16	<i>Storage</i>	60
<i>Exposure Evaluation</i>	18	<i>Materials Handling</i>	61
<i>Control of Exposure Hazards</i>	20	Patent Considerations	62
<i>Fire and Explosion Hazards</i>	22	Problems	62
<i>Personnel Safety</i>	27	CHAPTER 3	
<i>Safety Regulations</i>	27	Process Design Development	67
Loss Prevention	29	Development of Design Database	67
<i>HAZOP Study</i>	29	<i>Literature Survey</i>	68
<i>Fault-tree Analysis</i>	35	<i>Patent Search</i>	69
<i>Failure Mode and Effect Analysis</i>	36	Process Creation	69
<i>Safety Indexes</i>	36	<i>Batch Versus Continuous Operation</i>	70
<i>Safety Audits</i>	36	<i>Raw Materials and Product Specifications</i>	70
Environmental Protection	40	<i>Process Synthesis Steps</i>	71
<i>Environmental Regulations</i>	41	Process Design	72
		<i>Types of Process Designs</i>	74
		Process Flow Diagrams	77
		Piping and Instrumentation Diagrams	79

Vessel and Piping Layout Isometrics	80	Process Flowsheet	149
Equipment Design and Specifications	81	<i>Reactors</i>	149
<i>Scale-up of Equipment in Design</i>	81	<i>Mass and Energy Balances</i>	149
<i>Safety Factors</i>	81	<i>Separation Trains</i>	149
<i>Equipment Specifications</i>	84	<i>Heat Exchange</i>	150
<i>Materials of Construction</i>	86	Algorithmic Flowsheet Generation	158
The Preliminary Design—A Specific Example	87	<i>Fundamentals of Algorithmic Process-Network</i>	<i>Synthesis</i> 159
<i>Problem Statement</i>	87	<i>Application of Algorithmic Process-Network</i>	<i>Synthesis</i> 165
<i>Literature Survey</i>	87	Comparison of Hierarchical and	Algorithmic Results 189
<i>Process Creation</i>	88	Genetic Algorithms	189
<i>Development of Conventional Base-Case Design</i>	90	Future Approaches to Flowsheet Synthesis	and Development 190
<i>Economic Assessment of Base-Case Design</i>	110	Software Use in Flowsheet Synthesis	190
<i>Assessment of Proposed Base-Case Design</i>	<i>Modification</i> 113	Analysis and Evaluation of Flowsheets	190
Summary	120	<i>Criteria for Evaluating Designs</i>	190
Problems	121	Summary	192
CHAPTER 4		Nomenclature	192
Flowsheet Synthesis and		<i>Greek Symbol</i>	193
Development	125	Problems	193
Flowsheet Synthesis and Development	126	CHAPTER 5	
<i>General Procedure</i>	126	Software Use in Process	Design 196
Process Information	130	Software Structure	198
<i>Background Information</i>	130	<i>Chemical Property Estimation</i>	198
<i>Molecular Path Synthesis</i>	131	<i>Process Equipment Models</i>	201
<i>Selecting a Process Pathway</i>	132	<i>Process Equipment Cost Estimation</i>	202
<i>Production Mode</i>	132	<i>Process Economic Evaluation</i>	203
<i>Recording Decisions</i>	133	<i>Heat Integration</i>	203
Input/Output Structure	135	<i>Process Control</i>	203
Functions Diagram	137	<i>Process Optimization</i>	204
<i>Preprocessing</i>	138	Software Capabilities	204
<i>Reactions</i>	139	<i>General-Type Software</i>	205
<i>Recycle</i>	139	Software for Process Design	208
<i>By-products, Intermediates, and Wastes</i>	139	<i>Molecular Reaction Databases and Simulators</i>	208
<i>Separations</i>	140	<i>Chemical Cost Databases</i>	209
Operations Diagram	143	<i>Flowsheeting Software</i>	209
<i>Preprocessing</i>	143	<i>Unit Operations Simulators</i>	211
<i>Reactors</i>	143		
<i>Separations Methods</i>	144		
<i>Heating and Cooling</i>	145		
<i>Minimization of Processing</i>	145		

<i>Piping System Design</i>	214	<i>Yard Improvements</i>	246
<i>Plant Layout</i>	214	<i>Service Facilities</i>	246
<i>Economic Evaluation</i>	215	<i>Health, Safety, and Environmental Functions</i>	247
Software Selection	216	<i>Land</i>	248
Software Use	216	<i>Engineering and Supervision</i>	248
<i>Physical Property Estimation Guidelines</i>	217	<i>Legal Expenses</i>	248
<i>Process Simulation Guidelines</i>	217	<i>Construction Expenses</i>	248
Avoiding Pitfalls in Software Use	220	<i>Contractor's Fee</i>	249
<i>Graphic Interface and Ease of Use</i>	221	<i>Contingencies</i>	249
<i>Thermodynamic Property Packages</i>	222	Methods for Estimating Capital Investment	249
<i>Simulation Realism</i>	222	Estimation of Revenue	258
Evaluation of Software Results	224	Estimation of Total Product Cost	259
CHAPTER 6		<i>Manufacturing Costs</i>	262
Analysis of Cost Estimation	226	<i>Variable Production Costs</i>	262
Cash Flow for Industrial Operations	226	<i>Plant Overhead Costs</i>	270
<i>Cash Flow</i>	226	<i>General Expenses</i>	270
<i>Cumulative Cash Position</i>	228	Gross Profit, Net Profit, and Cash Flow	271
Factors Affecting Investment and Production Costs	230	Contingencies	272
<i>Sources of Equipment</i>	230	Summary	272
<i>Price Fluctuations</i>	230	Nomenclature	274
<i>Company Policies</i>	230	<i>Greek Symbol</i>	275
<i>Operating Time and Rate of Production</i>	231	Problems	275
<i>Government Policies</i>	232	CHAPTER 7	
Capital Investment	232	Interest, Time Value of Money, Taxes, and Fixed Charges	279
<i>Fixed-Capital Investment</i>	233	Interest	279
<i>Working Capital</i>	233	<i>Simple Interest</i>	280
Estimation of Capital Investment	233	<i>Compound Interest</i>	280
<i>Types of Capital Cost Estimates</i>	235	<i>Nominal and Effective Interest Rates</i>	281
Cost Indexes	236	<i>Continuous Interest</i>	283
Cost Components in Capital Investment	239	Cost of Capital	285
<i>Purchased Equipment</i>	241	<i>Income Tax Effects</i>	286
<i>Estimating Equipment Costs by Scaling</i>	242	<i>Loan Payments</i>	287
<i>Purchased-Equipment Delivery</i>	244	Time Value of Money	290
<i>Purchased-Equipment Installation</i>	244	Cash Flow Patterns	292
<i>Instrumentation and Controls</i>	245	<i>Discrete Cash Flows</i>	292
<i>Piping</i>	245	<i>Continuous Cash Flows</i>	294
<i>Electrical Systems</i>	246	Compounding and Discounting Factors	297
<i>Buildings</i>	246		

Income Taxes	303	Replacements	348
<i>Federal Income Taxes</i>	304	<i>Methods of Profitability Evaluation for Replacements</i>	349
<i>Taxable Income</i>	304	<i>Typical Example of Replacement Policy</i>	349
<i>Capital Gains Tax</i>	305	<i>Book Values and Unamortized Values</i>	350
<i>Losses</i>	306	<i>Investment on Which the Replacement Comparison Is Based</i>	350
<i>Other Federal Taxes</i>	306	Practical Factors in Alternative-Investment and Replacement Analysis	352
<i>State Taxes</i>	306	Nomenclature	352
<i>Nonincome Taxes</i>	306	<i>Greek Symbol</i>	353
Fixed Charges	307	Problems	353
<i>Depreciation</i>	307	CHAPTER 9	
<i>Depreciation and Income Tax</i>	308	Optimum Design and Design Strategy	358
<i>Depreciable Investments</i>	309	Defining the Optimization Problem	359
<i>Current Value</i>	309	Selecting an Objective Function	361
<i>Salvage Value</i>	309	<i>Structural Optimization</i>	361
<i>Recovery Period</i>	309	<i>Parametric Optimization</i>	362
<i>Methods for Calculating Depreciation</i>	310	<i>Variable Screening and Selection</i>	363
<i>Insurance</i>	313	Suboptimization	363
<i>Self-insurance</i>	314	<i>Practical and Intangible Considerations</i>	364
Nomenclature	315	Programming Optimization Problems	364
<i>Greek Symbol</i>	316	<i>Linear Programming</i>	367
Problems	316	<i>Generalization of Strategy for Linear Programming</i>	370
CHAPTER 8		<i>Simultaneous Equations</i>	372
Profitability, Alternative Investments, and Replacements	319	<i>Nonlinear Programming</i>	373
Profitability Standards	320	<i>Dynamic Programming</i>	377
<i>Cost of Capital</i>	320	Optimization Solution Methodologies	379
<i>Minimum Acceptable Rate of Return</i>	321	<i>Procedure with One Variable</i>	380
Methods for Calculating Profitability	322	<i>Procedure with Two or More Variables</i>	381
<i>Methods That Do Not Consider the Time Value of Money</i>	322	<i>Breakeven Chart for Optimum Analysis of Production</i>	384
<i>Methods That Consider the Time Value of Money</i>	327	<i>Experimental Design and Analysis of Process Simulations</i>	384
<i>Selecting a Profitability Method</i>	330	<i>Algorithm Solutions to Optimization Problems</i>	386
<i>Effect of Inflation on Profitability Analysis</i>	335	Optimization Applications	390
<i>Start-up Costs</i>	340	<i>Optimization Application: Optimum Production Rates in Plant Operation</i>	390
<i>Spreadsheet for Economic Evaluation Calculations</i>	340	<i>Optimization Application: Cyclic Operations</i>	394
Alternative Investments	340		
<i>Alternatives When an Investment Must Be Made</i>	342		
<i>Analysis with Small Investment Increments</i>	346		

<i>Optimization Application: Economic Pipe Diameter</i>	401
<i>Optimization Application: Cooling Water Flow Rate</i>	406
<i>Optimization Application: Distillation Reflux Ratio</i>	409
<i>Optimization Application: Pinch Technology Analysis</i>	414
Nomenclature	433
<i>Greek Symbols</i>	435
Problems	435

CHAPTER 10

Materials and Fabrication Selection 440

Factors Contributing to Corrosion	440
Combating Corrosion	443
Properties of Materials	444
<i>Ferrous Metals and Alloys</i>	444
<i>Nonferrous Metals and Alloys</i>	450
<i>Inorganic Nonmetals</i>	451
<i>Organic Nonmetals</i>	452
<i>Low- and High-Temperature Materials</i>	455
<i>Gasket Materials</i>	457
Tabulated Data for Selecting Materials of Construction	457
Selection of Materials	457
<i>Economics Involved in Selection</i>	464
Fabrication of Equipment	465
<i>Methods of Fabrication</i>	466
Problems	467

CHAPTER 11

Written and Oral Design Reports 469

Written Reports	470
<i>Organization of a Written Report</i>	470
<i>Preparing the Report</i>	473
<i>Presenting the Results</i>	474
<i>Comments on Common Errors</i>	480
<i>Checklist for the Final Report</i>	481

Oral Reports	481
<i>Organization and Presentation of an Oral Design Report</i>	482
Problems	484

CHAPTER 12

Materials-Handling Equipment—Design and Costs 485

Basic Concepts of Fluid Transport	485
<i>Newtonian Fluids</i>	486
<i>Non-Newtonian and Bingham Fluids</i>	488
<i>Vacuum Flow</i>	489
<i>Frictional Losses Encountered in Pipelines</i>	491
<i>Power Requirements for Transport of Liquids and Gases</i>	492
Piping in Fluid Transport Processes	497
<i>Selection of Piping Materials</i>	497
<i>Design of Piping Systems</i>	499
<i>Costs for Piping and Piping System Auxiliaries</i>	502
Pumping of Fluids	508
<i>Selection of Pumps</i>	508
<i>Design Procedures for Pumps</i>	515
<i>Costs for Pumps and Motors</i>	516
Compression and Expansion of Fluids	520
<i>Selection of Compressors</i>	520
<i>Selection of Fans and Blowers</i>	523
<i>Selection of Vacuum System Equipment</i>	524
<i>Selection of Turbines, Expanders, and Other Drivers</i>	525
<i>Design Procedures for Compressors</i>	527
<i>Design Procedures for Turbines and Expanders</i>	529
<i>Costs for Compressors, Fans, Blowers, and Expanders</i>	531
Agitation and Mixing of Fluids	536
<i>Selection of Agitators and Mixers</i>	536
<i>Design Procedures for Agitators and Mixers</i>	539
<i>Costs for Agitators and Mixers</i>	544
Flow Measurement of Fluids	549

Storage and Containment of Fluids	552
<i>Design Procedures for Pressure Vessels</i>	553
<i>Costs for Tanks, Pressure Vessels, and Storage Equipment</i>	553
Transport of Solids	560
<i>Selection of Solids Transport Equipment</i>	561
<i>General Design Procedures for Solids Transport Equipment</i>	565
<i>Costs for Solids Transport Equipment</i>	572
Handling of Solids	572
<i>Selection of Solids-Handling Equipment</i>	577
<i>General Design Procedures for Solids-Handling Equipment</i>	580
<i>Costs for Solids-Handling Equipment</i>	582
Nomenclature	587
<i>Greek Symbols</i>	589
Problems	589
CHAPTER 13	
Reactor Equipment—Design and Costs	592
Reactor Principles	594
<i>Reactor Types</i>	596
<i>Space Velocity and Space Time</i>	597
<i>Batch Reactors</i>	597
<i>Tubular Plug-Flow Reactors</i>	598
<i>Back-Mix Reactors</i>	599
<i>Nonideality of Reactors</i>	599
<i>Accounting for Reactor Nonideality</i>	600
<i>Residence Time Distribution</i>	600
<i>Nonideal Reactor Emulation Using Ideal Reactor Combinations</i>	601
<i>Recycle Reactors</i>	602
Development of Chemical Reaction Rate Expressions	605
<i>Types of Reactions</i>	606
Reaction and Reactor Performance	613
<i>Parallel Reactions</i>	613
<i>Series Reactions</i>	614
<i>Systems of Identical Multiple Reactors</i>	614

Reactor and Catalyst Equipment	616
<i>Selection of Catalyst</i>	616
<i>Types of Reactors</i>	617
<i>Selection of Reactors</i>	621
<i>Design of Reactor Systems</i>	622
<i>Reactor Design Procedure</i>	626
<i>Software</i>	626
<i>Costs for Reactor Equipment</i>	627
Summary	634
Nomenclature	635
<i>Greek Symbols</i>	636
Problems	637

CHAPTER 14

Heat-Transfer Equipment—
Design and Costs 642

Basic Theory of Heat Transfer in Exchangers	643
<i>Steady-State Heat-Transfer Considerations</i>	644
<i>Alternative Approaches to Heat Exchanger Performance</i>	652
Determination of Heat-Transfer Coefficients	656
<i>Film Coefficients for Fluids Flowing Inside of Pipes and Tubes (No Phase Change)</i>	657
<i>Film Coefficients for Fluids Flowing Outside of Pipes and Tubes (No Phase Change)</i>	659
<i>Film Coefficients and Overall Coefficients for Various Heat-Transfer Situations</i>	661
Determination of Pressure Drop in Heat Exchangers	664
<i>Tube-Side Pressure Drop</i>	664
<i>Shell-Side Pressure Drop</i>	665
Selection of Heat Exchanger Type	669
<i>Key Heat Exchanger Types Available</i>	670
<i>Preliminary Selection of Heat Exchanger Types</i>	676
<i>Costs of Heat Exchangers</i>	676
Design of Key Heat Exchanger Types	694
<i>Double-Pipe and Multiple Double-Pipe Exchangers</i>	696
<i>Shell-and-Tube Exchangers</i>	702

<i>Plate Exchangers</i>	724
<i>Compact Exchangers</i>	729
<i>Air-Cooled Exchangers</i>	733
<i>Condensers</i>	734
<i>Evaporators</i>	737
Optimum Design of Heat Exchangers	738
<i>General Case</i>	739
General Methods for Design of Heat Exchangers	744
Nomenclature	745
<i>Greek Symbols</i>	748
Problems	749

CHAPTER 15

Separation Equipment—Design and Costs 754

Selection of Suitable Separation Processes 755

Guidelines for the Separation Process Selection 757

Equipment Design and Costs for Separating Homogeneous Mixtures 769

Separation by Distillation 769

Distillation Design Procedures for Columns with Sieve Trays 769

Distillation Design Procedures for Columns with Random Packing 783

Distillation Design Procedures for Columns with Structured Packing 787

Rating of Distillation Equipment 788

Rigorous Design Methods for Multicomponent Distillation 788

Design Procedures for Other Distillation Processes 789

Equipment Costs for Tray and Packed Columns 792

Separation by Absorption and Stripping 797

Design Procedures for Trayed Columns Separating Dilute Solutes 799

Design Procedures for Packed Columns Separating Dilute Solutes 802

Design Procedures for Packed Columns Separating Concentrated Solutes 803

Separation by Extraction 804

Equipment Selection for Liquid/Liquid Extraction 804

Design Procedures for Liquid/Liquid Extraction 806

Equipment Costs for Liquid/Liquid Extraction Equipment 814

Separation Using Membranes 814

Selection of Membrane Types 814

General Design Concepts for Membrane Separation 815

General Design Procedures for Membrane Separation 820

Range of Costs for Several Membrane Systems 824

Separation by Adsorption 824

Selection of Sorbent for Separation by Adsorption 825

Basic Adsorption Cycles 827

Selection of Appropriate Adsorption Cycle 829

General Design Concepts for Separation by Adsorption 830

Costs for Adsorption Equipment 837

Equipment Design and Costs for Separating Heterogeneous Mixtures 837

Separation by Drying 839

Equipment Selection for Drying Solids 839

General Design Procedures for Drying 842

Costs for Typical Dryers 845

Separation by Filtration 851

Selection of Filtration Equipment 851

General Design Procedures for Separation by Filtration 854

Costs for Filtration and Other Solids Separation Equipment 863

Nomenclature 869

Greek Symbols 872

Problems 873

APPENDIX A:
The International System (SI) of
Units 877

APPENDIX B:
Auxiliary, Utility, and
Instrumentation Cost Data 890

APPENDIX C:
Design Problems 899

APPENDIX D:
Tables of Physical Properties and
Constants 947

APPENDIX E:
Heuristics for Process Equipment
Design 966

APPENDIX F:
Software Useful for Design 974

Author Index 976

Subject Index 979
