## Further Readings for Ch. 42

- Crowley, L. 2001. *An introduction to human disease: pathology and pathophysiology correlations*. Boston, MA: Jones & Bartlett Publishers. This well-illustrated text for study in the allied health fields describes diseases, and their symptoms, diagnoses, and treatments.
- Jordan, V. C. October 1998. Designer estrogens. *Scientific American* 279(4):60. Selective estrogen receptor modulators may protect against breast and endometrial cancers, osteoporosis, and heart disease.
- Litwack, G. and Norman, A. 1997. *Hormones*. San Diego, CA: Academic Press. This is an extensive reference in human hormone interactions with organ physiology.
- Mader, S. S. 2001. *Human biology*. 7th ed. Dubuque, Iowa: WCB/McGraw-Hill, Inc. A student-friendly text that covers the principles of biology with emphasis on human anatomy and physiology.
- Mader, S. S. 2000. *Understanding anatomy and physiology*. 4th ed. Dubuque, Iowa: Wm. C. Brown Publishers. A text that emphasizes the basics for beginning allied health students.
- Porterfield, S. 2000. *Endocrine physiology*. 2d ed. St. Louis, MO: Mosby, Inc. Text explains in a clear and concise manner the workings of the endocrine system.
- Smith, R. March 1999. The timing of birth. *Scientific American* 280(3):68. A hormone in the human placenta that influences the timing of delivery could yield ways to predict and prevent premature labor.
