Preface	xxxiii
PART I UNIX for the User	1
Chapter 1 Introducing UNIX	3
1.1 The Operating System	3
1.2 The UNIX Operating System.....	5
1.3 Knowing Your Machine	6
1.4 The System Administrator.....	7
1.5 Logging In and Out.....	7
1.5.1 Logging In.....	7
1.5.2 Logging Out.....	8
1.6 A Hands-On Session.....	9
1.6.1 System Information with date and who	10
1.6.2 Viewing Processes with ps	10
1.6.3 Handling Files.....	11
1.6.4 Handling Directories	12
1.7 How It All Clicked	14
1.7.1 Berkeley: The Second School.....	15
1.7.2 UNIX Gets Fragmented	15
1.7.3 The Internet	16
1.7.4 The Windows Threat.....	16
1.8 POSIX and the Single UNIX Specification.....	16
1.9 Linux and GNU.....	17
1.10 The UNIX Architecture.....	17
1.10.1 Division of Labor: Kernel and Shell	18

1.10.2	<i>The File and Process</i>	19
1.10.3	<i>The System Calls</i>	19
1.11	Features of UNIX	20
1.11.1	<i>A Multiuser System</i>	20
1.11.2	<i>A Multitasking System Too</i>	20
1.11.3	<i>A Repository of Applications</i>	21
1.11.4	<i>The Building-Block Approach</i>	21
1.11.5	<i>Pattern Matching</i>	21
1.11.6	<i>Programming Facility</i>	21
1.11.7	<i>Documentation</i>	22
	Summary.....	22
	Self-Test.....	23
	Exercises	24
Chapter 2	Becoming Familiar with UNIX Commands	25
2.1	Command Basics	26
2.1.1	<i>The PATH: Locating Commands</i>	26
2.1.2	<i>Where Is the Command?</i>	27
2.2	Command Structure	28
2.3	Flexibility of Command Usage	30
2.4	man : On-Line Help	31
2.4.1	<i>Navigation and Search</i>	33
2.4.2	<i>Further Help with man -k and man -f</i>	33
2.5	The man Documentation	34
2.5.1	<i>Understanding a man Page</i>	35
2.5.2	<i>Using man to Understand man</i>	35
2.6	echo : Displaying Messages.....	38
2.7	printf : Alternative to echo	39
2.8	script : Recording Your Session	40
2.9	Using Email with mailx	40
2.9.1	<i>Sending Mail</i>	41
2.9.2	<i>Receiving Mail</i>	41
2.9.3	<i>mailx Internal Commands</i>	42
2.10	passwd : Changing Your Password.....	44
2.11	uname : Your Machine's Name and Operating System	44
2.12	who : Know the Users	45

2.13 date : Displaying the System Date	46
2.14 stty : When Things Go Wrong	47
2.14.1 <i>Changing the Settings</i>	48
2.15 The X Window System.....	49
2.15.1 <i>The Terminal Emulator</i>	50
2.15.2 <i>The File Manager</i>	51
Summary.....	52
Self-Test.....	53
Exercises.....	54
Chapter 3 The File System	56
3.1 The File.....	57
3.1.1 <i>Ordinary (Regular) File</i>	57
3.1.2 <i>Directory File</i>	58
3.1.3 <i>Device File</i>	58
3.2 What's in a (File)name?.....	58
3.3 The File System Hierarchy	59
3.4 The UNIX File System	60
3.5 Using Absolute Pathnames with Commands.....	61
3.6 The HOME Variable and ~: The Home Directory.....	62
3.7 pwd and cd : Navigating the File System.....	62
3.8 Relative Pathnames (. and ..).....	64
3.9 mkdir : Making Directories.....	66
3.10 rmdir : Removing Directories.....	67
3.11 ls : Listing Files.....	68
3.11.1 <i>ls Options</i>	69
3.12 cp : Copying Files	71
3.12.1 <i>cp Options</i>	72
3.13 mv : Renaming Files.....	73
3.14 rm : Deleting Files	73
3.14.1 <i>rm Options</i>	74
3.15 cat : Displaying and Concatenating Files.....	76
3.16 more : The UNIX Pager.....	76
3.17 pico : Rudimentary Text Editing.....	78
3.17.1 <i>Navigation</i>	79
3.17.2 <i>Text Editing</i>	80

3.18 wc : Counting Lines, Words and Characters.....	80
3.19 lp : Printing a File	81
3.19.1 <i>Other Commands in the lp Subsystem</i>	81
3.20 od : Viewing Nonprintable Characters.....	82
3.21 dos2unix , unix2dos , and Tofrodos: Converting Between DOS and UNIX	83
3.22 tar : The Archival Program	84
3.23 gzip : The Compression Program	85
3.24 zip : The Compression and Archival Program	87
3.25 Other Ways of Using These Commands	88
Summary.....	88
Self-Test.....	89
Exercises	90
Chapter 4 File Attributes	92
4.1 ls Revisited (-l): Listing File Attributes	92
4.1.1 <i>Listing Directory Attributes (-ld)</i>	94
4.2 File Permissions.....	94
4.3 chmod : Changing File Permissions.....	96
4.3.1 <i>Relative Permissions</i>	96
4.3.2 <i>Absolute Assignment</i>	98
4.3.3 <i>Recursive Operation (-R)</i>	99
4.4 The Directory	100
4.4.1 <i>Read Permission</i>	100
4.4.2 <i>Write Permission</i>	100
4.4.3 <i>Execute Permission</i>	102
4.5 umask : Default File and Directory Permissions.....	102
4.6 File Systems and Inodes	103
4.7 ln : Creating Hard Links.....	105
4.7.1 <i>Where to Use Hard Links</i>	107
4.8 ln Again: Creating Symbolic Links	107
4.9 File Ownership.....	109
4.9.1 chown : <i>Changing File Ownership</i>	110
4.9.2 chgrp : <i>Changing Group Owner</i>	111
4.9.3 <i>How to Handle Intruders</i>	112
4.10 Modification and Access Times	112

4.11 find : Locating Files.....	113
4.11.1 <i>Selection Criteria</i>	114
4.11.2 <i>The find Operators (!, -o, and -a)</i>	116
4.11.3 <i>Operators of the Action Component</i>	117
Summary.....	118
Self-Test.....	118
Exercises.....	119
Chapter 5 The vi/vim Editor	122
5.1 vi Basics.....	123
5.1.1 <i>The File .exerc</i>	124
5.2 A Few Tips First.....	125
5.3 Input Mode—Entering and Replacing Text.....	126
5.3.1 <i>Inserting and Appending Text (i and a)</i>	127
5.3.2 <i>Inserting and Appending Text at Line Extremes (I and A)</i>	127
5.3.3 <i>Opening a New Line (o and O)</i>	128
5.3.4 <i>Replacing Text (r, s, R, and S)</i>	129
5.3.5 <i>Entering Control Characters ([Ctrl-v])</i>	130
5.4 Saving Text and Quitting—The ex Mode.....	131
5.4.1 <i>Saving Your Work (:w)</i>	132
5.4.2 <i>Saving and Quitting (:x and :wq)</i>	132
5.4.3 <i>Aborting Editing (:q)</i>	132
5.4.4 <i>Writing Selected Lines</i>	133
5.4.5 <i>Escape to the Shell (:sh and [Ctrl-z])</i>	134
5.5 Recovering from a Crash (:recover and -r).....	134
5.6 Navigation.....	134
5.6.1 <i>Relative Movement in the Four Directions (h, j, k, and l)</i>	135
5.6.2 <i>Scrolling ([Ctrl-f], [Ctrl-b], [Ctrl-d] and [Ctrl-u])</i>	136
5.6.3 <i>Word Navigation (b, e, and w)</i>	136
5.6.4 <i>Moving to Line Extremes (0, , and \$)</i>	137
5.6.5 <i>Absolute Movement (G)</i>	137
5.7 Editing Text without Operators.....	138
5.7.1 <i>Deleting Text (x, X, and dd)</i>	138
5.7.2 <i>Moving Text (p)</i>	139
5.7.3 <i>Joining Lines (J)</i>	139
5.7.4 <i>Changing Case (~)</i>	140

5.8 Correcting a C Program.....	140
5.9 Editing Text with Operators	141
5.9.1 Deleting and Moving Text (d , p , and P).....	142
5.9.2 Yanking Text (y , p and P).....	143
5.9.3 Changing Text (c).....	144
5.10 Copying and Moving Text from One File to Another.....	144
5.11 Undoing Last Editing Instructions (u and U).....	145
5.12 Searching for a Pattern (/ and ?).....	146
5.12.1 Repeating the Last Pattern Search (n and N).....	146
5.13 Repeating the Last Command (.)	147
5.14 Substitution—Search and Replace (:s).....	148
5.15 set : Customizing vi	149
Going Further	151
5.16 map : Mapping Keys of Keyboard.....	151
5.17 abbr : Abbreviating Text Input	152
Summary.....	152
Self-Test.....	153
Exercises	154
Chapter 6 The Shell	156
6.1 The Shell as Command Processor	157
6.2 Shell Offerings	158
6.3 Pattern Matching—The Wild Cards.....	158
6.3.1 The * and ?	158
6.3.2 The Character Class.....	160
6.3.3 Matching the Dot.....	162
6.3.4 Rounding Up.....	162
6.4 Escaping and Quoting	163
6.4.1 Escaping	163
6.4.2 Quoting	164
6.4.3 Escaping in echo	165
6.5 Redirection	165
6.5.1 Standard Input.....	166
6.5.2 Standard Output	168
6.5.3 The File Descriptor	169
6.5.4 Standard Error.....	170
6.5.5 Filters—Using Both Standard Input and Standard Output.....	171

6.6 Collective Manipulation	172
6.6.1 <i>Replicating Descriptors</i>	172
6.6.2 <i>Command Grouping</i>	172
6.7 /dev/null and /dev/tty: Two Special Files	173
6.8 Pipes.....	174
6.8.1 <i>When a Command Needs to Be Ignorant of Its Source</i>	175
6.9 tee : Creating a Tee	176
6.10 Command Substitution	177
6.11 Shell Variables.....	178
6.11.1 <i>Effects of Quoting and Escaping</i>	180
6.11.2 <i>Where to Use Shell Variables</i>	180
6.12 Shell Scripts	181
6.13 The Shell's Treatment of the Command Line.....	182
Going Further.....	183
6.14 More Wild Cards.....	183
6.15 xargs : Building a Dynamic Command Line	183
Summary.....	184
Self-Test.....	185
Exercises	186
Chapter 7 The Process	188
7.1 Process Basics	188
7.2 The Shell and init	189
7.3 ps : Displaying Process Attributes.....	190
7.5 The Process Creation Mechanism.....	194
7.6 Inherited Process Attributes	195
7.6.1 <i>When Variables Are Inherited and When They Are Not</i>	196
7.7 When You Can't Use a Separate Process.....	197
7.8 Process States and Zombies	198
7.8.1 ps -l : <i>Detailed Process Listing</i>	198
7.9 Signal Handling	199
7.10 Running Jobs in Background.....	201
7.10.1 & : <i>No Logging Out</i>	201
7.10.2 nohup : <i>Log Out Safely</i>	202
7.11 Job Control.....	202
7.11.1 <i>Handling Standard Input and Standard Output</i>	205
7.12 at and batch : Execute Later	206
7.12.1 at : <i>One-Time Execution</i>	206

7.12.2 batch : Execute in Batch Queue	206
7.12.3 Restricting Use of at and batch	207
7.13 cron and crontab : Running Jobs Periodically.....	207
7.13.1 Controlling Access to cron	210
Summary.....	210
Self-Test.....	210
Exercises.....	211
Chapter 8 The Shell—Customizing the Environment	213
8.1 The Shells	213
8.1.1 Setting Your Shell.....	214
8.2 Environment Variables	215
8.2.1 export : Creating Environment Variables.....	216
8.3 The Common Environment Variables.....	216
8.4 Aliases	220
8.5 Command History	222
8.5.1 Accessing Previous Commands.....	223
8.5.2 Substitution in Previous Commands	223
8.5.3 Using Arguments to Previous Command (\$_).....	224
8.5.4 The History Variables	224
8.6 In-line Command Editing.....	225
8.7 Tilde Substitution.....	226
8.8 Using set Options	227
8.9 The Initialization Scripts	229
8.9.1 The Login Script.....	229
8.9.2 The rc File.....	230
8.10 The C Shell	231
8.10.1 Local and Environment Variables	231
8.10.2 Aliases	233
8.10.3 History.....	234
8.10.4 Other Shell Variables.....	234
8.10.5 The Initialization Scripts.....	235
Going Further	235
8.11 Directory Stack Manipulation.....	235
Summary.....	237
Self-Test.....	238
Exercises.....	239

Chapter 9	Simple Filters	241
9.1	pr : Paginating Files	242
9.1.1	pr Options	242
9.2	Comparing Files.....	243
9.3	cmp : Byte-by-Byte Comparison	244
9.4	comm : What Is Common?.....	245
9.5	diff : Converting One File to Another	246
9.6	head : Displaying the Beginning of a File.....	247
9.7	tail : Displaying the End of a File.....	248
9.7.1	tail Options.....	248
9.8	cut : Slitting a File Vertically	249
9.9	paste : Pasting Files	250
9.10	sort : Ordering a File.....	251
9.10.1	sort Options.....	252
9.11	uniq : Locate Repeated and Nonrepeated Lines	255
9.11.1	uniq Options.....	255
9.12	tr : Translating Characters	257
9.12.1	tr Options	258
9.13	Applying the Filters.....	259
9.13.1	<i>Listing the Five Largest Files in the Current Directory</i>	259
9.13.2	<i>Creating a Word-Usage List</i>	260
9.13.3	<i>Finding Out the Difference between Two Password Files</i>	261
	Summary.....	262
	Self-Test.....	263
	Exercises	263
Chapter 10	Filters Using Regular Expressions—grep and sed	265
10.1	The Sample Database	266
10.2	grep : Searching for a Pattern	266
10.2.1	<i>Quoting in grep</i>	267
10.2.2	<i>When grep Fails</i>	268
10.3	grep Options	268
10.4	Basic Regular Expressions (BRE)—An Introduction.....	271
10.4.1	<i>The Character Class</i>	271
10.4.2	<i>The *</i>	273
10.4.3	<i>The Dot</i>	274

10.4.4 Specifying Pattern Locations (^ and \$).....	274
10.4.5 When Metacharacters Lose Their Meaning.....	275
10.5 Extended Regular Expressions (ERE) and egrep	276
10.5.1 The + and ?.....	276
10.5.2 Matching Multiple Patterns (, (and)).....	277
10.6 sed :The Stream Editor.....	277
10.7 Line Addressing	279
10.8 sed Options.....	280
10.9 Context Addressing	281
10.10 Writing Selected Lines to a File (w)	282
10.11 Text Editing	283
10.11.1 Inserting and Changing Lines (i , a , c).....	283
10.11.2 Deleting Lines (d).....	284
10.12 Substitution (s).....	284
10.12.1 Using Regular Expressions in Substitution	285
10.12.2 The Remembered Pattern (//)	286
10.13 Basic Regular Expressions Revisited	287
10.13.1 The Repeated Pattern (&)	287
10.13.2 Interval Regular Expression (IRE)	288
10.13.3 The Tagged Regular Expression (TRE)	288
10.14 Applying the IRE and TRE.....	289
10.14.1 Handling a Telephone Directory.....	289
10.14.2 Replacing an Obsolescent Function with a POSIX-Compliant One.....	290
10.14.3 Converting Pathnames in URLs	291
Summary.....	292
Self-Test.....	292
Exercises	293
Chapter 11 Networking Tools	296
11.1 TCP/IP Basics	297
11.1.1 Hostnames and IP Addresses	297
11.2 Resolving Hostnames and IP Addresses	298
11.2.1 /etc/hosts: The Hosts File.....	298
11.2.2 The Domain Name System (DNS).....	299

11.3 Client-Server: How Networked Applications Communicate.....	301
11.4 ping : Checking the Network.....	303
11.5 telnet : Remote Login.....	303
11.6 ftp : File Transfer Protocol	304
11.6.1 <i>Basic File and Directory Handling</i>	305
11.6.2 <i>Transferring Files</i>	305
11.6.3 <i>Anonymous FTP</i>	306
11.7 Cryptography Basics	307
11.7.1 <i>Symmetric Key Algorithms</i>	308
11.7.2 <i>Asymmetric Key Algorithms</i>	308
11.8 SSH: The Secure Shell	309
11.8.1 <i>Host Authentication</i>	309
11.8.2 <i>The rhosts/shosts Authentication Scheme</i>	310
11.8.3 <i>User Authentication with Symmetric Algorithms</i>	310
11.8.4 <i>Using the SSH Agent for Noninteractive Logins</i>	312
11.9 The SSH Tools.....	313
11.9.1 <i>Remote Login and Command Execution (ssh and slogin)</i>	314
11.9.2 <i>File Transfer with sftp and scp</i>	314
11.10 Internet Mail.....	315
11.10.1 <i>~/.signature and ~/.forward: Two Important Files</i>	317
11.11 MIME: Handling Binary Attachments in Mail.....	317
11.12 Using X Window on a TCP/IP Network	318
11.12.1 <i>The Display</i>	319
11.12.2 <i>Using the DISPLAY variable</i>	319
11.12.3 <i>Using the -display Option</i>	320
11.13 HTTP and the World Wide Web	320
11.13.1 <i>The Uniform Resource Locator (URL)</i>	321
11.13.2 <i>HTTP: The Protocol of the Web</i>	322
11.13.3 <i>Running External Programs</i>	322
11.13.4 <i>HTML: The Language of Web Pages</i>	323
11.13.5 <i>The Web Browser</i>	323
11.14 Multimedia on the Web: MIME Revisited	324
Summary.....	325
Self-Test.....	326
Exercises	327

PART II	UNIX for the Programmer	329
Chapter 12	Filtering and Programming with awk	331
	12.1 awk Preliminaries.....	332
	12.2 Using print and printf	334
	12.2.1 <i>Redirecting Standard Output</i>	335
	12.3 Number Processing	335
	12.4 Variables and Expressions.....	337
	12.5 The Comparison and Logical Operators.....	338
	12.5.1 <i>String and Numeric Comparison</i>	338
	12.5.2 <i>~ and !~: The Regular Expression Operators</i>	340
	12.5.3 <i>The Logical Operators</i>	340
	12.6 The -f Option: Storing awk Programs in a File.....	342
	12.7 The BEGIN and END Sections	342
	12.8 Positional Parameters.....	343
	12.9 Arrays	344
	12.9.1 <i>Associative (Hash) Arrays</i>	345
	12.9.2 <i>ENVIRON[]: The Environment Array</i>	345
	12.10 Built-In Variables	346
	12.10.1 <i>Applying the Built-in Variables</i>	347
	12.11 Functions.....	348
	12.12 Control Flow—The if Statement.....	350
	12.13 Looping with for	351
	12.13.1 <i>Using for with an Associative Array</i>	352
	12.14 Looping with while	353
	12.15 Conclusion	354
	Summary.....	355
	Self-Test.....	355
	Exercises	356
Chapter 13	Shell Programming	359
	13.1 Shell Scripts.....	360
	13.1.1 script.sh: A Simple Script	360
	13.1.2 <i>The She-Bang Line</i>	361
	13.2 read : Making Scripts Interactive.....	361
	13.3 Using Command-Line Arguments.....	362
	13.4 exit and \$? : Exit Status of a Command	364

13.5 The Logical Operators <code>&&</code> and <code> </code> —Conditional Execution	365
13.6 The <code>if</code> Conditional	366
13.7 Using <code>test</code> and <code>[]</code> to Evaluate Expressions	367
13.7.1 Numeric Comparison	367
13.7.2 <code>[]</code> : Shorthand for <code>test</code>	369
13.7.3 String Comparison	369
13.7.4 File Attribute Tests	370
13.7.5 Using Compound Conditions	371
13.8 Two Important Programming Idioms	372
13.8.1 Running a Task Both Interactively and Noninteractively	372
13.8.2 Calling a Script by Different Names (<code>\$0</code>)	373
13.9 The <code>case</code> Conditional	374
13.9.1 Using Wild Cards and the <code> </code>	375
13.10 <code>expr</code> , <code>bc</code> and <code>basename</code> : Computation and String Handling	376
13.10.1 Computation with <code>expr</code>	376
13.10.2 Floating-Point Computation with <code>bc</code>	377
13.10.3 String Handling with <code>expr</code>	378
13.10.4 <code>basename</code> : Changing Filename Extensions	379
13.11 Sample Program 1: Automatically Selects Last C Program	379
13.12 <code>for</code> : Looping with a List	380
13.12.1 Sources of the List	381
13.12.2 Important Applications Using <code>for</code>	382
13.13 <code>while</code> : Looping	382
13.13.1 Handling Redirection in a Loop	383
13.13.2 Using <code>while</code> to Wait for a File	384
13.13.3 Finding Out Users' Space Consumption	385
13.13.4 <code>break</code> and <code>continue</code>	386
13.14 Sample Script 2: Providing Numeric Extensions to Backup Files	387
13.15 Manipulating Positional Parameters with <code>set</code> and <code>shift</code>	389
13.15.1 Killing a Process by Name	390
13.15.2 <code>shift</code> : Shifting Positional Parameters Left	391
13.15.3 The IFS Variable: <code>set</code> 's Default Delimiter	392
13.16 Sample Script 3: A Table of Contents for Downloaded Files	392
Going Further	394
13.17 The Here Document (<code><<</code>)	394
13.18 Shell Functions	395
13.19 <code>trap</code> : How a Script Handles Signals	397

13.20 eval : Evaluating Twice	398
13.21 The exec Statement	399
Summary	399
Self-Test	400
Exercises	401
Chapter 14 per1—The Master Manipulator	404
14.1 per1 Preliminaries	405
14.2 Variables and Constants	406
14.2.1 <i>Using a Pragma</i>	407
14.3 Operators	408
14.3.1 <i>The Comparison and Logical Operators</i>	408
14.3.2 <i>The Concatenation and Repetition Operators (. and x)</i>	409
14.4 The Standard Conditionals and Loops	410
14.4.1 <i>The if Conditional</i>	410
14.4.2 <i>The while, do-while, and for Loops</i>	410
14.5 Reading Files from Command-Line Arguments	412
14.5.1 <i>Reading Files with One-Liners</i>	412
14.5.2 <i>Reading Files in a Script</i>	413
14.6 The Current Line Number (\$.) and the Range Operator (..)	414
14.7 \$_: The Default Variable	414
14.8 String-Handling Functions	415
14.9 Lists and Arrays	416
14.9.1 <i>Array-Handling Functions</i>	419
14.10 foreach : Looping Through a List	420
14.11 Two Important List Functions	421
14.11.1 split : <i>Splitting into a List or Array</i>	421
14.11.2 join : <i>Joining a List</i>	422
14.12 dec2bin.pl : Converting a Decimal Number to Binary	423
14.13 Associative Arrays	424
14.13.1 <i>Counting Number of Occurrences</i>	425
14.14 Using Regular Expressions	426
14.14.1 <i>Identifying Whitespace, Digits, and Words</i>	426
14.14.2 <i>The IRE and TRE Features</i>	427
14.15 Substitution with the s and tr Functions	428
14.15.1 <i>Editing Files In-Place</i>	429
14.16 File Handling	430

14.17 File Tests	431
14.18 Subroutines	432
Going Further	434
14.19 CGI Programming with perl —An Overview	434
14.19.1 <i>The Query String</i>	434
14.19.2 <i>GET and POST: The Request Method</i>	434
Summary	435
Self-Test	436
Exercises	437
Chapter 15 Introducing C	440
15.1 The C Language	440
15.2 first_prog.c : Understanding Our First C Program	441
15.2.1 <i>The Preprocessor Section</i>	443
15.2.2 <i>The Body</i>	443
15.2.3 main : <i>A Unique Function</i>	444
15.3 printf and scanf : Two Important Functions	445
15.3.1 printf : <i>Printing to the Terminal</i>	445
15.3.2 scanf : <i>Input from the Keyboard</i>	446
15.4 Variables and Constants	446
15.5 The Fundamental Data Types	447
15.5.1 <i>The Integer Types</i>	448
15.5.2 <i>The Floating-Point Types</i>	449
15.5.3 <i>The Character Type</i>	449
15.6 sizeof.c : Determining the Size of the Fundamental Data Types	450
15.7 Symbolic Constants: Constants with Names	451
15.8 Arrays	452
15.9 arrays.c : Printing Array Elements	452
15.10 Structures	454
15.11 Operators and Expressions	455
15.11.1 <i>The Bitwise Operators</i>	456
15.11.2 <i>Automatic Conversion</i>	456
15.11.3 <i>Explicit Conversion</i>	457
15.12 type_conversion.c : Demonstrates Type Conversion	458
15.13 Order of Evaluation	460
15.13.1 <i>Operator Precedence</i>	460
15.13.2 <i>Operator Associativity</i>	461

15.14 Control Flow Revisited	462
15.14.1 Decision Making with switch	462
15.14.2 Repetition with do-while	463
15.14.3 break and continue	464
15.15 Functions.....	465
15.16 first_func.c : Two Arguments and Return Value.....	466
15.17 Function Arguments, Parameters, and Local Variables.....	467
15.17.1 Passing by Value.....	468
15.17.2 swap_failure.c : Visibility of Parameters and Local Variables	469
15.17.3 Using Arrays as Function Arguments	470
15.17.4 Using Structures as Function Arguments.....	471
15.18 Pointers	472
15.19 pointers.c : Basic Features of a Pointer	474
15.20 Pointer Attributes.....	475
15.20.1 Pointer Arithmetic.....	475
15.20.2 Other Attributes.....	476
15.21 Pointers and Functions.....	477
15.21.1 Solving the Swapping Problem.....	477
15.21.2 Using Pointers to Return Multiple Values.....	478
15.22 Pointers and Other Data Types	478
15.22.1 Pointers and Arrays.....	478
15.22.2 Pointers and Strings.....	479
15.22.3 Array of Strings.....	480
15.22.4 Pointers and Structures	480
Summary.....	481
Self-Test.....	482
Exercises	483
Chapter 16 Program Development Tools	485
16.1 Handling Multisource C Applications	485
16.1.1 A Multisource Application	486
16.1.2 Compiling and Linking the Application	489
16.1.3 Why We Need the .o Files	490
16.2 make : Keeping Programs Up to Date	490
16.2.1 Removing Redundancies.....	493
16.2.2 Other Functions of make : Cleaning Up and Backup.....	493
16.2.3 Macros	494

16.3	ar : Building a Library (Archive)	495
	16.3.1 <i>Using the Library</i>	496
	16.3.2 <i>Maintaining an Archive with make</i>	496
16.4	Static and Shared Libraries	497
16.5	Version Control with SCCS, RCS, and CVS	498
16.6	An SCCS Session	499
	16.6.1 admin : <i>Creating an SCCS File</i>	500
	16.6.2 get : <i>Checking Out</i>	501
	16.6.3 delta : <i>Checking In</i>	502
	16.6.4 unget : <i>When You Change Your Mind</i>	504
16.7	Activity and History Information	504
	16.7.1 sact : <i>Displaying Activity Status</i>	504
	16.7.2 prs : <i>Displaying the SCCS History</i>	505
16.8	Continuing Editing with SCCS	506
	16.8.1 get -r : <i>Changing the Default Numbering Sequence</i>	506
	16.8.2 <i>Working with Multiple Versions</i>	507
	16.8.3 rmde1 and comb : <i>Removing and Combining Versions</i>	509
	16.8.4 <i>Using Identification Keywords</i>	509
16.9	Controlling Access to SCCS	510
	16.9.1 <i>Controlling User Access</i>	510
	16.9.2 <i>Controlling Releases</i>	511
16.10	The Revision Control System (RCS)	511
	16.10.1 <i>Creating an RCS File with ci</i>	511
	16.10.2 co and ci : <i>Checking Out and In</i>	512
	16.10.3 <i>Specifying Revisions</i>	513
	16.10.4 rlog and rcs : <i>Other RCS Functions</i>	514
16.11	The Concurrent Version System (CVS)	517
	16.11.1 <i>Setting Up the Repository</i>	518
	16.11.2 <i>Importing Files</i>	518
	16.11.3 <i>Checking Out</i>	519
	16.11.4 <i>Editing and Checking In</i>	519
	16.11.5 <i>Merging and Resolving Conflicts</i>	520
	16.11.6 <i>Setting Tags and Exporting the Repository</i>	521
	16.11.7 <i>Other Features</i>	521
16.12	Debugging Programs with gdb	522
	16.12.1 <i>Starting gdb</i>	525
	16.12.2 <i>Using a Breakpoint</i>	526

16.12.3 Stepping Through the Program.....	528
16.12.4 Making a Reassignment.....	528
16.12.5 Setting a Watchpoint.....	529
16.12.6 Other Features of gdb	531
Summary.....	531
Self-Test.....	532
Exercises.....	533
Chapter 17 Systems Programming I—Files	535
17.1 System Call Basics.....	536
17.1.1 Anatomy of a System Call.....	536
17.1.2 System Calls vs. Library Functions.....	537
17.2 errno and perror : Handling Errors.....	537
17.3 open : Opening and Creating a File.....	539
17.4 close : Closing a File.....	541
17.5 read : Reading a File.....	542
17.6 write : Writing a File.....	543
17.7 ccp.c : Copying a File.....	543
17.8 lseek : Positioning the Offset Pointer.....	545
17.8.1 reverse_read.c : Reading a File in Reverse.....	547
17.9 truncate and ftruncate : Truncating a File.....	548
17.10 umask : Modifying File Permissions During Creation.....	549
17.11 Directory Navigation.....	550
17.12 Reading a Directory.....	552
17.12.1 lls.c : Listing Filenames in a Directory.....	553
17.13 Modifying Entries in Directory.....	554
17.13.1 mkdir and rmdir : Creating and Removing Directories.....	554
17.13.2 link and symlink : Creating a Hard and Symbolic Link.....	554
17.13.3 unlink : Removing a Link.....	555
17.13.4 rename : Renaming a File, Directory, or Symbolic Link.....	555
17.14 Reading the Inode: struct stat and stat	556
17.14.1 attributes.c : Displaying Some File Attributes.....	557
17.14.2 S_IFMT : Manipulating the st_mode Member.....	558
17.14.3 Using the S_ISxxx Macros to Determine File Type.....	559
17.14.4 Accessing the Permission Bits.....	559
17.14.5 lsdir.c : Listing Only Directories.....	560

17.15 access : Checking the Real User's Permissions.....	560
17.16 Modifying File Attributes.....	563
17.16.1 chmod and fchmod : Changing File Permissions.....	563
17.16.2 chown : Changing Ownership	564
17.16.3 utime : Changing the Time Stamps.....	564
17.16.4 atime and ctime : Creating a File with Identical Time Stamps.....	565
Summary.....	566
Self-Test.....	567
Exercises.....	568
Chapter 18 Systems Programming II—Process Control	570
18.1 The Process Revisited	571
18.1.1 The Virtual Address Space	571
18.1.2 The Process Table	573
18.2 The Process Environment.....	573
18.2.1 process.c : Looking Up Some Process Credentials	574
18.3 fork : Replicating the Current Process	575
18.3.1 fork.c : A Simple Child Creation Program.....	575
18.4 exec : The Final Step in Process Creation	577
18.4.1 exec1 and execv : The Key Members	578
18.4.2 The Other exec Members.....	579
18.5 Gathering the Exit Status	580
18.5.1 wait : When the Parent Waits	580
18.5.2 waitpid : A More Powerful Waiting Mechanism.....	581
18.6 fork_exec_wait.c : Using All Three Calls	582
18.7 File Sharing.....	584
18.7.1 The File Descriptor Table.....	584
18.7.2 The File Table	585
18.7.3 The Vnode Table.....	585
18.7.4 When the Linkage Changes.....	585
18.8 File Descriptor Manipulation	587
18.8.1 dup and dup2 : Duplicating a File Descriptor	587
18.8.2 redirection.c : Redirection at Last.....	588
18.8.3 fcntl : Recommended over dup and dup2	590
18.9 Signal Handling	590
18.9.1 The System Calls.....	592

18.10 sigaction : Installing a Signal Handler.....	592
18.10.1 signal.c : Catching the SIGALRM Signal	594
18.10.2 Catching Terminal-Generated Signals.....	595
18.11 killprocess.c : Using fork-exec-wait and SIGCHLD	597
18.12 IPC with Unnamed Pipes	599
18.12.1 Using pipe with fork	600
18.12.2 pipe2.c : Running UNIX Commands in a Pipe.....	600
Summary.....	602
Self-Test.....	603
Exercises	604

PART III	System Administration	607
Chapter 19	System Administration	609
	19.1 root: The System Administrator's Login.....	610
	19.1.1 su : Acquiring Superuser Status.....	610
	19.2 The Administrator's Privileges	611
	19.3 User Management.....	612
	19.3.1 Understanding /etc/group	612
	19.3.2 Understanding /etc/passwd	613
	19.3.3 Adding and Modifying a User Profile	614
	19.4 Maintaining Security.....	615
	19.4.1 Restricted Shell	615
	19.4.2 Set-User-Id (SUID): Power for a Moment	616
	19.4.3 The Sticky Bit.....	617
	19.5 Booting and Shutdown.....	618
	19.5.1 Booting.....	618
	19.5.2 Shutdown	619
	19.6 How init Controls the System	619
	19.6.1 How init Creates the Shell	620
	19.6.2 The rc Scripts.....	621
	19.7 Device Files.....	622
	19.7.1 Block and Character Devices.....	623
	19.7.2 Major and Minor Numbers.....	623
	19.8 File Systems.....	624
	19.8.1 File System Components.....	624
	19.8.2 The Standard File Systems and Their Types.....	625

19.9 Mounting and Unmounting File Systems	626
19.9.1 mount : <i>Mounting File Systems</i>	626
19.9.2 umount : <i>Unmounting File Systems</i>	627
19.10 fsck : File System Checking	627
19.11 Managing Disk Space	628
19.11.1 df : <i>Reporting Free Space</i>	629
19.11.2 du : <i>Disk Usage</i>	629
19.11.3 find <i>Revisited: The Administrator's Tool</i>	630
19.12 Handling Floppy Diskettes	630
19.12.1 format and fdformat : <i>Formatting Diskettes</i>	631
19.12.2 dd : <i>Copying Diskettes</i>	631
19.12.3 <i>Handling DOS Diskettes</i>	631
19.13 tar : Backing Up Files	633
19.13.1 <i>Backing Up Files (-c)</i>	633
19.13.2 <i>Restoring Files (-x)</i>	634
19.13.3 <i>Displaying the Archive (-t)</i>	635
19.13.4 <i>Other Options</i>	635
19.14 Installing Programs with rpm	636
19.14.1 <i>Installing and Upgrading Packages</i>	636
19.14.2 <i>Removing Packages</i>	637
19.14.3 <i>Querying Packages</i>	638
Summary.....	639
Self-Test.....	640
Exercises	641
Appendix A The C Shell—Programming Constructs	643
Appendix B The Korn and Bash Shells—Exclusive Programming Constructs	650
Appendix C The GNU emacs Editor	657
Appendix D vi/vim Command Reference	686
Appendix E The Regular Expression Superset	693
Appendix F The HOWTO	696
Appendix G The ASCII Character Set	701
Appendix H Glossary	705
Appendix I Solutions to Self-Test Questions	728
