Table of Contents

Preface x

Chapter 1
Methods, Standards, and Work Design: Introduction 1

1.1 Productivity Importance 1
1.2 Methods and Standards Scope 4
1.3 Historical Developments 9
Summary 16
Questions 18
References 18
Websites 19

Chapter 2
Problem-Solving Tools 21

2.1 Exploratory Tools 22
2.2 Recording and Analysis Tools 29
2.3 Quantitative Tools, Worker and Machine Relationships 41
Summary 63
Questions 64
Problems 65
References 71
Selected Software 71

Chapter 3
Operation Analysis 73

3.1 Operation Purpose 76
3.2 Part Design 77
3.3 Tolerances and Specifications 80
3.4 Material 83
3.5 Manufacture Sequence and Process 88
3.6 Setup and Tools 95
3.7 Material Handling 100
3.8 Plant Layout 110
3.9 Work Design 118
Summary 120
Questions 120
Problems 123
References 126
Selected Software 126
Selected Videotapes/DVDs 127

Chapter 4
Manual Work Design 129

4.1 The Musculoskeletal System 130
4.2 Principles of Work Design: Human Capabilities and Motion Economy 132
4.3 Motion Study 149
4.4 Manual Work and Design Guidelines 154
Summary 175
Questions 175
Problems 176
References 178
Selected Software 180
Websites 180

Chapter 5
Workplace, Equipment, and Tool Design 181

5.1 Anthropometry and Design 181
5.2 Principles of Work Design: The Workplace 185
5.3 Principles of Work Design: Machines and Equipment 199
5.4 Cumulative Trauma Disorders 206
5.5 Principles of Work Design: Tools 212
Summary 224
Questions 226
Problems 227
References 231
Selected Software 234
Websites 234

Chapter 6
Work Environment Design 235

6.1 Illumination 235
6.2 Noise 245
6.3 Temperature 253
6.4 Ventilation 258
6.5 Vibration 261
6.6 Radiation 264
6.7 Shiftwork and Working Hours 265
Summary 272
Questions 272
Problems 274
References 276
Selected Software 277
Websites 277

Chapter 7
Design of Cognitive Work 279

7.1 Information Theory 279
7.2 Human Information Processing Model 281
7.3 Coding of Information: General Design Principles 299
7.4 Display of Visual Information: Specific Design Principles 303
7.5 Display of Auditory Information: Specific Design Principles 308
7.6 Human-Computer Interaction: Hardware Considerations 309
7.7 Human-Computer Interaction: Software Considerations 314
Summary 317
Questions 317
Problems 318
References 323
Selected Software 324
Websites 324

Chapter 8
Workplace and Systems Safety 325

8.1 Basic Philosophies of Accident Causation 326
8.2 Accident Prevention Process 333
8.3 Probability Methods 341
8.4 Reliability 343
8.5 Fault Tree Analysis 350
8.6 Safety Legislation and Workers' Compensation 357
8.7 Occupational Safety and Health Administration (OSHA) 360
8.8 Hazard Control 367
8.9 General Housekeeping 369
Summary 373
Questions 373
Problems 374
References 377
Websites 378

Chapter 9
Proposed Method Implementation 379

9.1 Decision-Making Tools 380
9.2 Installation 394

9.3 Job Evaluation 397
9.4 Americans with Disabilities Act 406
9.5 Follow-Up 407
9.6 Successful Methods Implementations 407
Summary 409
Questions 410
Problems 410
References 412
Selected Software 413

Chapter 10
Time Study 415

10.1 A Fair Day's Work 416
10.2 Time Study Requirements 416
10.3 Time Study Equipment 418
10.4 Time Study Elements 423
10.5 Start of Study 426
10.6 Execution of Study 433
10.7 Calculating the Study 435
10.8 The Standard Time 437
Summary 443
Questions 444
Problems 445
References 447
Selected Software 448

Chapter 11
Performance Rating and Allowances 449

11.1 Standard Performance 450
11.2 Sound Rating Characteristics 451
11.3 Rating Methods 452
11.4 Rating Application and Analysis 457
11.5 Rating Training 460
11.6 Allowances 462
11.7 Constant Allowances 464
11.8 Variable Fatigue Allowances 465
11.9 Special Allowances 476
11.10 Applying Allowances 479
Summary 480
Questions 480
Problems 482
References 483
Selected Software 484

Chapter 12
Standard Data and Formulas 485

12.1 Standard Time Data Development 486
12.2 Formula Construction from Empirical Data 489
12.3 Analytical Formulas 495
12.4 Using Standard Data 500
Summary 501
Questions 502
Problems 502
References 504
Selected Software 505

Chapter 13
Predetermined Time Systems 507

13.1 Methods-Time Measurement 508
13.2 Maynard Operation Sequence Technique (MOST) 532
13.3 Predetermined Time Application 542
Summary 547
Questions 548
Problems 548
References 552
Selected Software 553

Chapter 14
Work Sampling 555

14.1 The Theory of Work Sampling 556
14.2 Selling Work Sampling 561
14.3 Planning the Work Sampling Study 562

14.4 Recording Observations 570
14.5 Machine and Operator Utilization 571
14.6 Determining Allowances 574
14.7 Determining Standard Time 574
14.8 Self-Observation 577
14.9 Work Sampling Software 579
Summary 579
Questions 579
Problems 580
References 583
Selected Software 583

Chapter 15
Indirect and Expense Labor Standards 585

15.1 Indirect and Expense Labor Standards 586
15.2 Standard Indirect and Expense Labor Data 600
15.3 Professional Performance Standards 602
Summary 606
Questions 608
Problems 608
References 609

Chapter 16
Standards Follow-Up and Uses 611

16.1 Maintaining Standard Times 612
16.2 Using Standards 614
16.3 Costing 622
16.4 Standards in Service Work 629
Summary 634
Questions 634
Problems 635
References 636

Chapter 17
Wage Payment 637

17.1 Day Work Plans 638
17.2 Flexible Compensation Plans 638
17.3 Implementing Wage Incentives 650
17.4 Nonfinancial Performance Motivation Plans 655
Summary 656
Questions 657
Problems 658
References 660
Selected Software 660

Chapter 18
Training and Other Management Practices 661

18.1 Operator Training 662
18.2 The Learning Curve 663
18.3 Employees and Motivation 668
18.4 Human Interactions 673
18.5 Communications 677
18.6 Modern Management Practices 682
Summary 687
Questions 687
Problems 688
References 689
Selected Software 690
Websites 690

Appendix 1: Glossary 691

Appendix 2: Helpful Formulas 711

Appendix 3: Special Tables 713

Index 727
