

CONTENTS

PREFACE xxv

PART I THE JAVA LANGUAGE 1

CHAPTER 1	Java Programming Fundamentals	3
	COMPUTING BASICS	4
	<i>The Hardware Components of a Computer</i>	4
	<i>Bits, Bytes, and Binary</i>	5
	<i>The Operating System</i>	6
	THE PROGRAM	7
	PROGRAMMING LANGUAGES	8
	THE JAVA LANGUAGE	9
	<i>The Origins of Java</i>	9
	<i>Java's Contribution to the Internet</i>	11
	<i>Java Applets</i>	11
	<i>Security</i>	11
	<i>Portability</i>	12
	<i>Java's Solution: The Bytecode</i>	12
	<i>The Evolution of Java</i>	13
	THE KEY ATTRIBUTES OF OBJECT-ORIENTED PROGRAMMING	14
	<i>Encapsulation</i>	15
	<i>Polymorphism</i>	16
	<i>Inheritance</i>	16
	THE JAVA DEVELOPMENT KIT	17
	A FIRST SIMPLE PROGRAM	18
	<i>Entering the Program</i>	18
	<i>Compiling the Program</i>	19
	<i>Running the Program</i>	19
	<i>The First Sample Program Line by Line</i>	19
	HANDLING SYNTAX ERRORS	22
	A SECOND SIMPLE PROGRAM	23
	ANOTHER DATA TYPE	25

	TWO CONTROL STATEMENTS	28
	<i>The if Statement</i>	28
	<i>The for Loop</i>	30
	CREATE BLOCKS OF CODE	32
	SEMICOLONS AND POSITIONING	33
	INDENTATION PRACTICES	34
	INDENTATION PRACTICES	34
	THE JAVA KEYWORDS	36
	IDENTIFIERS IN JAVA	37
	THE JAVA CLASS LIBRARIES	38
	EXERCISES	39
CHAPTER 2	Introducing Data Types and Operators	43
	WHY DATA TYPES ARE IMPORTANT	43
	JAVA'S PRIMITIVE TYPES	44
	<i>Integers</i>	44
	<i>Floating-Point Types</i>	46
	<i>Characters</i>	47
	<i>The Boolean Type</i>	48
	LITERALS	50
	<i>Hexadecimal, Octal, and Binary Literals</i>	51
	<i>Character Escape Sequences</i>	52
	<i>String Literals</i>	52
	A CLOSER LOOK AT VARIABLES	53
	<i>Initializing a Variable</i>	54
	<i>Dynamic Initialization</i>	54
	THE SCOPE AND LIFETIME OF VARIABLES	55
	OPERATORS	58
	ARITHMETIC OPERATORS	58
	<i>Increment and Decrement</i>	59
	RELATIONAL AND LOGICAL OPERATORS	60
	SHORT-CIRCUIT LOGICAL OPERATORS	62
	THE ASSIGNMENT OPERATOR	64
	SHORTHAND ASSIGNMENTS	64
	TYPE CONVERSION IN ASSIGNMENTS	65
	USING A CAST	66
	OPERATOR PRECEDENCE	68
	EXPRESSIONS	70
	<i>Type Conversion in Expressions</i>	70
	<i>Spacing and Parentheses</i>	72
	EXERCISES	73

CHAPTER 3	Program Control Statements	77
	INPUT CHARACTERS FROM THE KEYBOARD	78
	THE if STATEMENT	79
	NESTED ifs	81
	THE if-else-if LADDER	82
	THE switch STATEMENT	83
	NESTED switch STATEMENTS	86
	THE for LOOP	90
	SOME VARIATIONS ON THE for LOOP	91
	<i>Missing Pieces</i>	92
	<i>The Infinite Loop</i>	93
	<i>Loops with No Body</i>	93
	DECLARING LOOP CONTROL VARIABLES	
	INSIDE THE for STATEMENT	94
	THE ENHANCED for LOOP	95
	THE while LOOP	95
	THE do-while LOOP	97
	USE break TO EXIT A LOOP	102
	USE break AS A FORM OF goto	104
	USE continue	108
	NESTED LOOPS	113
	EXERCISES	114
CHAPTER 4	Introducing Classes, Objects, and Methods	119
	CLASS FUNDAMENTALS	119
	<i>The General Form of a Class</i>	120
	<i>Defining a Class</i>	121
	HOW OBJECTS ARE CREATED	124
	REFERENCE VARIABLES AND ASSIGNMENT	124
	METHODS	126
	<i>Adding a Method to the Vehicle Class</i>	126
	RETURNING FROM A METHOD	128
	RETURNING A VALUE	129
	USING PARAMETERS	131
	<i>Adding a Parameterized Method to Vehicle</i>	133
	CONSTRUCTORS	141
	PARAMETERIZED CONSTRUCTORS	142
	<i>Adding a Constructor to the Vehicle Class</i>	143
	THE new OPERATOR REVISITED	145

	GARBAGE COLLECTION AND FINALIZERS	145
	<i>The finalize() Method</i>	146
	THE <code>this</code> KEYWORD	149
	EXERCISES	151
CHAPTER 5	More Data Types and Operators	155
	ARRAYS	155
	<i>One-Dimensional Arrays</i>	156
	MULTIDIMENSIONAL ARRAYS	161
	<i>Two-Dimensional Arrays</i>	161
	<i>Irregular Arrays</i>	163
	<i>Arrays of Three or More Dimensions</i>	164
	<i>Initializing Multidimensional Arrays</i>	164
	ALTERNATIVE ARRAY DECLARATION SYNTAX	166
	ASSIGNING ARRAY REFERENCES	166
	USING THE <code>length</code> MEMBER	168
	THE FOR-EACH STYLE FOR LOOP	176
	<i>Iterating Over Multidimensional Arrays</i>	179
	<i>Applying the Enhanced for</i>	180
	STRINGS	181
	<i>Constructing Strings</i>	182
	<i>Operating on Strings</i>	182
	<i>Arrays of Strings</i>	184
	<i>Strings are Immutable</i>	185
	<i>Using a String to Control a switch Statement</i>	186
	USING COMMAND-LINE ARGUMENTS	187
	THE BITWISE OPERATORS	189
	<i>The Bitwise AND, OR, XOR, and NOT Operators</i>	189
	<i>The Shift Operators</i>	194
	<i>Bitwise Shorthand Assignments</i>	196
	THE <code>?</code> OPERATOR	200
	EXERCISES	201
CHAPTER 6	A Closer Look at Methods and Classes	205
	CONTROLLING ACCESS TO CLASS MEMBERS	205
	<i>Java's Access Modifiers</i>	206
	PASS OBJECTS TO METHODS	211
	HOW ARGUMENTS ARE PASSED	212
	RETURNING OBJECTS	215
	METHOD OVERLOADING	217

	OVERLOADING CONSTRUCTORS	222
	RECURSION	228
	UNDERSTANDING <code>static</code>	232
	<i>Static Variables</i>	233
	<i>Static Methods</i>	235
	<i>Static Blocks</i>	236
	INTRODUCING NESTED AND INNER CLASSES	240
	VARIABLES: VARIABLE-LENGTH ARGUMENTS	244
	<i>Varargs Basics</i>	245
	<i>Overloading Varargs Methods</i>	247
	<i>Varargs and Ambiguity</i>	249
	EXERCISES	250
CHAPTER 7	Inheritance	257
	INHERITANCE BASICS	257
	MEMBER ACCESS AND INHERITANCE	260
	CONSTRUCTORS AND INHERITANCE	263
	USING <code>super</code> TO CALL SUPERCLASS	
	CONSTRUCTORS	265
	USING <code>super</code> TO ACCESS SUPERCLASS MEMBERS	269
	CREATING A MULTILEVEL HIERARCHY	273
	WHEN ARE CONSTRUCTORS EXECUTED?	276
	SUPERCLASS REFERENCES	
	AND SUBCLASS OBJECTS	277
	METHOD OVERRIDING	282
	OVERRIDDEN METHODS SUPPORT	
	POLYMORPHISM	285
	WHY OVERRIDDEN METHODS?	287
	<i>Applying Method Overriding to <code>TwoDShape</code></i>	287
	USING ABSTRACT CLASSES	291
	USING <code>final</code>	296
	<i>final Prevents Overriding</i>	296
	<i>final Prevents Inheritance</i>	296
	<i>Using final with Data Members</i>	297
	THE <code>Object</code> CLASS	298
	EXERCISES	299
CHAPTER 8	Interfaces	303
	INTERFACE FUNDAMENTALS	303
	CREATING AN INTERFACE	304

	IMPLEMENTING AN INTERFACE	305
	USING INTERFACE REFERENCES	309
	IMPLEMENTING MULTIPLE INTERFACES	311
	CONSTANTS IN INTERFACES	319
	INTERFACES CAN BE EXTENDED	321
	NESTED INTERFACES	322
	FINAL THOUGHTS ON INTERFACES	323
	EXERCISES	323
CHAPTER 9	Packages	327
	PACKAGE FUNDAMENTALS	327
	<i>Defining a Package</i>	328
	<i>Finding Packages and CLASSPATH</i>	329
	<i>A Short Package Example</i>	329
	PACKAGES AND MEMBER ACCESS	331
	<i>A Package Access Example</i>	332
	<i>Understanding Protected Members</i>	334
	IMPORTING PACKAGES	336
	<i>Importing Java's Standard Packages</i>	337
	STATIC IMPORT	341
	EXERCISES	344
CHAPTER 10	Exception Handling	347
	THE EXCEPTION HIERARCHY	348
	EXCEPTION HANDLING FUNDAMENTALS	348
	<i>Using try and catch</i>	349
	<i>A Simple Exception Example</i>	349
	THE CONSEQUENCES OF AN UNCAUGHT EXCEPTION	352
	EXCEPTIONS ENABLE YOU TO HANDLE ERRORS GRACEFULLY	353
	USING MULTIPLE catch CLAUSES	355
	CATCHING SUBCLASS EXCEPTIONS	356
	try BLOCKS can be NESTED	357
	THROWING AN EXCEPTION	359
	<i>Rethrowing an Exception</i>	360

A CLOSER LOOK AT throwable	361
USING finally	363
USING throws	365
JAVA'S BUILT-IN EXCEPTIONS	366
NEW EXCEPTION FEATURES ADDED BY JDK 7	369
CREATING EXCEPTION SUBCLASSES	370
EXERCISES	377
CHAPTER 11 Using I/O	383
JAVA'S I/O IS BUILT ON STREAMS	384
BYTE STREAMS AND CHARACTER STREAMS	384
THE BYTE STREAM CLASSES	384
THE CHARACTER STREAM CLASSES	385
THE PREDEFINED STREAMS	386
USING THE BYTE STREAMS	387
<i>Reading Console Input</i>	388
<i>Writing Console Output</i>	389
READING AND WRITING FILES USING	
BYTE STREAMS	390
<i>Inputting from a File</i>	391
<i>Writing to a File</i>	394
AUTOMATICALLY CLOSING A FILE	396
READING AND WRITING BINARY DATA	399
RANDOM-ACCESS FILES	404
USING JAVA'S CHARACTER-BASED STREAMS	407
<i>Console Input Using Character Streams</i>	407
<i>Console Output Using Character Streams</i>	411
FILE I/O USING CHARACTER STREAMS	412
<i>Using a FileWriter</i>	412
<i>Using a FileReader</i>	413
<i>File</i>	415
<i>Obtaining a File's Properties</i>	415
<i>Obtaining a Directory Listing</i>	417
<i>Using FilenameFilter</i>	418
<i>The listFiles() Alternative</i>	419
<i>Various File Utility Methods</i>	419
USING JAVA'S TYPE WRAPPERS TO	
CONVERT NUMERIC STRINGS	421
EXERCISES	430

CHAPTER 12	Multithreaded Programming	435
	MULTITHREADING FUNDAMENTALS	435
	THE Thread CLASS AND Runnable INTERFACE	436
	CREATING A THREAD	437
	<i>Some Simple Improvements</i>	440
	CREATING MULTIPLE THREADS	445
	DETERMINING WHEN A THREAD ENDS	447
	THREAD PRIORITIES	450
	SYNCHRONIZATION	451
	USING SYNCHRONIZED METHODS	452
	THE SYNCHRONIZED STATEMENT	455
	THREAD COMMUNICATION USING notify(),	
	wait(), AND notifyAll()	458
	<i>An Example That Uses wait() and notify()</i>	458
	SUSPENDING, RESUMING, AND	
	STOPPING THREADS	464
	EXERCISES	469
CHAPTER 13	Enumerations, Autoboxing, and Annotations	475
	ENUMERATIONS	475
	<i>Enumeration Fundamentals</i>	476
	JAVA ENUMERATIONS ARE CLASS TYPES	479
	THE values() AND valueOf() METHODS	479
	CONSTRUCTORS, METHODS, INSTANCE VARIABLES,	
	AND ENUMERATIONS	480
	<i>Two Important Restrictions</i>	482
	ENUMERATIONS INHERIT Enum	482
	AUTOBOXING	490
	<i>Type Wrappers and Boxing</i>	490
	<i>Autoboxing Fundamentals</i>	492
	<i>Autoboxing and Methods</i>	493
	<i>Autoboxing/Unboxing Occurs in Expressions</i>	494
	<i>A Word of Warning</i>	496
	ANNOTATIONS (METADATA)	497
	<i>Creating and Using an Annotation</i>	497
	<i>Built-in Annotations</i>	498
	EXERCISES	500
CHAPTER 14	Generics	505
	GENERICS FUNDAMENTALS	506
	<i>A Simple Generics Example</i>	506

	<i>Generics Work Only with Objects</i>	510
	<i>Generic Types Differ Based on Their Type Arguments</i>	510
	<i>A Generic Class with Two Type Parameters</i>	510
	<i>The General Form of a Generic Class</i>	512
	BOUNDED TYPES	513
	USING WILDCARD ARGUMENTS	516
	BOUNDED WILDCARDS	519
	GENERIC METHODS	522
	GENERIC CONSTRUCTORS	524
	GENERIC CLASS HIERARCHIES	525
	GENERIC INTERFACES	528
	RAW TYPES AND LEGACY CODE	535
	TYPE INFERENCE WITH THE DIAMOND OPERATOR	538
	ERASURE	540
	AMBIGUITY ERRORS	540
	SOME GENERIC RESTRICTIONS	541
	<i>Type Parameters Can't be Instantiated</i>	541
	<i>Restrictions on Static Members</i>	542
	<i>Generic Array Restrictions</i>	542
	<i>Generic Exception Restriction</i>	543
	EXERCISES	543
CHAPTER 15	Applets and the Remaining Java Keywords	549
	APPLET BASICS	549
	A COMPLETE APPLET SKELETON	553
	APPLET INITIALIZATION AND TERMINATION	554
	A KEY ASPECT OF AN APPLET'S ARCHITECTURE	554
	REQUESTING REPAINTING	555
	USING THE STATUS WINDOW	560
	PASSING PARAMETERS TO APPLETS	561
	THE REMAINING JAVA KEYWORDS	563
	<i>The volatile Modifier</i>	564
	<i>The transient Modifier</i>	564
	<i>instanceof</i>	564
	<i>strictfp</i>	564
	<i>assert</i>	565
	<i>Native Methods</i>	565
	EXERCISES	567
CHAPTER 16	Introduction to Object-Oriented Design	569
	ELEGANT SOFTWARE AND WHY IT MATTERS	570
	<i>Properties of Elegant Software</i>	571

ELEGANT METHODS	573
<i>Naming Conventions</i>	573
<i>Method Cohesion</i>	574
<i>Well-formed Objects</i>	576
<i>Internal Documentation</i>	577
<i>External Documentation</i>	578
ELEGANT CLASSES	581
<i>Class Cohesion and the Expert Pattern</i>	581
<i>Avoiding Duplication</i>	583
<i>Complete Interface</i>	585
<i>Design with Change in Mind</i>	586
<i>Demeter's Law</i>	589
INHERITANCE VERSUS DELEGATION	591
UML CLASS DIAGRAMS	591
<i>Code Reuse Perspective</i>	594
<i>The Is-a Relationship</i>	594
<i>Similar Behavior</i>	597
<i>Polymorphism</i>	600
<i>Costs of Inheritance</i>	600
DESIGN PATTERNS	603
<i>Adapter Pattern</i>	604
<i>Observer Pattern</i>	607
EXERCISES	612

PART II INTRODUCING GUI PROGRAMMING WITH SWING 617

CHAPTER 17	Swing Fundamentals	619
	THE ORIGINS AND DESIGN PHILOSOPHY OF SWING	620
	COMPONENTS AND CONTAINERS	622
	<i>Components</i>	622
	<i>Containers</i>	623
	<i>The Top-Level Container Panes</i>	623
	LAYOUT MANAGERS	624
	A FIRST SIMPLE SWING PROGRAM	625
	<i>The First Swing Example Line by Line</i>	626
	EVENT HANDLING	631
	<i>Events</i>	631
	<i>Event Sources</i>	631
	<i>Event Listeners</i>	632
	<i>Event Classes and Listener Interfaces</i>	632
	<i>Adapter Classes</i>	632

	USING A PUSH BUTTON	635
	INTRODUCING JTextField	643
	USE ANONYMOUS INNER CLASSES TO HANDLE EVENTS	655
	EXERCISES	656
CHAPTER 18	Exploring Swing Controls	659
	JLabel AND ImageIcon	660
	THE SWING BUTTONS	663
	<i>Handling Action Events</i>	664
	<i>Handling Item Events</i>	664
	JButton	665
	JToggleButton	668
	Check Boxes	670
	Radio Buttons	672
	JTextField	675
	JScrollPane	685
	JList	692
	JComboBox	696
	TREES	699
	JTable	703
	A BRIEF WORD ABOUT MODELS	706
	EXERCISES	707
CHAPTER 19	Working with Menus	711
	MENU BASICS	711
	AN OVERVIEW OF JMenuBar, JMenu, AND JMenuItem	713
	JMenuBar	713
	JMenu	714
	JMenuItem	715
	CREATE A MAIN MENU	715
	ADD MNEMONICS AND ACCELERATORS TO MENU ITEMS	720
	ADD IMAGES AND TOOLTIPS TO MENU ITEMS	723
	USE JRadioButtonMenuItem AND JCheckBoxMenuItem	730
	EXERCISES	733
CHAPTER 20	Dialogs	737
	JOptionPane	738
	showMessageDialog()	740

	showConfirmDialog()	744
	showInputDialog()	748
	showOptionDialog()	753
	JDialog	758
	CREATE A MODELESS DIALOG	762
	SELECT FILES WITH JFileChooser	763
	EXERCISES	774
CHAPTER 21	Threading, Applets, and Painting	779
	MULTITHREADING IN SWING	779
	USE Timer	786
	CREATE SWING APPLETS	792
	<i>A Simple Swing Applet</i>	793
	PAINTING	800
	<i>Painting Fundamentals</i>	800
	<i>The Graphics Context</i>	801
	<i>Compute the Paintable Area</i>	802
	<i>Request Painting</i>	802
	<i>A Paint Example</i>	802
	EXERCISES	808
PART III EXPLORING THE JAVA API LIBRARY		811
CHAPTER 22	String Handling	813
	STRING FUNDAMENTALS	813
	THE STRING CONSTRUCTORS	814
	THREE STRING-RELATED LANGUAGE FEATURES	816
	<i>String Literals</i>	817
	<i>String Concatenation</i>	817
	<i>String Concatenation with Other Data Types</i>	817
	<i>Overriding toString()</i>	818
	THE length() METHOD	823
	OBTAINING THE CHARACTERS WITHIN A STRING	824
	<i>charAt()</i>	824
	<i>getChars()</i>	824
	<i>toCharArray()</i>	825
	STRING COMPARISON	826
	<i>equals() and equalsIgnoreCase()</i>	826
	<i>equals() Versus ==</i>	827
	<i>regionMatches()</i>	828
	<i>startsWith() and endsWith()</i>	828
	<i>compareTo() and compareToIgnoreCase()</i>	829

USING <code>indexOf()</code> AND <code>lastIndexOf()</code>	831
OBTAINING A MODIFIED STRING	833
<code>substring()</code>	833
<code>replace()</code>	834
<code>trim()</code>	835
CHANGING THE CASE OF CHARACTERS	
WITHIN A STRING	836
StringBuffer AND StringBuilder	839
EXERCISES	839
CHAPTER 23 Exploring <code>java.lang</code>	843
PRIMITIVE TYPE WRAPPERS	844
Number	844
Double and Float	845
Byte, Short, Integer, and Long	846
Character	849
Boolean	852
Autoboxing and the Type Wrappers	852
THE Math CLASS	853
THE Process CLASS	857
THE ProcessBuilder CLASS	857
THE Runtime CLASS	859
THE System CLASS	861
Using <code>currentTimeMillis()</code> to Time Program Execution	862
Using <code>arraycopy()</code>	863
Obtaining Property Values	864
Redirecting Standard I/O Streams	864
THE Object CLASS	866
THE Class CLASS	866
THE Enum CLASS	868
THREAD-RELATED CLASSES AND	
THE Runnable INTERFACE	868
OTHER CLASSES	869
THE <code>java.lang</code> INTERFACES	869
The Comparable Interface	870
The Appendable Interface	872
The Iterable Interface	873
The Readable Interface	873
The CharSequence Interface	873
The AutoCloseable Interface	874
EXERCISES	875

CHAPTER 24	Exploring java.util	879
	THE LOCALE CLASS	881
	WORKING WITH DATE AND TIME	884
	<i>Date</i>	884
	<i>Calendar and GregorianCalendar</i>	885
	FORMATTING OUTPUT WITH FORMATTER	890
	<i>The Formatter Constructors</i>	890
	<i>Formatting Basics</i>	891
	<i>Formatting Strings and Characters</i>	894
	<i>Formatting Numbers</i>	894
	<i>Formatting Date and Time</i>	895
	<i>The %n and %% Specifiers</i>	897
	<i>Specifying a Minimum Field Width</i>	897
	<i>Specifying Precision</i>	898
	<i>Using the Format Flags</i>	899
	<i>The Uppercase Option</i>	902
	<i>Using an Argument Index</i>	902
	<i>Formatting for a Different Locale</i>	903
	<i>Closing a Formatter</i>	904
	FORMATTING AND THE printf() METHOD	907
	THE SCANNER CLASS	909
	<i>The Scanner Constructors</i>	909
	<i>Scanning Basics</i>	909
	<i>Some Scanner Examples</i>	911
	<i>Some Other Scanner Features</i>	916
	THE RANDOM CLASS	917
	USE OBSERVABLE AND OBSERVER	918
	THE TIMER AND TIMERTASK CLASSES	922
	MISCELLANEOUS UTILITY CLASSES AND INTERFACES	924
	EXERCISES	925
CHAPTER 25	Using the Data Structures in the Collections Framework	929
	AN OVERVIEW OF DATA STRUCTURES	930
	<i>Stacks and Queues</i>	930
	<i>Linked Lists</i>	931
	<i>Trees</i>	932
	<i>Hash Tables</i>	933
	<i>Choosing a Data Structure</i>	933

COLLECTIONS OVERVIEW	934
THE COLLECTION INTERFACES	935
<i>The Collection Interface</i>	936
<i>The List Interface</i>	938
<i>The Set Interface</i>	938
<i>The SortedSet Interface</i>	938
<i>The NavigableSet Interface</i>	940
<i>The Queue Interface</i>	940
<i>The Deque Interface</i>	942
THE COLLECTION CLASSES	944
<i>The ArrayList Class</i>	945
<i>The LinkedList Class</i>	948
<i>The HashSet Class</i>	952
<i>The TreeSet Class</i>	954
<i>The LinkedHashSet Class</i>	956
<i>The ArrayDeque Class</i>	957
<i>The PriorityQueue Class</i>	959
ACCESSING A COLLECTION VIA AN ITERATOR	960
<i>Using an Iterator</i>	960
<i>The For-Each Alternative to Iterators</i>	964
WORKING WITH MAPS	964
<i>The Map Interfaces</i>	964
<i>The Map Classes</i>	969
COMPARATORS	974
THE COLLECTION ALGORITHMS	976
THE ARRAYS CLASS	980
THE LEGACY CLASSES AND INTERFACES	981
<i>The Enumeration Interface</i>	981
<i>Vector</i>	981
<i>Stack</i>	981
<i>Dictionary</i>	981
<i>Hashtable</i>	981
<i>Properties</i>	982
EXERCISES	982
CHAPTER 26 Networking with java.net	985
NETWORKING FUNDAMENTALS	985
THE NETWORKING CLASSES AND INTERFACES	986
THE INETADDRESS CLASS	987
THE SOCKET CLASS	989
THE URL CLASS	993
THE URLConnection CLASS	995

	THE <code>HttpURLConnection</code> CLASS	1000
	DATAGRAMS	1002
	<i>DatagramSocket</i>	1003
	<i>DatagramPacket</i>	1003
	<i>A Datagram Example</i>	1004
	EXERCISES	1007
CHAPTER 27	The Concurrency Utilities	1009
	THE CONCURRENT API PACKAGES	1010
	<i>java.util.concurrent</i>	1010
	<i>java.util.concurrent.atomic</i>	1011
	<i>java.util.concurrent.locks</i>	1011
	USING SYNCHRONIZATION OBJECTS	1012
	<i>Semaphore</i>	1012
	<i>CountDownLatch</i>	1015
	<i>CyclicBarrier</i>	1018
	<i>Exchanger</i>	1020
	<i>Phaser</i>	1023
	USING AN EXECUTOR	1030
	A SIMPLE EXECUTOR EXAMPLE	1031
	USING <code>Callable</code> AND <code>Future</code>	1033
	THE <code>TimeUnit</code> ENUMERATION	1036
	THE CONCURRENT COLLECTIONS	1038
	LOCKS	1038
	ATOMIC OPERATIONS	1041
	PARALLEL PROGRAMMING VIA THE <code>FORK/</code>	
	<code>JOIN</code> FRAMEWORK	1042
	THE MAIN <code>FORK/JOIN</code> CLASSES	1043
	<i>ForkJoinTask<V></i>	1043
	<i>RecursiveAction</i>	1044
	<i>RecursiveTask<V></i>	1044
	<i>ForkJoinPool</i>	1045
	THE DIVIDE-AND-CONQUER STRATEGY	1046
	<i>A Simple First Fork/Join Example</i>	1047
	<i>Understanding the Impact of the Level of Parallelism</i>	1049
	<i>An Example That Uses RecursiveTask<V></i>	1052
	<i>Executing a Task Asynchronously</i>	1054

	THE CONCURRENCY UTILITIES VERSUS JAVA'S TRADITIONAL APPROACH	1055
	EXERCISES	1056
APPENDIX A	Using Java's Documentation Comments	1059
	THE javadoc TAGS	1059
	THE GENERAL FORM OF A DOCUMENTATION COMMENT	1063
	WHAT javadoc OUTPUTS	1064
	AN EXAMPLE THAT USES DOCUMENTATION COMMENTS	1064
APPENDIX B	An Introduction to Regular Expressions	1067
	THE Pattern CLASS	1067
	THE Matcher CLASS	1068
	REGULAR EXPRESSION SYNTAX BASICS	1068
	DEMONSTRATING PATTERN MATCHING	1069
	USING THE WILDCARD CHARACTER AND QUANTIFIERS	1071
	WORKING WITH CLASSES OF CHARACTERS	1073
	USING replaceAll()	1073
	THE String CLASS CONNECTION	1074
	THINGS TO EXPLORE	1074
APPENDIX C	Answers to Selected Exercises	1075
	INDEX	1129
