

BRIEF CONTENTS

Preface xv

Prologue: Energy Flows 1

- 1** Natural Disasters and the Human Population 7
- 2** Internal Energy and Plate Tectonics 26
- 3** Earthquake Geology and Seismology 50
- 4** Plate Tectonics and Earthquakes 79
- 5** Earthquakes Throughout the United States and Canada 110
- 6** Volcanic Eruptions: Plate Tectonics and Magmas 143
- 7** Volcano Processes and Deadly Events 174
- 8** Tsunami versus Wind-Caused Waves 208
- 9** External Energy Fuels Weather and Climate 226
- 10** Tornadoes, Lightning, Heat, and Cold 250
- 11** Hurricanes 282
- 12** Climate Change 312
- 13** Floods 347
- 14** Fire 377
- 15** Mass Movements 405
- 16** Coastal Processes and Hazards 439
- 17** Impacts with Space Objects 450

Epilogue: Mass Extinctions* 473

Glossary G-1

CONTENTS

Preface xv

Prologue: Energy Flows 1

Processes of Construction versus
Destruction 1

Terms to Remember 6

CHAPTER 1

Natural Disasters and the Human Population 7

Natural Disasters in 2011 8

Great Natural Disasters 8

Human Fatalities and Economic Losses
in Natural Disasters 9

The Role of Government in Natural-Disaster
Death Totals 11 • Human Responses to
Disaster 11 • Economic Losses from Natural
Disasters 11

Natural Hazards 11

Popocatepetl Volcano, Mexico 13 • Magnitude,
Frequency, and Return Period 14 • Role of
Population Growth 14

Overview of Human Population 15

The Power of an Exponent on Growth 15
• The Past 10,000 Years of Human History 15
• The Human Population Today 16

Future World Population 19

Demographic Transition 19 • Urbanization
and Earthquake Fatalities 20 • Disease
Pandemics 21 • Carrying Capacity 22

Summary 24; *Terms to Remember* 24;

Questions for Review 25; *Questions for Further
Thought* 25

CHAPTER 2

Internal Energy and Plate Tectonics 26

Origin of the Sun and Planets 27

Impact Origin of the Moon 28

Earth History 28

The Layered Earth 29

Behavior of Materials 30 • Isostasy 31

Internal Sources of Energy 33

Impact Energy and Gravitational Energy 33
• Radioactive Isotopes 34

In Greater Depth: Radioactive
Isotopes 35

Age of Earth 36

In Greater Depth: Radioactivity
Disasters 36

Plate Tectonics 36

Development of the Plate Tectonics
Concept 37

In Greater Depth: Earth's Magnetic
Field 39

Magnetization of Volcanic Rocks 40

The Grand Unifying Theory 46

How We Understand Earth 48

Uniformitarianism 48

Summary 48; *Terms to Remember* 49;
Questions for Review 49; *Questions for
Further Thought* 49

CHAPTER 3

Earthquake Geology and Seismology 50

- Understanding Earthquakes 52
 - Faults and Geologic Mapping 52
- Types of Faults 54
 - Dip-Slip Faults 54 • Strike-Slip Faults 56
 - Transform Faults 57
- Development of Seismology 59
 - Waves 59
- Seismic Waves 60
 - Body Waves 60 • Seismic Waves and Earth's Interior 60 • Surface Waves 60 • Sound Waves and Seismic Waves 61
- Locating the Source of an Earthquake 62
- Magnitude of Earthquakes 63
 - Richter Scale 63 • Other Measures of Earthquake Size 65 • Foreshocks, Mainshock, and Aftershocks 66 • Magnitude, Fault-Rupture Length, and Seismic-Wave Frequencies 66
- Ground Motion During Earthquakes 67
 - Acceleration 67
- In Greater Depth:** $F = ma$ 68
- Periods of Buildings and Responses of Foundations 67
- Earthquake Intensity—What We Feel During an Earthquake 68
 - Did You Feel It? 68
 - Mercalli Scale Variables 68

In Greater Depth: What to Do Before and During an Earthquake 70

A Case History of Mercalli Variables: The San Fernando Valley, California, Earthquake of 1971 70

Learning from the Past 73

Building in Earthquake Country 73

Shear Walls and Bracing 73 • Retrofit Buildings, Bridges, and House Construction 73 • Base Isolation 74

Summary 77; Terms to Remember 77; Questions for Review 77; Questions for Further Thought 78

CHAPTER 4

Plate Tectonics and Earthquakes 79

Tectonic-Plate Edges and Earthquakes 80

Spreading-Center Earthquakes 81

- Iceland 81 • Red Sea and Gulf of Aden 82
- Gulf of California 84

Convergent Zones and Earthquakes 85

Subduction-Zone Earthquakes 85

Japan, 2011: Stuck Segments of Subducting Plate 86 • Indonesia, 2004: One Earthquake Triggers Others 87 • Mexico City, 1985: Long-Distance Destruction 87 • Chile, 1960: The Biggest One 89 • Alaska, 1964: Second Biggest One 90 • Pacific Northwest: The Upcoming Earthquake 91

Continent-Continent Collision Earthquakes 92

China, Pakistan, and India, 2008, 2005, and 2001: Continent Collision Kills 93 • China, 1556: The Deadliest Earthquake 93

The Arabian Plate 94

Continent-Continent Collision Earthquakes 94 • Transform-Fault Earthquakes 94

Transform-Fault Earthquakes 95

Haiti, 2010: Earthquakes Don't Kill, Buildings Do 95 • Turkey, 1999: Serial Earthquakes 95 • San Andreas Fault Tectonics and Earthquakes 97 • Bay Area Earthquakes—Past and Future 106

Summary 108; Terms to Remember 109; Questions for Review 109; Questions for Further Thought 109

CHAPTER 5

Earthquakes Throughout the United States and Canada 110

How Faults Work 111

Elastic Rebound 111 • Newer View 111

Thrust-Fault Earthquakes 113

Virginia, 2011: Ancient Faults Can Reactivate 113 • Northridge, California, 1994: Compression at the Big Bend 113 • Seattle, Washington 114

Normal-Fault Earthquakes 115

Puget Sound, Washington, 1949, 1965, 2001: Subducting Plates Can Crack 115

Neotectonics and Paleoseismology 116

Earthquake Prediction 118

Long-Term Forecasts 118 • Short-Term Forecasts 119 • Perils of Prediction: Scientists on Trial 120

Human-Triggered Earthquakes 120
 Disposal Wells 120 • Increases in Oil and Natural Gas Production 120 • Dam Earthquakes 120 • Bomb Blasts 121

Earthquake-Shaking Maps 121
 Did You Feel It? 121 • Shakemaps 121

California Earthquake Scenario 121
 Annualized Earthquake Losses 123
 • Great Shakeout Events 123

Earthquakes in the United States and Canada 123

Western North America: Plate Boundary–Zone Earthquakes 125
 Western Great Basin: Eastern California, Western Nevada 126 • The Intermountain Seismic Belt: Utah, Idaho, Wyoming, Montana 129
 • Rio Grande Rift: New Mexico, Colorado, Westernmost Texas, Mexico 131

Intraplate Earthquakes: “Stable” Central United States 132
 New Madrid, Missouri, 1811–1812 132 • Reelfoot Rift: Missouri, Arkansas, Tennessee, Kentucky, Illinois 134 • Ancient Rifts in the Central United States 135

Intraplate Earthquakes: Eastern North America 136
 New England 136 • St. Lawrence River Valley 136 • Charleston, South Carolina, 1886 137

Earthquakes and Volcanism in Hawaii 138
 Earthquake in 1975 138 • Earthquakes in 2006 138

Summary 141; Terms to Remember 142; Questions for Review 142; Questions for Further Thought 142

CHAPTER 6

Volcanic Eruptions: Plate Tectonics and Magmas 143

How We Understand Volcanic Eruptions 144
 Plate-Tectonic Setting of Volcanoes 144
 Chemical Composition of Magmas 148
 Viscosity, Temperature, and Water Content of Magmas 148

In Greater Depth: Minerals and Volcanic Rocks 149

Plate-Tectonic Setting of Volcanoes Revisited 151

How a Volcano Erupts 152
 Eruption Styles and the Role of Water Content 152 • Some Volcanic Materials 153

The Three Vs of Volcanology: Viscosity, Volatiles, Volume 154
 Shield Volcanoes: Low Viscosity, Low Volatiles, Large Volume 157

In Greater Depth: Volcanic Explosivity Index (VEI) 159

Flood Basalts: Low Viscosity, Low Volatiles, Very Large Volume 159 • Scoria Cones: Medium Viscosity, Medium Volatiles, Small Volume 160
 • Stratovolcanoes: High Viscosity, High Volatiles, Large Volume 160 • Lava Domes: High Viscosity, Low Volatiles, Small Volume 162
 • Calderas: High Viscosity, High Volatiles, Very Large Volume 163

In Greater Depth: Hot Spots 169

Summary 172; Terms to Remember 172; Questions for Review 172; Questions for Further Thought 173

CHAPTER 7

Volcano Processes and Deadly Events 174

Volcanism at Spreading Centers 175
 Iceland 175

Volcanism at Subduction Zones 176
 Cascade Range, Pacific Coast of United States and Canada 177

Volcanic Processes and Killer Events 186
 The Historic Record of Volcano Fatalities 186
 Pyroclastic Eruptions 186 • Tsunami 190
 • Lahars 191 • Debris Avalanches 193
 • Indirect—Famine 193 • Gas 194 • Lava Flows 197

VEIs of Some Killer Eruptions 197

Volcano Monitoring and Warning 197
 Long Valley, California, 1982 198 • Mount Pinatubo, Philippines, 1991 198 • Signs of Impending Eruption 200 • Volcano Observatories 201

Summary 201; Terms to Remember 201; Questions for Review 201; Questions for Further Thought 202

CHAPTER 8

Tsunami versus Wind-Caused Waves 203

Japanese Tsunami, 11 March 2011 204

Tsunami Travel through the Pacific Ocean 204

- Land Subsidence 205 • British Columbia, Washington, Oregon, 26 January 1700 205
- Waves in Water 206

Wind-Caused Waves 206

Why a Wind-Blown Wave Breaks 206

- Rogue Waves 208

In Greater Depth: Deep-Water Wave Velocity, Length, Period, and Energy 209

Tsunami 209

Tsunami versus Wind-Caused Waves 211

Tsunami at the Shoreline 213

Earthquake-Caused Tsunami 214

- Indian Ocean, 26 December 2004 214 • Alaska, 1 April 1946: First Wave Biggest 216 • Chile, 22 May 1960: Third Wave Biggest 217 • Alaska, 27 March 1964: Fifth Wave Biggest 218
- Volcano-Caused Tsunami 218

Krakatau, Indonesia, 26–27 August 1883 218

Landslide-Caused Tsunami 219

Volcano Collapses 219 • Earthquake-Triggered Movements 220 • In Bays and Lakes 222

Seiches 223

Hebgen Lake, Montana, 17 August 1959 223

Tsunami and You 223

- Simuele Island, Indonesia, 26 December 2004 224 • Nicaragua, 1 September 1992 224
- Humans Can Increase the Hazard 225 • Tsunami Warnings 225

Summary 226; Terms to Remember 227; Questions for Review 227; Questions for Further Thought 227; Disaster Simulation Game 227

CHAPTER 9

External Energy Fuels Weather and Climate 228

External Sources of Energy 229

The Sun 229

Solar Radiation Received by Earth 230

Outgoing Terrestrial Radiation 230

Greenhouse Effect 231 • Albedo 231

The Hydrologic Cycle 232

Water and Heat 232

In Greater Depth: Water—The Most Peculiar Substance on Earth? 234

Convection 234 • Water Vapor and Humidity 234

• Latent Heat 235 • Adiabatic Processes 235

• Lapse Rates 235 • Differential Heating of Land and Water 236

Energy Transfer in the Atmosphere 236

Energy Transfer in the World Ocean 236

Layering of the Lower Atmosphere 237

Temperature 237 • Pressure 237

Winds 238

Pressure Gradient Force 239 • Coriolis

Effect 240 • Friction 240

In Greater Depth: Coriolis Effect 240

Rotating Air Bodies 240 • Low Latitudes 242

• High Latitudes 242 • Middle Latitudes 243

• Observed Circulation of the Atmosphere 246

General Circulation of the Oceans 247

Surface Circulation 247 • Deep-Ocean

Circulation 247

Summary 248; Terms to Remember 249; Questions for Review 249; Questions for Further Thought 249

CHAPTER 10

Tornadoes, Lightning, Heat, and Cold 250

Severe Weather 251

Winter Storms 252

Cold 252 • Precipitation 252 • Nor'easters 252

In Greater Depth: Doppler Radar 254

Blizzards 255 • Ice Storms 255 • Lake-Effect

Snow 256

How Thunderstorms Work 256

Lifting of Air 256

Air-Mass Thunderstorms 258

Severe Thunderstorms 259

Supercells 259

In Greater Depth: Downbursts:

An Airplane's Enemy 260

Thunderstorms in North America 260 • Heavy

Rains and Flash Flooding 261 • Hail 262

• Derechos 263

Tornadoes 264
 Tornadoes in 2011 264
 How Tornadoes Form 264
 Regional Scale 264 • Supercell Thunderstorm Scale 265 • Vortex Scale 266 • Final Stage of a Tornado 267 • Tornadoes in the United States and Canada 268
 Tornado Outbreaks 271
 Outbreak of 14–16 April 2011 271 • Outbreak of 25–28 April 2011 271 • Outbreak of 21–27 May 2011 272 • Super Outbreak of 3–4 April 1974 272 • Tornadoes and Cities 272 • How a Tornado Destroys a House 274
 Tornado Safety 274
 Safe Rooms 274
 Lightning 274
 How Lightning Works 275 • Don't Get Struck 277
 Heat 278
 Heat Wave in Chicago, July 1995 279 • City Weather 279 • European Heat Waves, 2003 and 2010 279
Summary 280; Terms to Remember 281; Questions for Review 281; Questions for Further Thought 281

CHAPTER 11

Hurricanes 282

Hurricanes 282
 How a Hurricane Forms 284
 How a Hurricane Works 285
 Eyewall and Eye 286 • Tornadoes within Hurricanes 287 • Energy Flow in a Hurricane 287 • Hurricane Energy Release 287
 Hurricane Origins 288
 North Atlantic Ocean Hurricanes 289
 Cape Verde-Type Hurricanes 289 • Caribbean Sea and Gulf of Mexico-Type Hurricanes 292
 Hurricane Forecasts 294
 How Hurricanes Get Their Names 294
 • Hurricane Trends in the Atlantic Basin 296
 Hurricane Damages 296
 Storm-Surge Hazards 298 • Heavy Rains and Inland Flooding 301
 Hurricanes and the Gulf of Mexico Coastline 301
 Katrina 301

Hurricanes and the Atlantic Coastline 305
 Hugo, September 1989 305
 The Evacuation Dilemma 305
 Reduction of Hurricane Damages 306
 Building Codes 306 • Land-Use Planning 306
 Global Rise in Sea Level 307
 Hurricanes and the Pacific Coastline 307
 Iniki, September 1992 308
 Cyclones and Bangladesh 308
Summary 310; Terms to Remember 310; Questions for Review 310; Questions for Further Thought 311; Disaster Simulation Game 311

CHAPTER 12

Climate Change 312

Early Earth Climate—An Intense Greenhouse 313
 Climate History of Earth: Timescale in Millions of Years 314
In Greater Depth: Equilibrium Between Tectonics, Rock Weathering, and Climate 315
 Late Paleozoic Ice Age 315 • Late Paleocene Torrid Age 316
In Greater Depth: Oxygen Isotopes and Temperature 318
 Late Cenozoic Ice Age 318
 Glacial Advance and Retreat: Timescale in Thousands of Years 319
 The Last Glacial Maximum 320
 Climate Variations: Timescale in Hundreds of Years 322
 Shorter-Term Climate Changes: Timescale in Multiple Years 323
 El Niño 323 • La Niña 325 • Pacific Decadal Oscillation 326 • Volcanism and Climate 327
In Greater Depth: The Mayan Civilization and Climate Change 329
 Volcanic Climate Effects 329
 The Past Thousand Years 330
 The 20th Century 331
 Solar Energy Variation 331
 Radiative Forcing 332
 Greenhouse Gases and Aerosols 332
 Water Vapor 333

In Greater Depth: When Did Humans Begin Adding to Greenhouse Warming? 333

- Carbon Dioxide (CO₂) 334 • Methane (CH₄) 334
- Nitrous Oxide (N₂O) 335 Ozone (O₃) 335
- Chlorofluorocarbons (CFCs) 335 • 20th-Century Greenhouse Gas Increases 335 • Aerosols 335

The 21st Century 335

- Warmest Years 336 • Global Climate Models 336
- Drought and Famine 338 • Ice Melting 339

In Greater Depth: Tipping Points 340

In Greater Depth: Lag Times 341

- Sea-Level Rise 342 • Ocean Circulation 342 • Signs of Change 342

Mitigation Options 342

- Controlling CO₂ Content of Atmosphere 342
- Managing Incoming Solar Radiation 344
- Fast-Action Strategies 344

Summary 345; Terms to Remember 345; Questions for Review 346; Questions for Further Thought 346

CHAPTER 13

Floods 347

How Rivers and Streams Work 348

- The Equilibrium Stream 350

In Greater Depth: Stream Velocity

Profile 350

- Graded-Stream Theory 351
- The Floodplain 353

Flood Frequency 353

- Florence, Italy, 1333 and 1966 353 • Flood-Frequency Curves 353 • Flood Styles 354

In Greater Depth: Constructing Flood-Frequency Curves 355

- Flash Floods 356 • Regional Floods 360

Societal Responses to Flood Hazards 366

- Dams, Reservoirs, and Natural Storage Areas 366 • Levees 367 • Sandbagging 368
- Forecasting 368 • Zoning and Land Use 368
- Insurance 368 • Presidential Disaster Declarations 368

Urbanization and Floods 369

- Hydrographs 369 • Flood Frequencies 369
- Channelization 369

The Biggest Floods 373

Ice-Dam Failure Floods 374

Summary 375; Terms to Remember 376; Questions for Review 376; Questions for Further Thought 376; Disaster Simulation Game 376

CHAPTER 14

Fire 377

What Is Fire? 379

The Need for Fire 380

The Fire Triangle 380

The Stages of Fire 381

The Spread of Fire 383

- Fuel 383 • Wind 385 • Topography 385
- Fire Behavior 385

The Fuels of Fire 385

- Grasses 385 • Shrubs 385 • Forests 387

Fire Weather and Winds 387

- Cold-Front Winds 388 • Downslope Winds 388
- Local Winds 388 • Wind and Fire in the Great Lakes Region 388 • Wind and Fire in California 390

Home Design and Fire 393

- How Well Have We Learned? 395

Fire Suppression 396

Yellowstone National Park Wildfire 397

- California versus Baja California: Pay Now or Pay Later 398 • The Western and Southern United States in 2000 399 • Prescribed Fires 400 Wildfires in Australia 401

The Similarities of Fire and Flood 403

Summary 403; Terms to Remember 404; Questions for Review 404; Questions for Further Thought 404; Disaster Simulation Game 404

CHAPTER 15

Mass Movements 405

The Role of Gravity in Mass Movements 406

- Creep 407

External Causes of Slope Failures 408

- Water in Its External Roles 408

Internal Causes of Slope Failures 408

- Inherently Weak Materials 408

In Greater Depth: Energy, Force, Work, Power, and Heat 409

Water in Its Internal Roles 411

In Greater Depth: Analysis of Slope Stability 413

Decreases in Cohesion 413 • Adverse Geologic Structures 414 • Triggers of Mass Movements 415

Classification of Mass Movements 416

Falls 416

Yosemite National Park, California 417

Slides 417

Rotational Slides 418 • Translational Slides 419

Flows 422

Portuguese Bend, California, Earthflow 422
• La Conchita, California, Slump and Debris Flows, 1995 and 2005 424 • Long-Runout Debris Flows 424

Snow Avalanches 429

Submarine Mass Movements 430

Mitigation Efforts 431

Subsidence 432

Catastrophic Subsidence 432

In Greater Depth: How to Create a Cave 433

Slow Subsidence 433

Summary 437; Terms to Remember 437; Questions for Review 437; Questions for Further Thought 438

CHAPTER 16

Coastal Processes and Hazards 439

Sand 440

Summer versus Winter Beaches 441

Waves 441

Rip Currents 441 • Wave Refraction 443
• Longshore Drift 443

Tides 443

Tidal Bores 444

Coastal-Control Structures 444

Seawalls 444

In Greater Depth: Gravity and Tides 445

Cliff Armoring 446 • Groins and Jetties 447

• Breakwaters 447

Summary 448; Terms to Remember 448; Questions for Review 449; Questions for Further Thought 449

CHAPTER 17

Impacts with Space Objects 450

Energy and Impacts 451

Impact Scars 452

Sources of Extraterrestrial Debris 452

Asteroids 453 • Comets 455

Rates of Meteoroid Influx 457

In Greater Depth: Shoemaker-Levy 9 Comet Impacts on Jupiter 458

Cosmic Dust 459 • Shooting Stars 459
• Meteorites 459

The Crater-Forming Process 460

Crater-Forming Impacts 462

Meteor Crater, Arizona 463

Impact Origin of Chesapeake Bay 464

The End Cretaceous Impact 465

Evidence of the End Cretaceous Impact 465
• Site of the End Cretaceous Impact 466
• Size and Velocity of Impactor 466 • Angle of Impact 466 • Problems for Life from the End Cretaceous Impact 466

Biggest Events of the 20th and 21st Centuries 467

Tunguska, Siberia, 1908 467 • Biggest “Near Events” 469

Frequency of Large Impacts 469

Lifetime Risks of Impact 470 • Prevention of Impacts 471

Summary 471; Terms to Remember 472; Questions for Review 472; Questions for Further Thought 472

Epilogue: Mass Extinctions 473

The Fossil Record 473

Mass Extinctions 474

The Current Mass Extinction 476

Glossary G-1
