Rewarded****Chapter****1**

Tutankhamen's tomb, the only royal Egyptian tomb ever found intact, is one of the most famous archaeological discoveries. The tomb was finally opened in 1922 after years of painstaking excavations based on careful research. Following similar steps can help scientists unravel mysteries both modern and ancient.

1. Why is it important for everyone on a research team to know and follow the same steps?
2. Using King Tut's tomb as an example, how might fieldwork and lab work go hand in hand?
3. What sort of equipment might be useful to an archaeologist?
