

## Reading Tip

Reread your summary to make sure you didn't change the author's original meaning or ideas.

### Target Your Reading

Use this to focus on the main ideas as you read the chapter.

- 1 Before you read** the chapter, respond to the statements below on your worksheet or on a numbered sheet of paper.
  - Write an **A** if you **agree** with the statement.
  - Write a **D** if you **disagree** with the statement.
- 2 After you read** the chapter, look back to this page to see if you've changed your mind about any of the statements.
  - If any of your answers changed, explain why.
  - Change any false statements into true statements.
  - Use your revised statements as a study guide.

Before You Read A or D	Statement	After You Read A or D
	<b>1</b> Fossils of tropical plants are never found in Antarctica.	
	<b>2</b> Because of all the evidence that Alfred Wegener collected, scientists initially accepted his hypothesis of continental drift.	
	<b>3</b> Wegener's continental drift hypothesis explains how, when, and why the continents drifted apart.	
	<b>4</b> Earthquakes and volcanic eruptions often occur underwater along mid-ocean ridges.	
	<b>5</b> Seafloor spreading provided part of the explanation of how continents could move.	
	<b>6</b> Earth's broken crust rides on several large plates that move on a plastic-like layer of Earth's mantle.	
	<b>7</b> The San Andreas Fault is part of a plate boundary.	
	<b>8</b> When two continental plates move toward each other, one continent sinks beneath the other.	
	<b>9</b> Scientists have proposed several explanations of how heat moves in Earth's interior.
