<i>Preface to the Adapted Edition</i>	<i>xiii</i>
<i>Preface to the Fourth Edition</i>	<i>xvii</i>

Part One: Food and Microorganisms

1. Food as a Substrate for Microorganisms	3
Hydrogen-Ion Concentration (PH)	4
Moisture Requirement: The Concept of Water Activity	5
Oxidation-Reduction Potential	9
Nutrient Content	10
Accessory Food Substances, or Vitamins	12
Inhibitory Substances and Biological Structure	13
Combined Effects of Factors Affecting Growth	14
<i>Review Questions</i>	14
<i>Multiple-Choice Questions</i>	14
2. Microorganisms Important in Food Microbiology	2
Molds	16
General Characteristics of Molds	16
Classification and Identification of Molds	20
Yeasts and Yeastlike Fungi	29
Bacteria	35
<i>Review Questions</i>	50
<i>Multiple-Choice Questions</i>	51
3. Contamination of Foods	52
From Green Plants and Fruits	52
From Animals	52
From Sewage	54
From Soil	55
From Water	55
From Air	57
During Handling and Processing	58
<i>Review Questions</i>	59
<i>Multiple-Choice Questions</i>	59

4. General Principles Underlying Spoilage: Chemical Changes Caused by Microorganisms	61
Fitness or Unfitness of Food for Consumption	61
Causes of Spoilage	62
Classification of Foods by Ease of Spoilage	62
Factors Affecting Kinds and Numbers of Microorganisms in Food	62
Factors Affecting the Growth of Microorganisms in Food	63
Chemical Changes Caused by Microorganisms	68
Review Questions	70
Multiple-Choice Questions	70

Part Two: Principles of Food Preservation

5. General Principles of Food Preservation: Asepsis, Removal, Anaerobic Conditions	75
Methods of Food Preservation	75
Principles of Food Preservation	76
Asepsis	79
Removal of Microorganisms	80
Maintenance of Anaerobic Conditions	81
Review Questions	81
Multiple-Choice Questions	81
6. Preservation by Use of High Temperatures	83
Factors Affecting Heat Resistance (Thermal Death Time)	83
Heat Resistance of Microorganisms and their Spores	87
12D Concept	94
Heat Penetration	97
Determination of Thermal Processes	99
Heat Treatments Employed in Processing Foods	101
Review Questions	108
Multiple-Choice Questions	108
7. Preservation by use of Low Temperatures	109
Growth of Microorganisms at Low Temperatures	110
Temperatures Employed in Low-Temperature Storage	111
Effect of Subfreezing and Freezing Temperatures on Microorganisms	116
Review Questions	118
Multiple-Choice Questions	119

8. Preservation by Drying	120
Methods of Drying 121	
Factors in the Control of Drying 122	
Treatments of Foods before Drying 123	
Microbiology of Dried Foods 123	
Intermediate-Moisture Foods 126	
Review Questions 127	
Multiple-Choice Questions 127	
9. Preservation by Food Additives	129
The Ideal Antimicrobial Preservative 129	
Food Additives 130	
Added Preservatives 131	
Developed Preservatives 146	
Review Questions 147	
Multiple-Choice Questions 147	
10. Preservation by Radiation	148
Ultraviolet Irradiation 148	
Ionizing Radiations 151	
Gamma Rays and Cathode Rays 153	
Microwave Processing 157	
Case Study: Preservation of Foods by Irradiation 157	
Review Questions 159	
Multiple-Choice Questions 159	
Part Three: Contamination, Preservation, and Spoilage of Different Kinds of Foods	
11. Contamination, Preservation, and Spoilage of Cereals and Cereal Products	163
Contamination 163	
Preservation 166	
Spoilage 168	
Review Questions 173	
Multiple-Choice Questions 174	
12. Contamination, Preservation, and Spoilage of Sugars and Sugar Products	175
Contamination 175	
Preservation 178	

Spoilage 178
Review Questions 181
Multiple-Choice Questions 181

13. Contamination, Preservation, and Spoilage of Vegetables and Fruit 183

Contamination 183
Preservation of Vegetables 185
Removal of Microorganisms 186
Preservation of Fruits and Fruit Products 190
Spoilage 194
Review Questions 200
Multiple-Choice Questions 200

14. Contamination, Preservation, and Spoilage of Meats and Meat Products 202

Contamination 202
Preservation 203
Spoilage 212
Review Questions 221
Multiple-Choice Questions 221

15. Contamination, Preservation, and Spoilage of Fish and Other Seafoods 223

Contamination 223
Preservation 224
Spoilage 228
Review Questions 232
Multiple-Choice Questions 232

16. Contamination, Preservation, and Spoilage of Eggs 233

Contamination 233
Preservation 234
Spoilage 240
Review Questions 243
Multiple-Choice Questions 243

17. Contamination, Preservation, and Spoilage of Poultry 244

Contamination 244
Preservation 246
Spoilage 248
Review Questions 249
Multiple-Choice Questions 250

18. Contamination, Preservation, and Spoilage of Milk and Milk Products	251
Contamination	251
Preservation	252
Spoilage	260
Review Questions	270
Multiple-Choice Questions	270
19. Spoilage of Heated Canned Foods	272
Causes of Spoilage	272
Appearance of the Unopened Container	273
Grouping of Canned Foods on the Basis of Acidity	274
Types of Biological Spoilage of Canned Foods	274
Review Questions	280
Multiple-Choice Questions	280
20. Miscellaneous Foods	282
Fatty Foods	282
Essential Oils	284
Spices and Other Condiments	285
Salt	285
Nutmeats	285
Other Foods	286
Review Questions	287
Multiple-Choice Questions	287
Part Four: Foods and Enzymes Produced by Microorganisms	
21. Production of Cultures for Food Fermentations	291
General Principles of Culture Maintenance and Preparation	291
Bacterial Cultures	293
Yeast Cultures	295
Mold Cultures	296
Review Questions	297
Multiple-Choice Questions	297
22. Food Fermentations	299
Bread	299
Traditional Indian Fermented Foods	302
Malt Beverages	317
Wines	321
Distilled Liquors	327

Vinegar	327
Fermented Vegetables	333
Fermented Dairy Products	345
Spoilage and Defects of Fermented Dairy Products	347
Tea, Coffee, Cacao, Vanilla, Citron	350
Oriental Fermented Foods	351
<i>Review Questions</i>	355
<i>Multiple-Choice Questions</i>	355

23. Foods and Enzymes from Microorganisms 356

Microorganisms as Food: Single-Cell Protein	356
Concept of Probiotics	360
<i>Case Study: Probiotics</i>	366
Fats from Microorganisms	367
Production of Amino Acids	368
Production of Other Substances Added to Foods	368
Production of Enzymes	370
<i>Case Study: Enzymes in Foods</i>	375
<i>Review Questions</i>	377
<i>Multiple-Choice Questions</i>	377

Part Five: Foods in Relation to Disease

24. Food-borne Illness: Bacterial 381

Food-Borne Diseases	381
<i>Case Study: Salmonellosis</i>	414
<i>Review Questions</i>	415
<i>Multiple-Choice Questions</i>	415

25. Food-Borne Poisonings, Infections, and Intoxications: Nonbacterial 417

Mycotoxins	417
Viruses	424
Rickettsias	427
Food-Borne Parasites	427
Seafood Toxicants	432
Poisoning by Chemicals	433
<i>Review Questions</i>	433
<i>Multiple-Choice Questions</i>	434

26. Investigation of Food-Borne Disease Outbreaks	435
Food-Borne Diseases	435
Objectives of Investigation	435
Personnel Involved in Investigation	436
Materials and Equipment Required	436
The Field Investigation	437
Laboratory Testing	438
Interpretation and Application of Results	444
Preventive Measures	447
<i>Review Questions</i>	448
<i>Multiple-Choice Questions</i>	448
Part Six: Food Sanitation, Control, and Inspection	
27. Microbiology in Food Sanitation	451
Bacteriology of Water Supplies	451
Sewage, and Waste Treatment and Disposal	452
Microbiology of the Food Product	455
Good Manufacturing Practices	460
Hazard Analysis and Critical Controlpoints (HACCP)	460
<i>Case Study: Conducted for Haccp</i>	465
Health of Employees	466
<i>Case Studies: Case Studies Related to Food Safety</i>	467
<i>Review Questions</i>	470
<i>Multiple-Choice Questions</i>	470
28. Food Control	472
Enforcement and Control Agencies	472
Microbiological Criteria for Food	475
<i>Review Questions</i>	477
Appendix A: Nomenclature	479
Appendix B: International Microbiological Specifications	483
<i>Index</i>	489
