

## APPENDIX 1

# Scientific Names of Organisms Mentioned in the Text

This is an alphabetical list of the organisms whose scientific names may or may not be mentioned in the text. The common names are listed alphabetically along with the scientific names. Common and scientific names of organisms mentioned in Appendices 2 through 4 are provided within the respective appendices.

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Aardvark	<i>Orycteropus</i> spp.	Algae, bark	<i>Pleurococcus</i> spp. and others (see footnote under <i>Bark, green algae that inhabit</i> )
Abrasives, horsetail source of	<i>Equisetum</i> spp.	Algae, brown	members of Phylum Chromophyta, Kingdom Protista
Absinthe liqueur, source of ingredients	<i>Pimpinella anisum</i> , <i>Artemisia absinthium</i> , and others	Algae, carrageenan-producing	<i>Chondrus crispus</i> , <i>Eucheuma</i> spp., and others
Acacia	<i>Acacia</i> spp.	Algae, coralline	<i>Bossiella</i> spp., <i>Corallina</i> spp., <i>Lithothamnion</i> spp., and others
Aconite, source of	<i>Aconitum</i> spp.	Algae/cyanobacteria, edible <sup>1</sup>	<i>Chlorella</i> , Irish moss ( <i>Chondrus crispus</i> ), kelp ( <i>Laminaria</i> spp.), laver or nori ( <i>Porphyra</i> spp.), spirulina ( <i>Spirulina</i> spp.), wakame ( <i>Undaria</i> spp.), and others
Actinomycetes	<i>Actinomyces</i> spp. and others	Algae/cyanobacteria, toxic	<i>Anabaena</i> sp., <i>Caulerpa</i> sp., <i>Chlorella</i> sp., <i>Chondria</i> <i>armata</i> , <i>Gambierdiscus toxicus</i> , <i>Hizikia</i> sp., <i>Lyngbya majusculis</i> , <i>Oscillatoria nigroviridis</i> , <i>Protogonyaulax</i> ( <i>Gonyaulax</i> ) sp., <i>Prototheca</i> sp., <i>Prymnesium parvum</i> , <i>Ptychodiscus</i> ( <i>Gymnodinium</i> <i>brevis</i> ), <i>Schizothrix calcicola</i> , and others
Adder's tongue fern, reticulate	<i>Ophioglossum reticulatum</i> (has highest known diploid chromosome number—1,260)	Algae/cyanobacteria	<i>Anabaena azollae</i> , <i>Chlamydomonas mexicana</i> , kelps, and others
Adder's tongue ferns	<i>Ophioglossum</i> spp.		
Afghanistan pine	<i>Pinus eldarica</i>		
Aflatotoxin, source of	<i>Aspergillus flavus</i>		
African sausage tree	<i>Kigelia pinnata</i>		
Agar, source of	<i>Chondrus crispus</i> , <i>Eucheuma</i> spp., <i>Gelidium</i> spp., <i>Gracilaria</i> spp., and other red algae		
Agave	<i>Agave angustifolia</i> , <i>A. palmeri</i> , <i>A. tequilana</i> , and other <i>Agave</i> spp.		
Air plant—see also Bromeliad	<i>Kalanchoë</i> spp.		
Alder	<i>Alnus</i> spp.	Algae/cyanobacteria used as fertilizers or soil conditioners	
Alfalfa	<i>Medicago sativa</i>	Algae, flatworm	
Alfalfa caterpillar	<i>Colias philodice</i>	Algae, golden brown	
Algae	members of Kingdom Protista—all phyla	Algae, green	
Algae, agar-producing	<i>Acanthopeltis</i> spp., <i>Ahnfeltia</i> spp., <i>Gelidium</i> spp. (principal source), <i>Gracilaria</i> spp., <i>Pterocladia</i> spp., and others	Algae, green colonial	
Algae, alginic-acid-producing	<i>Ascophyllum</i> spp., <i>Durvillea</i> spp., <i>Ecklonia</i> spp., <i>Laminaria</i> spp., <i>Macrocystis</i> spp., and others		

<sup>1</sup>More than 150 species of algae and cyanobacteria are known to be edible, but most of the approximately half million tons of dried algae consumed annually consists of species of *Laminaria*, *Porphyra*, and *Undaria*. Most commercially grown nori consists of the fronds of *Porphyra tenera*, but other species of *Porphyra* are edible. During their life cycles, *Porphyra* spp. alternate between the familiar frond (bladed) form and a relatively inconspicuous filamentous form that was discovered after a British phycologist germinated spores of *Porphyra umbilicalis* in a culture dish in her laboratory. The filamentous form previously had been considered a distinct species that had been named *Conchoecia rosea*. Species of *Ascophyllum*, *Fucus*, *Laminaria*, and *Macrocystis* are harvested for animal and poultry feeds. *Dunaliella bardawil* is cultured commercially as a source of beta-carotene and glycerol. *Spirulina* spp. (cyanobacteria) have a protein content of up to 70%; they are commercially cultivated for human consumption, particularly in Mexico and Israel, and have been a staple food of natives of the Lake Chad region in Africa for centuries.

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Algae, green filamentous	<i>Oedogonium</i> spp., <i>Spirogyra</i> spp., <i>Ulothrix</i> spp., <i>Zygnema</i> spp., and others	Arrowroot	<i>Maranta arundinacea</i> , <i>Tacca leontopetaloides</i>
Algae, medicinal	<i>Laminaria</i> spp., <i>Digenia</i> spp., and many others	Arrowroot, Florida, source of	<i>Zamia floridana</i>
Algae, metal-removing	<i>Chlamydomonas reinhardtii</i>	Artichoke, Chinese (Crosne)	<i>Stachys affinis</i>
Algae, red	members of Phylum Rhodophyta, Kingdom Protista	Artichoke, globe	<i>Cynaria scolymus</i>
Algae, snowbank	<i>Chlamydomonas nivalis</i> and others	Artichoke, Jerusalem	<i>Helianthus tuberosus</i>
Algae, sponge	<i>Chlorella</i> spp., <i>Zoochlorella</i> spp.	Arum Lily (Arum) Family	Araceae
Algae, yellow-green	members of Phylum Chromophyta, Kingdom Protista	Ascomycete	member of Phylum Ascomycota, Kingdom Fungi
Almond	<i>Prunus amygdalus</i>	Ash, blue	<i>Fraxinus quadrangulata</i>
Aloe juice, source of	<i>Aloe barbadensis</i> , <i>A. ferox</i> , <i>A. vera</i> , and others	Ash, Oregon	<i>Fraxinus latifolia</i>
Amaranth	<i>Amaranthus</i> spp.	Ash, white	<i>Fraxinus americana</i>
Amaryllis	<i>Amaryllis</i> spp.	Asparagus	<i>Asparagus officinalis</i>
Ama'uma'u	<i>Sadleria cyatheoides</i>	Aspen, quaking	<i>Populus tremuloides</i>
American chestnut	<i>Castanea dentata</i>	Aspergillus, causal agent(s) of	<i>Aspergillus fumigatus</i> and other <i>Aspergillus</i> spp.
American elm	<i>Ulmus americana</i>	Aster	<i>Aster</i> spp.
Amoeba	<i>Amoeba proteus</i> and others	Astringent, horsetail source of	<i>Equisetum arvense</i> , <i>E. debile</i> , and others
Amoeba, fungal internal parasites of	<i>Cochlonema verrucosum</i> and others	Athlete's foot, fungal causal agent of	<i>Trichophyton</i> spp.
Amoeba, fungal trappers of	<i>Dactyella</i> spp. and others	Autograph tree	<i>Clusia rosea</i>
Anabaena	<i>Anabaena</i> spp. (including nitrogen-fixing spp. such as <i>A. azollae</i> )	Avocado	<i>Persea americana</i> and others
Anemone	<i>Anemone</i> spp.	Azalea	<i>Rhododendron</i> spp.
Angelica	<i>Angelica archangelica</i>	Baby blue eyes	<i>Nemophila menziesii</i>
Anise	<i>Pimpinella anisum</i>	Baby powder, ground pine source of	<i>Lycopodium clavatum</i>
Anise swallowtail butterfly	<i>Papilio zelicaon</i>	Bacteria, acetone-producing	<i>Clostridium acetobutylicum</i> and others
Annatto	<i>Bixa orellana</i>	Bacteria, acidophilus	<i>Lactobacillus acidophilus</i>
Ant	<i>Formica</i> spp. and many others	Bacteria, ammonifying	<i>Clostridium</i> spp., <i>Micrococcus</i> spp., <i>Proteus</i> spp., <i>Pseudomonas</i> spp., and others
Anteater	<i>Myrmecophaga jubata</i>	Bacteria, anthrax	<i>Bacillus anthracis</i>
Ants, bullhorn Acacia	<i>Pseudomyrmex ferruginea</i>	Bacteria, blue-green—see Cyanobacteria	<i>Clostridium botulinum</i>
Aphid	<i>Anuraphis</i> spp., <i>Aphis</i> spp., and others	Bacteria, botulism	<i>Brucella abortus</i> , <i>B. suis</i> , <i>B. melitensis</i>
Aphid, root (pest of grape vines)	<i>Phylloxera</i> spp.	Bacteria, brucellosis	<i>Bacillus thuringiensis</i>
Apple <sup>2</sup>	<i>Malus domestica</i> (= <i>Malus pumila</i> ) <sup>2</sup>	Bacteria, Bt	<i>Yersinia pestis</i>
Apple brown rot, causal agent	<i>Monilinia fructigena</i>	Bacteria, bubonic plague	<i>Streptococcus lactis</i> , <i>S. cremoris</i> , <i>Leuconostoc citrovorum</i> , and others
Apple scab, causal agent	<i>Venturia inaequalis</i>	Bacteria, buttermilk	<i>Clostridium acetobutylicum</i> and others
Apricot	<i>Prunus armeniaca</i>	Bacteria, butyl alcohol	<i>Vibrio cholerae</i>
Apricot brown rot	<i>Sclerotinia fructicola</i>	Bacteria, cholera	<i>Escherichia coli</i>
Arabidopsis (Mouse-ear cress)	<i>Arabidopsis thaliana</i>	Bacteria, common	<i>Clostridium</i> spp., <i>Micrococcus</i> spp., <i>Proteus</i> spp., <i>Pseudomonas</i> spp., and others
Arborvitae (American/Northern)	<i>Thuja occidentalis</i>	Bacteria, decay/decomposer	<i>Micrococcus denitrificans</i> , <i>Thiobacillus denitrificans</i> , and others
Archaeabacteria	members of Phylum Archaea	Bacteria, denitrifying	
Archaeofructus, extinct plant believed to be the earliest flowering plant	Archaeabacteria, Kingdom Archaea		

<sup>2</sup>There are more than 1,000 varieties of apples, mostly of hybrid origin. The principal ancestors of *Malus pumila* probably include *M. sylvestris*, *M. dasypylla*, and *M. praecox*. Some authorities include *Malus* within the genus *Pyrus* and refer to most cultivated apples as *Pyrus malus*. Others distinguish between the two genera on the basis of leaf pubescence and stone cells within the fruit, referring those cultivars with sparse leaf pubescence and sclereids as *Pyrus* and those with the opposite features as *Malus*.

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Bacteria, dextran	<i>Leuconostoc mesenteroides</i>	Bacteria, pneumonia (some forms of pneumonia are viral)	<i>Streptococcus pneumoniae</i> and others
Bacteria, diphtheria	<i>Corynebacterium diphtheriae</i>	Bacteria, PPLO (mycoplasmas)	<i>Mycoplasma pneumoniae</i>
Bacteria, ensilage	<i>Lactobacillus delbrueckii</i> , <i>L. plantarum</i> , and others	Bacteria, pseudomonad	<i>Pseudomonas</i> spp.
Bacteria, ethanol-producing	<i>Bacillus stearothermophilus</i> (mutant form)	Bacteria, purple nonsulfur	<i>Rhodomicrobium</i> spp., <i>Rhodopseudomonas</i> spp., <i>Rhodospirillum</i> spp.
Bacteria, frost-damage preventing	<i>Pseudomonas syringiae</i>	Bacteria, purple sulfur	<i>Amoebobacter</i> spp., <i>Lamprocystis</i> spp., <i>Rhodothece</i> spp., and others
Bacteria, gas gangrene	<i>Clostridium novyi</i> , <i>C. perfringens</i> , <i>C. septicum</i>	Bacteria, salmonella (food-poisoning bacteria)	<i>Salmonella</i> spp.
Bacteria, giant	<i>Epulopiscium fishelsonii</i>	Bacteria, salt	<i>Halococcus</i> spp., <i>Halobacterium</i> spp.
Bacteria, glutamic acid-producing	<i>Arthrobacter</i> spp., <i>Brevibacterium</i> spp., <i>Micrococcus</i> spp.	Bacteria, sauerkraut	<i>Leuconostoc</i> spp. and others
Bacteria, gonorrhea	<i>Neisseria gonorrhoeae</i>	Bacteria, sorbose	<i>Acetobacter suboxydans</i>
Bacteria, grease- and oil-dissolving	<i>Pseudomonas aeruginosa</i>	Bacteria, spotted fever	<i>Rickettsia rickettsii</i>
Bacteria, green sulfur	<i>Chlorobium</i> spp., <i>Chloropseudomonas</i> spp., <i>Prosthecochloris</i> spp., and others	Bacteria, strep throat	<i>Streptococcus</i> spp.
Bacteria, hot water (Sulfolobus)	<i>Pyrodictium</i> spp.	Bacteria, sulfolobus	<i>Sulfolobus</i> spp., <i>Thermoplasma</i> spp., <i>Thermoproteus</i> spp.
Bacteria, human ulcer-causing	<i>Helicobacter pylori</i>	Bacteria, sulfur	<i>Desulfovibrio</i> spp., <i>Thiobacillus</i> spp., and others
Bacteria, hydrogen	<i>Hydrogenomonas</i> spp.	Bacteria, syphilis	<i>Treponema pallidum</i>
Bacteria, ice-minus	<i>Pseudomonas syringiae</i>	Bacteria, tetanus	<i>Clostridium tetani</i>
Bacteria, iron	<i>Gallionella</i> spp., <i>Sphaerotilus</i> spp.	Bacteria, tularemia	<i>Francisella tularensis</i>
Bacteria, kefir	<i>Lactobacillus bulgaricus</i> , <i>Streptococcus lactis</i>	Bacteria, typhoid fever	<i>Salmonella typhi</i>
Bacteria, lactic acid	<i>Lactobacillus delbrueckii</i> and others	Bacteria, typhus fever	<i>Rickettsia prowazekii</i> and others
Bacteria, Legionnaire's disease	<i>Legionella pneumophila</i>	Bacteria, vinegar	<i>Acetobacter</i> spp.
Bacteria, luminescent	<i>Achromobacter</i> spp., <i>Flavobacterium</i> spp., <i>Photobacterium</i> spp., <i>Pseudomonas</i> spp., <i>Vibrio</i> spp., and others	Bacteria, whooping cough	<i>Bordetella pertussis</i>
Bacteria, meningitis	<i>Neisseria meningitidis</i> and others	Bacteria, yogurt	<i>Streptococcus thermophilus</i>
Bacteria, methane	<i>Methanobacterium</i> spp., <i>Methanococcus</i> spp., <i>Methanosarcina</i> spp., and others	Bald cypress	<i>Taxodium distichum</i>
Bacteria, milky spore disease	<i>Bacillus popilliae</i>	Balsa	<i>Ochroma lagopus</i>
Bacteria, mosquito-killing	<i>Bacillus thuringiensis</i> var. <i>israelensis</i>	Balsam fir	<i>Abies balsamea</i>
Bacteria, nitrate (nitrifying)	<i>Nitrobacter</i> spp.	Bamboo	<i>Bambusa</i> spp., <i>Phyllostachys</i> spp.
Bacteria, nitrite (nitrosifying)	<i>Nitrosomonas</i> spp.	Banana	<i>Musa paradisiaca</i> and others <sup>3</sup>
Bacteria, nitrogen-fixing	<i>Azorhizobium</i> spp., <i>Azotobacter</i> spp., <i>Brachyrhizobium</i> spp., <i>Clostridium pasteurinum</i> , <i>Rhizobium</i> spp., <i>Sinorhizobium</i> spp., and others	Banana Family	<i>Musaceae</i>
Bacteria, paratyphoid fever	<i>Salmonella paratyphi</i>	Banyan tree	<i>Ficus</i> spp.
		Baobab, African	<i>Adansonia digitata</i>
		Baobab, Australian	<i>Adansonia gregorii</i>
		Barbasco	<i>Lonchocarpus nicou</i> var. <i>utilis</i> , <i>Derris elliptica</i> , and others
		Barberry	<i>Berberis verruculosa</i> and other <i>Berberis</i> spp.
		Barberry, Common/European	<i>Berberis vulgaris</i>
		Bark, green algae that inhabit	<i>Protococcus</i> spp. <sup>4</sup>
		Barley	<i>Hordeum vulgare</i>
		Barn swallow	<i>Hirundo rustica erythrogaster</i>

<sup>3</sup>The domestic banana was developed from hybrids between *Musa acuminata* and *M. balbisiana*, and its genetic history is complex. N. W. Simmonds, a recognized authority on the genus *Musa*, believes that only cultivars and not species of domestic banana should be recognized; others prefer to retain Linnaeus's species name of *Musa paradisiaca*.

<sup>4</sup>These algae are known under several names (*Desmococcus*, *Phycoconis*, *Pleurococcus*, *Protococcus*), and uncertainty exists as to which name has priority. The green algal component of certain lichens, *Trebouxia*, also occurs independently on bark.

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Barrel cactus	<i>Ferocactus</i> spp., <i>Mammillaria</i> spp., and others	Big tree	<i>Sequoiadendron giganteum</i>
Barrel cactus, Coville's	<i>Ferocactus covillei</i>	Birch	<i>Betula papyrifera</i> and others
Basil	<i>Ocimum basilicum</i>	Bird's-nest fungus	<i>Crucibulum levis</i>
Basswood	<i>Tilia</i> spp.	Birth control pills, fungi used in manufacture of	
Basswood, American	<i>Tilia americana</i>	Bison	<i>Rhizopus nigricans</i> , <i>R. arrhizus</i>
Bat	<i>Eidolon</i> spp., <i>Epomophorus</i> spp., <i>Leptonycteris sanbornii</i> , and others	Bittersweet	<i>Bison bison</i>
Bay, California (also known as Oregon myrtle)	<i>Umbellularia californica</i>	Blackberry	<i>Celastrus scandens</i>
Bay laurel	<i>Laurus nobilis</i>	Blackbird	<i>Rubus argutus</i> , <i>R. laciniatus</i> , <i>R. procerus</i> , <i>R. ursinus</i> , and others
Bay, sweet	<i>Laurus nobilis</i>	Black bread mold	<i>Euphorbia</i> spp. and others
Beach strawberry	<i>Fragaria chinensis</i>	Black locust	<i>Rhizopus stolonifer</i> and others
Bean, broad	<i>Vicia faba</i>	Black stem rust of wheat	<i>Robinia pseudo-acacia</i>
Bean, castor	<i>Ricinus communis</i>	Bladderwort	<i>Puccinia graminis</i>
Bean Family	Fabaceae (formerly Leguminosae)	Blazing star	<i>Utricularia minor</i> and other
Bean, garbanzo	<i>Cicer arietinum</i>	Bleeding, ground pine used to arrest	<i>Utricularia</i> spp.
Bean, garden	<i>Phaseolus vulgaris</i>	Bleeding heart	<i>Liatris ligulistylis</i>
Bean, green	<i>Phaseolus vulgaris</i>	Bleeding heart, eastern	<i>Lycopodium clavatum</i>
Bean, jequirity	<i>Abrus precatorius</i>	Bleeding heart, Pacific	<i>Dicentra</i> spp.
Bean, kidney	<i>Phaseolus vulgaris</i>	Bloodroot	<i>Dicentra eximia</i>
Bean, lima	<i>Phaseolus lunatus</i>	Blueberry	<i>Dicentra formosa</i>
Bean, mescal—see Mescal bean		Blue curls	<i>Sanguinaria canadensis</i> , <i>S. isabellinus</i>
Bean, Mexican jumping	<i>Sebastiania</i> spp. and others	Blue-green algae—see Cyanobacteria	<i>Vaccinium</i> spp.
Bean, mung	<i>Phaseolus aureus</i> (= <i>Vigna radiata</i> )	Blue-green bacteria—see Cyanobacteria	<i>Trichostema</i> spp.
Bean, navy	<i>Phaseolus vulgaris</i>	Blue jay	
Bean, pinto	<i>Phaseolus vulgaris</i>	Bobcat	<i>Cyanocitta cristata</i>
Bean, scarlet runner	<i>Phaseolus coccineus</i>	Bolete	<i>Felis rufus</i>
Bean, tepary	<i>Phaseolus acutifolius</i> var. <i>latifolius</i>	Bollworm	<i>Boletus</i> spp., <i>Suillus</i> spp., and others
Bean, winged	<i>Psophocarpus tetragonolobus</i>	Bowstring fibers, source of	<i>Pectinopora gossypiella</i>
Bear	<i>Ursus</i> spp. and others	Bowstring hemp, source of	<i>Sansevieria metalaea</i>
Bear, polar	<i>Thalarctos maritimus</i>	Box elder	<i>Sansevieria</i> spp.
Bearberry (Kinnikinnick)	<i>Arctostaphylos uva-ursi</i>	Boysenberry	<i>Acer negundo</i>
Beaver, mountain	<i>Aplodontia rufa</i>	Bracken fern	<i>Rubus</i> hybrids, with <i>R. ursinus</i> as one parent
Bedstraw	<i>Galium</i> spp.	Brazil nut	<i>Pteridium aquilinum</i>
Bee, honey	<i>Apis mellifera</i>	Breadfruit	<i>Bertholettia excelsa</i>
Beech, American	<i>Fagus grandifolia</i>	Bridalwreath	<i>Artocarpus altilis</i>
Beefsteak morel	<i>Gyromitra</i> sp.	Broccoli	<i>Spiraea vanhouttei</i> hybrids and others
Beet, garden	<i>Beta vulgaris</i>	Bromeliad ("Air plant")	<i>Brassica oleracea</i> var. <i>botrytis</i>
Beet, sugar	<i>Beta vulgaris</i> (horticulturally selected strains)	Broomrape	Member of the Bromeliad Family ( <i>Bromeliaceae</i> ) <sup>5</sup>
Beetle	member of Order Coleoptera, Class Insecta, Phylum Arthropoda, Kingdom Animalia	Brown algae	<i>Orobanche</i> spp.
Beetle, scarab	member of Family Scarabaeidae—see Beetle		Member of Phylum Chromophyta, Kingdom Protista. Representative genera include <i>Ascophyllum</i> , <i>Durvillea</i> , <i>Ecklonia</i> , <i>Ectocarpus</i> , <i>Hizikia</i> , <i>Laminaria</i> , <i>Undaria</i> , and others
Begonia	<i>Begonia</i> spp.		<i>Brassica oleracea</i> var. <i>gemmifera</i>
Belladonna, source of	<i>Atropa belladonna</i>		
Bermuda grass	<i>Cynodon dactylon</i>		
Betel nut	<i>Areca catechu</i>	Brussels sprouts	
Betony, wood	<i>Pedicularis canadensis</i>		

<sup>5</sup>There are more than 2,000 species of bromeliads, which include pineapple (*Ananas comosus*), Spanish moss (*Tillandsia usneoides*), and many popular house plants in genera such as *Aechmea*, *Bilbergia*, *Cryptanthus* (not to be confused with *Cryptantha*, which is in the Boraginaceae), *Neoregelia*, *Nidularium*, *Quesnelia*, and *Vriesia*.

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Bryophyte (see also individual listings)	member of Phyla Anthocerotophyta, Hepaticophyta, or Bryophyta, Kingdom Plantae	California poppy	<i>Eschscholzia californica</i> <sup>6</sup>
Bryopsid	member of Phylum Chlorophyta, Kingdom Protista	Camel	<i>Camelus</i> spp.
Bt	<i>Bacillus thuringiensis</i>	Camelina	<i>Camelina sativa</i>
Buckeye	<i>Aesculus</i> spp.	Camellia <sup>7</sup>	<i>Camellia</i> spp. <sup>7</sup>
Buckwheat	<i>Fagopyrum esculentum</i>	Camphor, source of	<i>Cinnamomum camphora</i>
Buffalo	<i>Bison bison</i>	Candelilla	<i>Euphorbia antisyphilitica</i>
Bullhorn acacia	<i>Acacia cornigera</i>	Candlenut	<i>Aleurites moluccana</i>
Bunchberry	<i>Cornus canadensis</i>	Cankerworm	<i>Alsophila pometaria</i> and others
Burn treatment, horsetail source of ashes for	<i>Equisetum hyemale</i> and others	Canna	<i>Canna edulis</i> and other <i>Canna</i> spp. and hybrids
Butcher's broom	<i>Ruscus aculeata</i>	Cantaloupe	<i>Cucumis melo</i>
Buttercup	<i>Ranunculus</i> spp.	Caraway	<i>Carum carvi</i>
Buttercup, European bulbous	<i>Ranunculus bulbosa</i>	Cardamon/Cardamom	<i>Elettaria cardamomum</i>
Buttercup Family	Ranunculaceae	Caribou	<i>Rangifer tarandus</i>
Butterfly	member of Superfamily Papilionoidea, Order Lepidoptera, Phylum Arthropoda, Kingdom Animalia	Carnation	<i>Dianthus caryophyllus</i>
Butterwort	<i>Pinguicula grandiflora</i> , <i>P. vulgaris</i> , and other <i>Pinguicula</i> spp.	Carnauba wax, source of	<i>Stipa tenacissima</i>
Button snakeroot	<i>Eryngium</i> spp.	Carnauba wax, source of	<i>Copernicia cerifera</i>
Cabbage (green or red)	<i>Brassica oleracea</i> var. <i>capitata</i>	Carob	<i>Ceratonia siliqua</i>
Cabbage, Chinese	<i>Brassica chinensis</i>	Carpetweed Family	Molluginaceae
Cabbage Family	Brassicaceae (formerly Cruciferae)	Carrot	<i>Daucus carota</i>
Cabbage looper	<i>Trichoplusia ni</i>	Carrot Family	Apiaceae (formerly Umbelliferae)
Cabbage worm	<i>Pieris rapae</i>	Cashew	<i>Anacardium occidentale</i>
Cacao	<i>Theobroma cacao</i>	Cassava	<i>Manihot esculenta</i>
Cactus	<i>Hamatocactus setispinus</i>	Cassia <sup>8</sup>	<i>Cinnamomum cassia</i> <sup>8</sup>
Cactus, barrel	<i>Mammillaria</i> spp., <i>Ferocactus</i> spp., and others	Catalpa	<i>Catalpa</i> spp.
Cactus, cholla	<i>Opuntia</i> spp. (cylindrical forms)	Caterpillar	larval stage of member of Order Lepidoptera, Phylum Arthropoda, Kingdom Animalia
Cactus family	Cactaceae	Catnip	<i>Nepeta cataria</i>
Cactus, giant saguaro	<i>Carnegia gigantea</i>	Cattail	<i>Typha</i> spp.
Cactus, hedgehog	<i>Echinocereus</i> spp. and others	Cattle—see Cow	
Cactus, living rock	<i>Ariocarpus fissuratus</i> and others	Cauliflower	
Cactus, organ-pipe	<i>Lemaireocereus</i> spp.	Caussu wax, source of	<i>Brassica oleracea</i> var. <i>botrytis</i>
Cactus, prickly pear	<i>Opuntia</i> spp.	Cedar, Atlantic white	(= <i>B. oleracea</i> var. <i>cauliflora</i> ) <sup>9</sup>
Cajuput, source of	<i>Melaleuca cajuputi</i>	Cedar, eastern red	<i>Calathea lutea</i>
Calabash	<i>Lagenaria siceraria</i>	Cedar, incense	<i>Chamaecyparis thyoides</i>
Calabazilla	<i>Cucurbita foetidissima</i>	Cedar, northern white	<i>Juniperus virginiana</i>
California bay (also known as Oregon myrtle)	<i>Umbellularia californica</i>	Cedar, southern white	<i>Calocedrus decurrens</i>
		Cedar, western red	<i>Thuja occidentalis</i>
		Celery, Celericac	<i>Chamaecyparis thyoides</i>
		Cell-from-hell (dinoflagellate)	<i>Thuya plicata</i>
		Cellular slime mold	<i>Apium graveolens</i>
		Century plant	<i>Pfiesteria piscicida</i>
			member of Phylum Dictyosteliomycota, Kingdom Protista
			<i>Agave americana</i> and others

<sup>6</sup>Although the generic name was given in honor of Johann Friedrich Eschscholtz, an early 19th-century German naturalist and surgeon, the name was first published as *Eschscholzia*, making the spelling *Eschscholtzia* an orthographic variant.

<sup>7</sup>More than 80 species of *Camellia* and 2,000 horticultural varieties are recognized, with most of the ornamental varieties having been derived from *C. japonica* and *C. sasanqua*. The late George Petersen of Chico, California, produced 700 of the horticultural varieties. Other important members of the genus include *C. sinensis* (tea), and *C. oleifera*, whose seeds yield tea tree oil.

<sup>8</sup>This should not be confused with the genus *Cassia*, the source of senna in the Legume Family, or cassie, a perfume oil whose source is *Acacia farnesiana*, another member of the Legume Family.

<sup>9</sup>Cauliflower and broccoli are two different forms of the same variety.

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Chamise	<i>Adenostoma fasciculatum</i>	Coastal redwood	<i>Sequoia sempervirens</i>
Chara	<i>Chara</i> spp.	Cobra plant	<i>Darlingtonia californica</i>
Chard	<i>Beta vulgaris</i> var. <i>cicla</i>	Coca/Cocaine, source of	<i>Erythroxylum</i> (often misspelled <i>Erythroxylon</i> ) <i>coca</i> .
Cheese bacteria—see Bacteria, buttermilk			<i>E. novogratvicense</i> is a lesser source.
Cheese fungi	<i>Penicillium camembertii</i> (for Camembert cheese), <i>P. roquefortii</i> (for blue, Gorgonzola, Roquefort, and Stilton cheeses)	Cochineal insect	<i>Dactylopius coccus</i>
Cherry, sour	<i>Prunus cerasus</i>	Cocklebur	<i>Xanthium strumarium</i>
Cherry, sweet	<i>Prunus avium</i>	Cockroach	<i>Blatta orientalis</i> , <i>Blatella germanica</i> , and others
Chestnut, American	<i>Castanea dentata</i>	Cockroach plant	<i>Haplophyton cimicidum</i>
Chia	<i>Salvia columbariae</i>	Cockscomb	<i>Celosia</i> spp.
Chickadee, mountain	<i>Parus gambeli</i>	Coffee, Arabian	<i>Coffea arabica</i>
Chickpea	<i>Cicer arietinum</i>	Coffee, Liberian	<i>Coffea liberica</i>
Chickweed (Himalayan)	<i>Stellaria decumbens</i>	Coffee, robusta	<i>Coffea canephora</i>
Chicle, source of	<i>Manilkara zapota</i>	Coffee Family	
Chicory	<i>Cichorium intybus</i>	(= Madder Family)	Rubiaceae
Chimpanzee	<i>Pan troglodytes</i> and others	Coleus	<i>Coleus blumei</i> , <i>C. x hybrida</i> , and others
China grass	<i>Boehmeria nivea</i>	Columbine	<i>Aquilegia formosa</i> , <i>Aquilegia</i> spp.
Chinese vegetable tallow	<i>Sapium sebiferum</i>	Compass plant	<i>Lactuca serriola</i> ; ( <i>Silphium laciniatum</i> is also known as Compass plant)
Chipmunk	<i>Eutamias</i> spp., <i>Tamias</i> spp., and others	Coneflower	<i>Rudbeckia</i> sp.
Chlamydomonas	<i>Chlamydomonas</i> spp.	Coneflower, Asian	<i>Strobilanthes</i> spp.
Chloroxybacteria	member of Chloroxybacteria, Phylum Eubacteria, Kingdom Bacteria	Copal, sources of	<i>Agathis alba</i> , <i>Copaifera demeussei</i> , <i>Hymenea coubaril</i> , <i>Trachylobium verrucosum</i> , and others
Chocolate, source of	<i>Theobroma cacao</i>	Copperhead	<i>Ancistrodon contortrix</i>
Chokecherry	<i>Prunus virginiana</i> var. <i>melanocarpa</i>	Coral tree	<i>Erythrina crista-galli</i>
Cholla (cactus)	<i>Opuntia</i> spp. (cylindrical forms)	Cordage fibers, source of	<i>Agave sisalina</i> , <i>A. heterocantha</i> , <i>A. lophantha</i> , <i>Phormium tenax</i> , and others
Christmas flower	<i>Euphorbia pulcherrima</i>	Coriander	<i>Coriandrum sativum</i>
Chrysanthemum	About 160 spp.; many garden cultivars are hybrids of <i>Chrysanthemum frutescens</i> and <i>C. morifolium</i>	Corn (Maize)	<i>Zea mays</i>
Chuckwalla	<i>Sauromalus obesus</i>	Corn borer, European	<i>Pyrausta nubialis</i>
Chufa	<i>Cyperus esculentus</i>	Corpse flower	<i>Amorphophallus titanum</i>
Chytrid	<i>Allomyces arbusculus</i> and many other members of Phylum Chytridiomycota, Kingdom Fungi	Cotton	<i>Gossypium arboreum</i> , <i>G. barbadense</i> , <i>G. herbaceum</i> , <i>G. hirsutum</i> , <i>G. raimondii</i>
Cilantro	<i>Coriandrum</i> sp.	Cottonwood	<i>Populus deltoides</i> , <i>P. fremontii</i> , and others
Cinnamon, cassia	<i>Cinnamomum cassia</i> , <i>C. burmannii</i> , <i>C. loureii</i>	Cow	<i>Bos</i> sp.
Cinnamon, true	<i>Cinnamomum zeylanicum</i>	Cow parsnip	<i>Heracleum lanatum</i>
Citic acid, fungal producers of	<i>Aspergillus niger</i> and others	Cowslip	<i>Caltha palustris</i>
Citronella oil, source of	<i>Cymbopogon nardus</i>	Crab apple	<i>Crataegus</i> spp., <i>Malus coronaria</i> (= <i>Malus sylvestris</i> ?)
Citrus	<i>Citrus</i> spp.	Crabgrass	<i>Digitaria sanguinalis</i>
Citrus Family	<i>Rutaceae</i>	Cranberry, American	<i>Vaccinium macrocarpon</i>
Cladophora	<i>Cladophora</i> spp.	Cress, garden	<i>Lepidium sativum</i> , <i>Barbarea verna</i> , and others
Clematis	<i>Clematis</i> spp.	Cress, rock	<i>Arabis</i> spp.
Clover	<i>Trifolium</i> spp.	Crocus, autumn/fall	<i>Colchicum autumnale</i> and other <i>Crocus</i> spp.
Clover, bur	<i>Medicago polymorpha</i>	Crown of thorns	<i>Euphorbia milii</i> var. <i>splendens</i> and others
Cloves	<i>Syzygium aromaticum</i> (formerly <i>Eugenia caryophyllus</i> )		
Club fungus	member of Phylum Basidiomycota, Kingdom Fungi		
Club moss	member of Phylum Lycophyta, Kingdom Plantae		

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Crozier, tropical tree fern	<i>Sadleria cyatheoides</i>	Dinoflagellate	member of Phylum Dinophyta, Kingdom Protista. Representative genera include <i>Gambierdiscus</i> , <i>Gonyaulax</i> , and <i>Gymnodinium</i>
Crustacean	member of Class Crustacea, Phylum Arthropoda, Kingdom Animalia		
Cryptomonad	member of Phylum Cryptophyta, Kingdom Protista	Dinoflagellate, midnight-bioluminescent	<i>Gonyaulax polyedra</i>
Cucumber	<i>Cucumis sativus</i>	Dischidia	<i>Dischidia rafflesiana</i>
Cucumber, squirting	<i>Ecballium elaterium</i>	Divi-divi	<i>Caesalpinia coriaria</i>
Cyanobacteria	member of Kingdom Bacteria; common genera include <i>Anabaena</i> , <i>Lyngbya</i> , <i>Oscillatoria</i> , <i>Phormidium</i> , <i>Schizothrix</i> , and <i>Spirulina</i>	Dodder	<i>Cuscuta</i> spp.
Cyanobacteria, Lake Chad edible	<i>Spirulina</i> sp.	Dogbane	<i>Apocynum</i> spp.
Cyanobacteria, Red Sea	<i>Trichodesmium erythraeum</i>	Dogwood	<i>Cornus</i> spp.
Cyanobacteria, thermal	<i>Bacillusiphon induratus</i> , <i>Synechococcus</i> spp., and others	Douglas fir	<i>Pseudotsuga menziesii</i>
Cycad	<i>Cycas</i> sp., <i>Dioon edule</i> , <i>Encephalartos altensteinii</i>	Dove	member of Family Columbidae, Class Aves, Phylum Vertebrata, Kingdom Animalia
Cycadeoid (extinct gymnosperm with palmlike leaves)	<i>Cycadeoidea</i> and other genera	Dove, mourning	<i>Zenaidura macroura</i>
Cyclamen	<i>Cyclamen</i> spp.	Downy mildew of grape	<i>Plasmopora viticola</i>
Cypress	<i>Cupressus</i> spp.	Dragon's blood	<i>Dracaena</i> spp., <i>Daemonorops</i> spp.
Cypress, bald	<i>Taxodium distichum</i>	Drimys	<i>Drimys winteri</i> and other <i>Drimys</i> spp.
Daffodil	<i>Narcissus</i> spp. (see note under <i>Narcissus</i> )	Duckweed	<i>Lemna</i> spp., <i>Wolffia</i> spp., and others
Dahlia	<i>Dahlia</i> spp.	Dulse	<i>Rhodymenia</i> spp.
Daisy	<i>Dimorphotheca</i> spp., <i>Layia</i> spp., and others	Dung mosses (on dung of carnivores)	<i>Tayloria</i> spp.
Daisy fleabane	<i>Erigeron</i> spp.	Dung mosses (on dung of herbivores)	<i>Splachnum</i> spp.
Dandelion	<i>Taraxacum officinale</i> (Scandinavia only), elsewhere, <i>Taraxacum</i> sp. aff.	Dutch elm disease, causal agent of	<i>Ophiostoma ulmi/O. nova-ulmi</i>
Dandruff, fern(s) used in treatment of Date	<i>Adiantum capillus-veneris</i> , <i>Polystichum munitum</i> , <i>Phoenix dactylifera</i>	Dutchman's breeches	<i>Dicentra cucullaria</i>
DDT-like compound, algal producers of	<i>Laurencia</i> spp. and others	Dyer's woad	<i>Isatis tinctoria</i>
Death angel (Death cap)	<i>Amanita</i> spp.	Dyes, sources of—see listing in Appendix 3	
Deer	<i>Odocoileus</i> spp. and others	Eagle, golden	<i>Aquila chrysaetos</i>
Deer, mule	<i>Odocoileus hemionus</i>	Earth star	<i>Astraeus</i> spp., <i>Geaster</i> spp., and others
Dendrobium (orchid)	<i>Dendrobium</i> spp. and hybrids	Earthworm	<i>Lumbricus</i> spp. and others
Desmids	<i>Closterium</i> spp., <i>Cosmarium</i> spp., and others	Ebony	<i>Diospyros ebenum</i>
Destroying angel	<i>Amanita virosa</i>	Eelworm (nematode)	member of Class Nematoda, Phylum Aschelminthes, Kingdom Animalia
Dewberry	<i>Rubus</i> hybrids with <i>R. ursinus</i> as one parent	Eelworm (nematode) fungi, those that trap with constricting rings	<i>Dactylaria</i> spp., <i>Arthrobotrys acetyloides</i>
Diatom	<i>Biddulphia</i> spp., <i>Cymbella</i> spp., <i>Navicula</i> spp., <i>Cymatopleura solea</i>	Eelworm (nematode) fungi, those that trap with passive rings	
	<i>Thalassiosira elsayedii</i> , <i>Delphineis karstenii</i> , <i>Pseudonitzchia australis</i> , and many others	Eggplant	<i>Dactyliella</i> spp.
Dicot	member of Class Magnoliopsida, Phylum Magnoliophyta, Kingdom Plantae	Elderberry, common	<i>Solanum melongena</i>
Digitalis, source of Dill	<i>Digitalis purpurea</i> , <i>D. lanata</i>	Elephant	<i>Sambucus canadensis</i>
	<i>Anethum graveolens</i>	Elephant ears	<i>Elephas</i> spp., <i>Loxodonta</i> spp.
		Elk	<i>Colocasia</i> spp.
		Elm, American	<i>Cervus canadensis</i>
		Elm bark beetle	<i>Ulmus americana</i>
		Endive	<i>Hylurgopinus rufipes</i> , <i>Scolytus multistriatus</i>
		Endive, Belgian	<i>Cichorium endivia</i> spp. <i>divaricatum</i>
		Ergot	<i>Cichorium intybus</i>
		Ermine	<i>Claviceps purpurea</i>
		E. coli	<i>Mustela erminea</i>
		Eucalyptus, source of bark/wood for tannins	<i>Escherichia coli</i>
			<i>Eucalyptus wandoo</i>

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Eucalyptus, Tasmanian giant	<i>Eucalyptus regnans</i>	Fern(s) used as laxative	<i>Asplenium trichomanes, Polypodium vulgare</i>
Eucalyptus oil, source of	<i>Eucalyptus</i> spp.; there are more than 250 spp. of <i>Eucalyptus</i>	Fern used in treating leprosy	<i>Marsilea quadrifolia</i>
Euglenoid	member of Phylum Euglenophyta, Kingdom Protista	Fern, licorice	<i>Polygonum glycyrrhiza</i>
Fennel	<i>Foeniculum vulgare</i>	Fern(s) poisonous to livestock	<i>Onoclea sensibilis, Pteridium aquilinum</i>
Fenugreek	<i>Trigonella foenum-graecum</i>	Fern, edible Malaysian (relative of Lady fern)	<i>Athyrium esculentum</i>
Fern(s), adder's tongue	<i>Ophioglossum</i> spp.	Fern, male	<i>Dryopteris filix-mas</i>
Fern, a má'u má'u	<i>Sadleria cyanthoeides</i>	Fern, marsh	<i>Thelypteris</i> sp.
Fern(s), amphibious	<i>Marsilea</i> spp. and others	Fern, mosquito	<i>Azolla caroliniana</i>
Fern(s), aquatic (floating)	<i>Azolla</i> spp., <i>Salvinia</i> spp.	Fern, nest	<i>Asplenium nidus</i>
Fern(s), source of astringent	<i>Actiniopteris radiata, Drynaria quercifolia, Pteridium aquilinum</i> , and others	Fern used to arrest nosebleeds	<i>Pellaea mucronata</i>
Fern, bird's-foot	<i>Pellaea mucronata</i>	Fern(s) used for orchid bark	<i>Cibotium</i> spp., <i>Osmunda</i> spp.
Fern, bird's-nest	<i>Asplenium nidus</i>	Fern, Oriental water	<i>Ceratopteris thalictroides</i>
Fern, Boston	<i>Nephrolepis exaltata</i>	Fern, ostrich	<i>Matteuccia struthiopteris</i>
Fern, bracken	<i>Pteridium aquilinum</i>	Fern used as poison antidote	<i>Polystichum squarrosum</i>
Fern, Brazilian tree	<i>Cyathea</i> sp.	Fern(s) used in treating rickets	<i>Asplenium ruta-muraria, Osmunda regalis</i>
Fern used in treating burns	<i>Polystichum munitum</i>	Fern(s) used for stuffing mattresses, pillows, upholstery	<i>Cibotium</i> spp., <i>Sadleria</i> spp.
Fern, chain	<i>Woodwardia fimbriata</i>	Fern, sword	<i>Polystichum munitum</i>
Fern, cinnamon	<i>Osmunda cinnamomea</i>	Fern used in treating toothache	<i>Pentagramma triangularis</i>
Fern, climbing (Asian)	<i>Lygodium salicifolium</i>	Fern, tree	<i>Cyathea</i> spp., <i>Ctenitis</i> spp., <i>Dicksonia</i> spp., <i>Marattia</i> spp., <i>Sphaeropteris</i> spp., and others
Fern(s) used in treating coughs	<i>Adiantum aethiopicum, A. lunulatum, Polypodium glycyrrhiza</i>	Fern, tropical	<i>Dicranopteris linearis</i>
Fern(s) used in treating dandruff	<i>Adiantum capillus-veneris, Polystichum munitum</i>	Fern, tropical tree	<i>Cibotium</i> sp.
Fern used in treating diabetes	<i>Adiantum caudatum</i>	Fern used for expelling worms	<i>Dryopteris filix-mas</i>
Fern(s) used in treating diarrhea	<i>Botrychium lunaria, B. ternatum, Pteridium aquilinum</i> , and others	Fern(s) used for treating wounds	<i>Lygodium circinatum, Ophioglossum vulgatum</i>
Fern(s) used as diuretic	<i>Adiantum venustum, Lygodium japonicum</i>	Fevers, fern used to reduce	<i>Marsilea quadrifolia</i>
Fern(s) source of dyes	<i>Sadleria cyatheoides</i> (trunk), <i>Sphenomeris chusana</i> (fronds)	Fevers, ground pine used to reduce	<i>Lycopodium clavatum</i>
Fern used in treating eczema	<i>Lygodium flexuosum</i>	Fig, common	<i>Ficus carica</i>
Fern used in treating eye diseases		Fig, tropical	<i>Ficus macrophyllus, Ficus</i> spp.
Fern used to reduce fevers	<i>Asplenium adiantum-nigrum</i>	Figwort Family	Scrophulariaceae
Fern, five-finger	<i>Marsilea quadrifolia</i>	Filaree	<i>Erodium</i> spp.
Fern(s) used as food	<i>Adiantum pedatum</i>	Fir, balsam	<i>Abies balsamea</i>
Fern(s), fossil	<i>Athyrium filix-femina, Dryopteris austriaca, D. filix-mas, Polystichum munitum</i> , and others	Fir, Douglas	<i>Pseudotsuga menziesii</i>
Fern, gold-back	<i>Psaronius</i> spp., <i>Thamnopteris</i> spp., and others	Fir, white	<i>Abies concolor</i>
Fern(s), Hawaiian tree	<i>Pentagramma triangularis</i>	Fireweed	<i>Epilobium angustifolium</i>
Fern, holly	<i>Cibotium</i> spp., <i>Sadleria</i> spp.	Fish	member of Class Pisces, Phylum Vertebrata, Kingdom Animalia
Fern(s) used by hummingbirds	<i>Polystichum lonchitis</i>	Fish, flashlight	<i>Anomalops katoptron, Photoblepharon palpebratus</i>
Fern used for treating insect stings and bites	<i>Cyathea arborea, Lophosoria quadripinnata, Nephelea mexicana</i>	Fish molds	<i>Saprolegnia</i> spp. and others
Fern used for easing labor pains	<i>Adiantum capillus-veneris</i>		
Fern, lady	<i>Athyrium filix-femina</i>		
	<i>Athyrium filix-femina</i>		

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Flashlight powder, ground pine source of	<i>Lycopodium</i> spp.	Fungi, hallucinogenic	<i>Amanita muscaria</i> , <i>Conocybe</i> spp., <i>Panaeolus</i> spp., <i>Psilocybe</i> spp., and others
Flatworm	<i>Convoluta roscoffensis</i>	Fungi, horse dung	<i>Pilobolus</i> spp.
Flax	<i>Linum</i> spp.	Fungi, industrial alcohol-producing	
Flax, New Zealand	<i>Phormium tenax</i>	Fungi, insect-parasitizing	<i>Aspergillus</i> spp.
Flea	member of Order Siphonaptera, Phylum Arthropoda, Kingdom Animalia		members of Order Laboulbeniales, Phylum Ascomycota, Kingdom Fungi, and others
Flicker	<i>Colaptes</i> spp.		
Florida arrowroot	<i>Zamia integrifolia</i>	Fungi, meat-tenderizing	<i>Thamnidium</i> spp.
Flour, Hopi Indian horsetail source of	<i>Equisetum laevigatum</i>	Fungi, ringworm	<i>Epidermophyton</i> spp., <i>Microsporium</i> spp., <i>Trichophyton</i> spp.
Flowerpot leaf plant	<i>Dischidia rafflesiana</i>	Fungi, shoyu	<i>Aspergillus oryzae</i> , <i>A. soyae</i>
Fly	member of Order Diptera, Phylum Arthropoda, Kingdom Animalia	Fungi used in silvering of mirrors	
Fly agaric	<i>Amanita muscaria</i>	Fungi used in manufacturing soap	<i>Aspergillus</i> spp.
Flycatcher	<i>Empidonax</i> spp., <i>Myiarchus</i> spp., and others	Fungi, soil	<i>Penicillium</i> spp.
Fly, tsetse	<i>Gossinia morsitans</i> , <i>G. palpalis</i>	Fungi, soy sauce	<i>Fusarium</i> spp., and others
Fly, white	<i>Aleurocanthus woglumi</i> and others	Fungi, sufu	<i>Aspergillus oryzae</i> , <i>A. soyae</i>
Fossil, compression	<i>Annularia radiata</i>	Fungi, teonanacatl (sacred)	<i>Actinomucor elegans</i> , <i>Mucor</i> spp.
Fossil, ground pine ( <i>Lycopodium</i> )	<i>Lepidodendron</i>	Fungus, bolete	<i>Conocybe</i> spp., <i>Panaeolus</i> spp., <i>Psilocybe</i> spp., and others
Four-o'clock Family	<i>Nyctaginaceae</i>	Fungus, bracket/shelf	<i>Serillus pungens</i>
Fox, arctic	<i>Alopex lagopus</i>	Fungus, downy mildew of grape	<i>Grifola sulphurea</i>
Fox, gray	<i>Urocyon cinereoargentus</i>	Fungus, "foolish seedling" (of rice)	
Fox, red	<i>Vulpes fulva</i>	Fungus used in Beadle & Tatum genetic experiments	<i>Plasmopora viticola</i>
Foxglove	<i>Digitalis purpurea</i>	Fungus, jelly	<i>Gibberella fujikuroi</i>
Frangipanni	<i>Plumeria rubra</i> and other		
Frog	<i>Plumeria</i> spp.	Fungus, kidney bean leaf (production of fungal inhibitors stimulator)	<i>Neurospora crassa</i>
Fruit fly, common	<i>Rana</i> spp., and others	Fungus, miso	<i>Auricularia</i> spp., <i>Exidia</i> spp., <i>Tremella</i> spp., and others
Fuchsia	<i>Drosophila melanogaster</i> (there are many other species of fruit fly)	Fungus, causal agent of Panama disease (of bananas)	
Fuchsia, California	<i>Fuchsia</i> spp.	Fungus used in producing plastics	<i>Colletotrichum lindemuthianum</i>
Fumitory, Himalayan	<i>Epilobium canum</i>	Fungus, tempeh	<i>Aspergillus oryzae</i>
Fungi that produce antibiotics	<i>Corydalis gerdae</i>	Fungus used in manufacturing toothpaste	
Fungi that cause aspergilloses	<i>Penicillium</i> spp., <i>Cephalosporium</i> spp., and others	Fungus, white piedra	<i>Fusarium oxysporum</i>
Fungi that cause athlete's foot	<i>Aspergillus fumigatus</i> , <i>Candida albicans</i> , <i>Coccidioides immitis</i> , and others	Fungus used in manufacturing yellow food-coloring agent	<i>Aspergillus terreus</i>
Fungi used by beetles for food	<i>Trichophyton</i> spp.	Funori, source of	<i>Rhizopus oligosporus</i>
Fungi, bird's-nest	<i>Ambrosiella</i> spp., <i>Monilia</i> spp.	Fur, green algae that inhabit animals	
Fungi used in manufacturing birth control pills	<i>Nidularia</i> spp., <i>Crucibulum levii</i>	Gentian, source of	<i>Aspergillus niger</i>
Fungi, cap-thrower	<i>Rhizopus nigricans</i> , <i>R. arrhizus</i>		<i>Trichosporon beigeli</i>
Fungi, cheese	<i>Pilobolus</i> spp.		
	<i>Penicillium camembertii</i> (for Camembert cheese), <i>P. roquefortii</i> (for blue, Gorgonzola, Roquefort, and Stilton cheeses)		<i>Blakeslea trispora</i>
Fungi, flavor-producing	<i>Aspergillus</i> spp.		<i>Gloiopeltis</i> spp.
			<i>Trentepohlia</i> spp.
			<i>Gentiana</i> spp.

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Geranium	<i>Geranium</i> spp., <i>Pelargonium</i> spp.	Ground pine used as intoxicant	<i>Lycopodium selago</i>
Geranium Family	<i>Geraniaceae</i>	Ground pine used for ornaments	<i>Lycopodium clavatum</i> , <i>L. complanatum</i> , <i>L. obscurum</i> , and other <i>Lycopodium</i> spp.
Gila monster	<i>Heloderma suspectum</i>	Ground pine used to reduce fevers	<i>Lycopodium clavatum</i>
Ginger	<i>Zingiber officinale</i> and others	Ground pine, fossil relatives of	<i>Baragwanathia</i> spp., <i>Drephanophycus</i> spp., <i>Protolepidodendron</i> spp., and others
Ginseng, source of	<i>Panax quinquefolium</i> and others	Guava	<i>Psidium guajava</i>
Giraffe	<i>Giraffa camelopardalis</i>	Gum arabic, source of	<i>Acacia senegal</i>
Gladiolia/Gladiolus	<i>Gladiolus</i> spp.	Gum tragacanth, source of	<i>Astragalus echidnaeformis</i> , <i>A. gossypinus</i> , <i>A. gummifer</i> , and others
Gloeocapsa	<i>Gloeocapsa</i> spp.	Guppy	<i>Lebistes reticulatus</i>
Goat	<i>Capra</i> spp.	Hairy cap moss	<i>Polytrichum commune</i>
Goldback fern	<i>Pentagramma triangularis</i>	Haptophyte	member of Phylum Prymnesiophyta, Kingdom Protista
Golden brown algae	members of Phylum Chromophyta, Kingdom Protista	Hawk	<i>Buteo</i> spp., <i>Falco</i> spp., and others
Golden chain tree	<i>Laburnum anagyroides</i>	Hazelnut	<i>Corylus</i> spp.
Goldenrod	<i>Solidago</i> spp.	Hazelnut, European	<i>Corylus avellana</i>
Goldenseal	<i>Hydrastis canadensis</i>	Heath	<i>Erica</i> spp. and others
Goldenweed	<i>Haplopappus gracilis</i> <sup>10</sup>	Heath Family	Ericaceae
Goose	<i>Branta</i> spp. and others	Hemlock, eastern	<i>Tsuga canadensis</i>
Gooseberry	<i>Ribes</i> spp.	Hemlock, mountain	<i>Tsuga mertensiana</i>
Goosefoot Family	<i>Chenopodiaceae</i>	Hemlock, poison	<i>Conium maculatum</i>
Gopher plant	<i>Euphorbia lathyrus</i> ( <i>E. lathyris</i> = <i>E. lathyrus</i> )	Hemlock, water	<i>Cicuta</i> spp.
Gopher, pocket	<i>Geomys bursarius</i> , <i>Thomomys</i> spp., and others	Hemlock, western	<i>Tsuga heterophylla</i>
Gourd	<i>Lagenaria siceraria</i> and others	Hemp	<i>Cannabis sativa</i>
Grape	<i>Vitis</i> spp.	Hemp, Manila	<i>Musa textilis</i>
Grape, wine/table	<i>Vitis vinifera</i>	Hemp, Mauritius	<i>Furcraea gigantea</i>
Grapefruit	<i>Citrus paradisi</i>	Henbit	<i>Lamium amplexicaule</i>
Grass (including lawn grasses)	<i>Bromus</i> spp. and others <sup>11</sup>	Henna	<i>Lawsonia inermis</i>
Grass, Bermuda	<i>Cynodon dactylon</i>	Hepatica	<i>Hepatica americana</i> , <i>Hepatica</i> spp.
Grass, crested wheat	<i>Agropyron cristatum</i>	Hickory	<i>Carya</i> spp.
Grass, Indian	<i>Sorghastrum nutans</i>	Hog	<i>Sus scrofa</i> , and others
Grass, pampas	<i>Cortaderia selloana</i>	Hog fennel	<i>Lomatium</i> spp.
Grass Family	Poaceae (formerly Gramineae)	Holly, American	<i>Ilex opaca</i>
Grass tree (Australian)	<i>Xanthorrhaea</i> spp.	Honey bee	<i>Apis mellifera</i>
Gray pine <sup>12</sup>	<i>Pinus sabiniana</i>	Hop hornbeam	<i>Ostrya virginiana</i>
Green algae	member of Phylum Chlorophyta, Kingdom Protista; representative genera include <i>Caulerpa</i> , <i>Chlorella</i> , <i>Codium</i> , <i>Dunaliella</i> , <i>Enteromorpha</i> , <i>Hydrodictyon</i> , <i>Microcystis</i> , <i>Pandorina</i> , <i>Pithophora</i> , <i>Scenedesmus</i> , <i>Spirogyra</i> , <i>Tetraselmis</i> ; there are more than 200 genera and about 7,500 species	Hops	<i>Humulus lupulus</i>
Greenbrier	<i>Smilax</i> spp.	Horehound	<i>Marrubium vulgare</i>
Ground pine	<i>Lycopodium</i> spp.	Hornwort	<i>Anthoceros</i> spp.
Ground pine used for baby powder	<i>Lycopodium clavatum</i>	Horse	<i>Equus caballus</i>
Ground pine used to arrest bleeding	<i>Lycopodium clavatum</i>	Horse chestnut	<i>Aesculus hippocastanum</i>
		Horsetail	<i>Equisetum hyemale</i> , <i>Equisetum telmateia</i> , <i>Equisetum</i> spp.
		Horsetail used as abrasive	<i>Equisetum</i> (all spp.)

<sup>10</sup>This species has a diploid number of  $2x = 4$ ; i.e., each body cell has four chromosomes.<sup>11</sup>The Grass Family (Poaceae) comprises about 4,500 species of grasses. Some plants with grass in their name are in other families and are not true grasses, e.g., Grass of parnassus (*Parnassia californica*); Grass pink (*Petalostylis dubia*).<sup>12</sup>Gray pines were formerly known as Digger pines. The common name was changed in deference to Native Americans who consider *digger* a derogatory term.

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Horsetail used as astringent	<i>Equisetum arvense</i> , <i>E. debile</i> , and other <i>Equisetum</i> spp.	Jacaranda	<i>Jacaranda</i> spp.
Horsetail used for treating burns	<i>Equisetum hyemale</i> and others	Jaeger	<i>Stercorarius</i> spp.
Horsetail used for treating diarrhea	<i>Equisetum hyemale</i>	Japanese yew	<i>Taxus cuspidata</i>
Horsetail used as diuretic	<i>Equisetum arvense</i> , <i>E. debile</i> , and others	Jicama	<i>Pachyrhizus erosus</i>
Horsetail used for treating dysentery	<i>Equisetum hyemale</i>	Jimson weed	<i>Datura stramonium</i>
Horsetail, field	<i>Equisetum arvense</i>	Jojoba	<i>Simmondsia californica</i> , <i>S. chinensis</i>
Horsetail, fossil	<i>Equisetites</i> spp., <i>Hyenia</i> spp., <i>Sphenophyllum</i> spp., and others	Joshua tree	<i>Yucca brevifolia</i>
Horsetail, giant	<i>Equisetum telmateia</i>	Jumping mouse	<i>Zapus hudsonius</i> , <i>Napaeozapus insignis</i>
Horsetail, Hopi Indian flour source	<i>Equisetum laevigatum</i>	Junco	<i>Junco</i> spp.
Horsetail, treelike fossil	<i>Calamites</i> spp.	Junco, slate-colored	<i>Junco hyemalis</i>
Horsetail used as hair wash	<i>Equisetum hyemale</i>	Juneberry	<i>Amelanchier</i> spp.
Horsetail used as water source	<i>Equisetum telmateia</i>	Juniper	<i>Juniperus</i> spp.
Hot springs, blue-green bacteria (cyanobacteria) of "Human hair" slime mold	<i>Bacillusiphon induratus</i> , <i>Synechococcus</i> spp., and others	Juniper, dwarf	<i>Juniperus communis</i> and others
Hummingbird	<i>Stemonitis</i> spp.	Jute	<i>Corchorus capsularis</i> and others
Hummingbird, Oasis	<i>Archilocus</i> spp. and others	Kauri pine/resin	<i>Agathis australis</i> , <i>A. robusta</i>
Hummingbirds, ferns used by (for nest material)	<i>Rhodopis vesper</i>	Kelp	<i>Alaria</i> spp., <i>Dictyoneurum</i> spp., <i>Ectocarpus</i> spp., <i>Egregia</i> spp., <i>Laminaria</i> spp., <i>Lessoniopsis</i> spp., <i>Nereocystis</i> spp., and others
Hummingbirds, tropical	<i>Cyathea arborea</i> , <i>Lophosoria quadripinnata</i> , <i>Nephelea mexicana</i>	Kelp, giant	<i>Macrocystis pyrifera</i>
Hyacinth	<i>Chlorostilbon maugaeus</i> and others	Knotweed	<i>Polygonum aviculare</i> , <i>P. arenastrum</i>
Hyacinth, bean	<i>Hyacinthus orientalis</i> and other	Kohlrabi	<i>Brassica oleracea</i> var. <i>caulorapa</i> (= <i>B. oleracea</i> var. <i>gongyloides</i> )
Hyacinth, grape	<i>Hyacinthus</i> spp.	Koonwarra angiosperm	(extinct angiosperm whose fossil was discovered in Australia) (appears to be similar to members of the pepper family—Piperaceae)
Hyacinth, water	<i>Lablab purpureus</i>	Kudzu	<i>Pueraria thunbergiana</i> (= <i>P. lobata</i> )
Hyssop	<i>Muscari</i> spp.	Kumquat	<i>Fortunella japonica</i>
Ice plant	<i>Eichhornia crassipes</i>	Lamb's ears	<i>Stachys byzantina</i>
India, toxic blue-green bacteria (cyanobacteria) of	<i>Hyssopus officinalis</i>	Lantana	<i>Lantana camara</i> and others
Indian paintbrush	<i>Carpobrotus</i> spp. (esp. <i>C. edulis</i> ), <i>Mesembryanthemum crystallinum</i> , and others	Larch, eastern	<i>Larix laricina</i>
Indian pipe	<i>Hyacinthus</i> spp.	Larch, European	<i>Larix decidua</i>
Indian warrior	<i>Lyngbya majuscula</i>	Larch, western	<i>Larix occidentalis</i>
Indigo	<i>Castilleja indivisa</i>	Larkspur, blue	<i>Delphinium</i> spp.
Insects—see individual entries	<i>Monotropa uniflora</i>	Larkspur, red	<i>Delphinium nudicaule</i>
Insects, fern used for treating stings and bites of	<i>Pedicularis densiflora</i>	Late blight of potato	<i>Phytophthora infestans</i>
Ipecac, source of	<i>Indigofera tinctoria</i>	Laurel	<i>Laurus nobilis</i>
Iris	<i>Adiantum capillus-veneris</i>	Laurel Family	Lauraceae
Iris, butterfly	<i>Cephaelis ipecacuanha</i>	Lavender	<i>Lavandula officinalis</i> , <i>L. angustifolia</i>
Iris Family	<i>Iris</i> spp.	Leaf hopper	member of Order Homoptera, Phylum Arthropoda, Kingdom Animalia
Ironwood, South American	<i>Moraea</i> spp.	Leaf miner	<i>Agromyza</i> spp. and others
Isopyrum	<i>Iridaceae</i>	Leaf roller	<i>Archips argyrospila</i> and others
Ivy, Boston	<i>Krugiodendron ferreum</i>	Leafy liverwort—see Liverwort, leafy	
Ivy, English	<i>Isopyrum occidentale</i>	Legume Family	<i>Fabaceae</i> (formerly Leguminosae)
Ivy, poison	<i>Parthenocissus tricuspidata</i>	Lemming	<i>Lemmus</i> spp., <i>Dicrostonyx groenlandicus</i>
	<i>Hedera helix</i>	Lemon	<i>Citrus limon</i>
	<i>Toxicodendron radicans</i> (formerly <i>Rhus toxicodendron</i> )	Lemongrass oil, source of Lentil	<i>Cymbopogon citratus</i> , <i>C. flexuosus</i>
		Lettuce	<i>Lens esculenta</i> (= <i>Lens culinaris</i> )
		Lichen (symbiotic association of an alga and a fungus)	<i>Lactuca sativa</i>
			member of Phylum Ascomycota, Kingdom Fungi <sup>13</sup>

<sup>13</sup>The lichens are arbitrarily treated under Phylum Ascomycota within Kingdom Fungi because (1) the vast majority of fungal components of each species are ascomycetes, and (2) the fungal component of each species of lichen is unique to the species, while the algal component is often common to more than one species of lichen.

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Lichen, British Soldier	<i>Cladonia cristatella</i>	Logwood	<i>Haematoxylon campechianum</i>
Lichen, crustose		Loon	<i>Gavia</i> spp.
black	<i>Rinodina</i> sp.	Lotus, Oriental sacred	<i>Nelumbo nucifera</i>
chartreuse	<i>Acarospora citrina</i>	Louse	Orders Mallophaga and Anoplura, Class Insecta, Phylum Arthropoda, Kingdom Animalia
gray	<i>Psora</i> sp.		
orange-red	<i>Caloplaca elegans</i>	Love-lies-bleeding	<i>Amaranthus caudatus</i>
yellow	<i>Candelariella vitellina</i>	Lucerne—see Alfalfa	
Lichen, foliose	<i>Physcia</i> sp., <i>Parmelia</i> sp.	Luffa	<i>Luffa cylindrica</i> , <i>L. acutangula</i>
Lichen, fruticose	<i>Usnea</i> sp.	Lupine	<i>Lupinus</i> spp.
Lichen, grazed by North African sheep	<i>Lecanora</i> spp.	Lupine, tree with seed valves	<i>Lupinus arboreus</i>
Lichen, litmus	<i>Roccella</i> spp.	Madder Family	<i>Rubiaceae</i>
Lichen used as miniature trees and shrubs	<i>Cladonia</i> spp. and others	Magnolia	<i>Magnolia</i> spp.
Lichen, natural dye	<i>Parmelia</i> spp., <i>Usnea</i> spp., and others	Magnolia Family	<i>Magnoliaceae</i>
Lichen, perfume stabilizer	<i>Evernia</i> spp.	Mallow	<i>Malva</i> spp.
Lichen, reindeer (reindeer moss)	<i>Cladonia</i> spp., <i>Cetraria islandica</i>	Mallow Family	<i>Malvaceae</i>
Licorice, source of Lignum vitae	<i>Glycyrrhiza glabra</i>	Mango	<i>Mangifera indica</i>
Lilac, common	<i>Guaiacum officinale</i>	Mangrove	<i>Rhizophora mangle</i> , <i>R. candelaria</i> , and others
Lily	<i>Syringa vulgaris</i>	Mangrove, black	<i>Avicennia germinans</i> , <i>A. nitida</i>
Lily, giant water	<i>Lilium regale</i> , <i>L. auratum</i> , <i>L. martagon</i> ,	Manila hemp	<i>Musa textilis</i>
Lily, kaffir	<i>Lilium</i> spp., and others	Manioc—see Cassava	
Lily, tiger	<i>Victoria amazonica</i>	Manroot	<i>Marah</i> spp.
Lily, wood	<i>Clivia</i> sp.	Maple	<i>Acer</i> spp.
Lily Family	<i>Lilium pardalinum</i>	Maple, big leaf	<i>Acer macrophyllum</i>
Lime	<i>Lilium superbum</i>	Maple, hard	<i>Acer saccharum</i>
Litchi	<i>Liliaceae</i>	Maple, red	<i>Acer rubrum</i>
Litmus indicator dye, source of	<i>Citrus aurantifolia</i>	Maple, silver	<i>Acer saccharinum</i>
Live oak	<i>Litchi sinensis</i>	Maple, sugar	<i>Acer saccharum</i>
Liverwort	<i>Roccella</i> spp.	Marigold	<i>Tagetes erecta</i> and other <i>Tagetes</i> spp.
Liverwort, leafy	<i>Quercus chrysolepis</i> , <i>Q. virginiana</i> , <i>Q. wislizenii</i> , and others	Marijuana	<i>Cannabis sativa</i>
Liverwort, thalloid	member of Phylum Hepaticophyta, Kingdom Plantae	Marjoram	<i>Majorana hortensis</i> (= <i>Origanum majorana</i> ), pot marjoram = <i>Origanum onites</i>
Lizard	<i>Calopogea</i> sp., <i>Bazzania trilobata</i> , <i>Frullania</i> spp., <i>Jungemannia</i> spp., <i>Porella</i> spp., and others <sup>14</sup>	Maté	<i>Ilex paraguariensis</i>
Lobeline sulfate, source of (used in formulas to assist in stopping smoking)	<i>Conocephalum</i> spp., <i>Lunularia</i> spp., <i>Marchantia</i> spp., and others	Meadow foam	<i>Limnanthes</i> spp.
Locoweed	<i>Sceloporus</i> spp. and others	Mealy bugs	<i>Pseudococcus</i> spp.
Locust, black	<i>Lobelia inflata</i>	Melon	<i>Cucumis melo</i>
Loganberry	<i>Astragalus mollissimus</i> and other <i>Astragalus</i> spp.	Melon, honeydew	<i>Cucumis melo</i> (variety)
	<i>Robinia pseudo-acacia</i>	Melonette	<i>Melothria pendula</i>
	<i>Rubus</i> hybrids, with <i>R. ursinus</i> as one parent; <i>Rubus vitifolius</i>	Mermaid's wineglass	<i>Acetabularia</i> spp.
		Mescal bean	<i>Sophora secundiflora</i>
		Mesquite	<i>Prosopis glandulosa</i>
		Milkweed	<i>Asclepias syriaca</i> and other <i>Asclepias</i> spp.
		Milkweed, swamp	<i>Asclepias incarnata</i>
		Millet <sup>15</sup>	
		Millipede	member of Class Diplopoda, Phylum Arthropoda, Kingdom Animalia

<sup>14</sup>There are thousands of species of leafy liverworts assigned to about 200 genera.<sup>15</sup>Several species of grain are called millet, but the most extensively cultivated taxa are *Pennisetum glaucum* (pearl millet) and *Eleusine coracana* (finger millet). Other millets, some of which are used as pasture, include *Panicum milliaceum* (broomcorn millet); *P. maximum*; *P. obtusum*; *P. purpurascens*; *P. ramosum*; *P. texanum*; *P. virgatum*; *Echinochloa colona*; *E. crus-galli*; *Paspalum* sp.; *Eragrostis* sp.; *Setaria italica*; and others.

Common Name	Scientific Name	Common Name	Scientific Name
Mint—see Peppermint, Spearmint, etc.		Moss, pygmy—see Moss, annual	
Mint Family	Lamiaceae (formerly Labiateae)	Moss, rock	<i>Andreaea</i> spp., <i>Grimmia</i> spp., and others
Mistletoe	<i>Phoradendron</i> spp.	Moss, saline (salty) soil indicator	
Mistletoe, dwarf	<i>Arceuthobium</i> spp.	Moss, seasonal running-water indicator	<i>Fontinalis</i> spp.
Mite	member of Order Acarina, Phylum Arthropoda, Kingdom Animalia	Moss, sphagnum	<i>Sphagnum</i> spp.
Mock orange	<i>Philadelphus x virginalis</i> and other <i>Philadelphus</i> spp. and hybrids	Moss rose	<i>Portulaca grandiflora</i>
Mollusc	member of Phylum Mollusca, Kingdom Animalia	Moth	member of Order Lepidoptera, Class Insecta, Phylum Arthropoda, Kingdom Animalia
Monkey	<i>Ateles duriensis</i> and many others	Moth, Argentine, used to control cactus in Australia	<i>Cactoblastus cactorum</i>
Monkey flower	<i>Mimulus</i> spp.	Moth, codling	<i>Carpocapsa pomonella</i>
Monkey plant	<i>Lunaria annua</i>	Moth, gypsy	<i>Porthetria dispar</i>
Monkshood	<i>Aconitum columbianum</i>	Moth, Mexican jumping bean	
Monocot	member of Class Liliopsida, Phylum Magnoliophyta, Kingdom Plantae	Moth, Yucca	<i>Carpocapsa asalitans</i>
Moose	<i>Alces americana</i> , <i>A. alces</i>	Moth mullein	<i>Pronuba</i> spp., <i>Tegeticula</i> spp.
Morel	<i>Morchella esculenta</i> and other <i>Morchella</i> spp.	Mountain beaver	<i>Verbasum blattaria</i>
Morel, false	<i>Gyromitra</i> sp.	Mouse	<i>Aplodontia rufa</i>
Morning glory	<i>Ipomoea violacea</i> and others	Mouse, jumping	<i>Mus musculus</i> , <i>Peromyscus</i> spp., and others
Mosquito	<i>Anopheles</i> spp., <i>Culex</i> spp., and others	Mulberry	<i>Zapus hudsonius</i> , <i>Napaeozapus insignis</i>
Moss	member of Phylum Bryophyta, Kingdom Plantae	Mulberry, red	<i>Morus</i> spp.
Moss, annual (bare soil)	<i>Acaulon</i> spp., <i>Ephemeral</i> spp., and others	Mulberry, white	<i>Morus rubra</i>
Moss, antler and bone	<i>Tetrapodon</i> spp.	Mule ears	<i>Morus alba</i>
Moss, used as burn treatment by Native Americans	<i>Bryum</i> spp., <i>Minium</i> spp.	Mullein	<i>Wyethia</i> spp.
Moss, copper-rich substrate-inhabiting	<i>Mielichhoferia</i> spp., <i>Scopelophila</i> spp.	Mullein, moth	<i>Verbascum thapsus</i>
Moss, carnivore dung-inhabiting	<i>Tayloria</i> sp.	Mushroom <sup>16</sup>	<i>Verbascum blattaria</i>
Moss, calcium absence indicator	<i>Andreaea</i> spp., <i>Rhacomitrium lanuginosum</i>	Mushroom, common	<i>Agaricus</i> spp. and others
Moss, calcium presence indicator	<i>Didymodon</i> spp., <i>Desmatotodon</i> spp., and others	cultivated edible	<i>Agaricus bisporus</i>
Moss, exceptionally desiccation-resistant	<i>Tortula ruralis</i>	Mushroom, common red	<i>Russula</i>
Moss, European roof-waterproofing	<i>Dicranoweisia</i> sp.	Mushroom, fairy ring	<i>Marasmius oreades</i>
Moss, extinguisher	<i>Encalypta</i> spp.	Mushroom, fly agaric	<i>Amanita muscaria</i>
Moss, hair(y) cap	<i>Polytrichum</i> spp.	Mushroom, inky cap	<i>Coprinus</i> spp.
Moss, herbivore dung-inhabiting	<i>Splachnum</i> spp.	Mushroom, oyster	<i>Pleurotus ostreatus</i>
Moss, luminous	<i>Schistostega pennata</i> , <i>Mittenia</i> sp.	Mushroom, pore	<i>Serillus pungens</i>
Moss, mammal dung-inhabiting	<i>Splachnum luteum</i>	Mushroom, portabella	<i>Agaricus bisporus</i> (variety)
Moss, peat	<i>Sphagnum</i> spp.	Mushroom, shaggy mane	<i>Coprinus comatus</i>
Moss, pollution-sensitive	<i>Hypnum</i> spp. and others	Mushroom, shiitake	<i>Lentinus edodes</i>
		Muskrat	<i>Ondatra zibethicus</i>
		Mustard	<i>Brassica campestris</i> , <i>B. nigra</i> , and others
		Mustard, cultivated	<i>Brassica alba</i> , <i>B. juncea</i> , and others
		Mustard Family	Brassicaceae (formerly Cruciferae)
		Myrrh, source of	<i>Commiphora abyssinica</i>
		Myrtle <sup>17</sup>	<i>Umbellularia californica</i> <sup>17</sup>

<sup>16</sup>Mushroom is a term generally applied to the fruiting bodies with stalked, caplike structures produced by members of Phylum Basidiomycota, Kingdom Fungi. The term is also loosely applied to some of the fruiting bodies of members of other classes of true fungi. There are thousands of known species.

<sup>17</sup>This plant, also known as the California bay, is in the Laurel Family (Lauraceae). True myrtles are in the Myrtle Family (Myrtaceae).

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Narcissus	<i>Narcissus</i> spp. and hybrids <sup>18</sup>	Orchid, vanilla	<i>Vanilla planifolia</i> and others

Orchid “bark,” fern sources of	<i>Cibotium</i> spp., <i>Osmunda</i> spp.	Pear	<i>Pyrus communis</i>
Orchid, Bletilla	<i>Bletilla</i> sp.	Peat moss	<i>Sphagnum</i> spp.
Orchid, bucket	<i>Coryanthes</i> spp.	Pecan	<i>Carya illinoensis</i>
Orchid, showy	<i>Orchis</i> spp.	Peccary	<i>Pecari angulatus</i> , <i>Tayassus pecari</i>
Orchid, underground-flowering	<i>Rhizanthella gardneri</i>	Penicillin mold <sup>20</sup>	<i>Penicillium</i> spp. <sup>20</sup>
		Pennyroyal	<i>Hedeoma pulegioides</i>
		Peony	<i>Paeonia</i> spp.
		Peperomia	<i>Peperomia</i> spp.
		Pepper	<i>Capsicum annuum</i> , <i>C. frutescens</i> <sup>21</sup>

<sup>18</sup>The 27 known species of *Narcissus* (native to Europe and the Mediterranean regions) have been extensively cultivated and hybridized. There is a botanical classification for wild forms and a horticultural classification based primarily on the extent of the corona, flower color, and fragrance. The horticultural forms are known by common names such as narcissi, daffodils, jonquils, pheasant's eye, angel's tears, etc.

<sup>19</sup>Depending on which authorities are followed, the number of known orchid species (all in the family Orchidaceae) may exceed 30,000. Popularly cultivated orchids include species of *Cattleya*, *Cymbidium*, *Dendrobium*, *Odontoglossum*, *Oncidium*, *Paphiopedilum*, *Phalaenopsis*, *Vanda*, and both interspecific and intergeneric hybrids.

<sup>20</sup>The original producer of penicillin discovered by Sir Alexander Fleming was *Penicillium notatum*; current commercially used producers of penicillin are strains of *Penicillium chrysogenum*. Other commercially cultivated *Penicillium* species include *P. roquefortii* (used to make roquefort cheese), *P. camembertii* (used to make blue cheese), and *P. griseofulvum* (used for the production of a ringworm and athlete's foot antibiotic known as *griseofulvin*).

<sup>21</sup>The drug *capsicum*, whose active ingredient is the oleoresin *capsaicin*, is derived from these species, and garden peppers include these and other species of *Capsicum*.

Common Names and Scientific Names of Organisms

Pine, ponderosa	<i>Pinus ponderosa</i>	Portulaca Family	<i>Portulacaceae</i>
Pine, red	<i>Pinus resinosa</i>	Potato, Irish	<i>Solanum tuberosum</i>
Pine, Scotch	<i>Pinus sylvestris</i>	Potato, sweet	<i>Ipomea batatas</i>
Pine, shortleaf	<i>Pinus echinata</i>	Potato vine	<i>Solanum jasminoides</i>
Pine, Siberian white	<i>Pinus sibirica</i>	Powder-puff flower	<i>Calliandra inaequilatera</i>
Pine, slash	<i>Pinus caribaea</i> , <i>P. elliottii</i>		
Pine, southern yellow—see Pine, loblolly; Pine, longleaf; Pine, shortleaf; and Pine, slash			

<sup>22</sup>Species of *Amaranthus* in the Amaranth family (Amaranthaceae) and *Chenopodium* in the Goosefoot family (Chenopodiaceae) have been called pigweeds, and both families have also been referred to as the Pigweed family. Because of this, many botanists prefer to refer to the Amaranthaceae as the Amaranth family and the Chenopodiaceae as the Goosefoot family. Most *Amaranthus* spp. are called amaranths and most *Chenopodium* spp. are called goosefoot, although the widespread weed *Chenopodium album* is popularly called lamb's quarters. Pig's weed (*Oryza* sp.) is completely unrelated to either of the two families just mentioned; it is a grass related to rice.

<sup>23</sup>Although the European plum was involved in the development of the majority of older plum varieties, more than 600 varieties of plum have been developed from American plums such as *Prunus subcordata* and *P. americana*, along with various hybrids involving at least one American parent.

<sup>24</sup>*Hystrix* is also a name for a genus of grasses.

Common Names and Scientific Names of Organisms

Rafflesia	<i>Rafflesia micropylora</i>	Ruellia	<i>Ruellia portellae</i> and others
Ragweed	<i>Ambrosia</i> spp.	Rust, black stem of wheat	<i>Puccinia graminis</i>
Rape/rapeseed	<i>Brassica napus</i>	Rust, cedar-apple	<i>Gymnosporangium juniperi-virginianum</i>
Raspberry, red	<i>Rubus idaeus</i> , <i>R. strigosus</i> , and their hybrids	Rust, corn	<i>Puccinia sorghi</i>
Rat	<i>Rattus norvegicus</i> , <i>R. rattus</i> , and others	Rust, poplar leaf spot	<i>Melampsora medusae</i>
Rat, kangaroo	<i>Dipodomys</i> spp.	Rust, rock cress	<i>Puccinia monoica</i>
Rat snake, black	<i>Elaphe obsoleta</i>	Rust, white pine blister	<i>Cronartium ribicola</i>
Rattlesnake	<i>Crotalus</i> spp.	Rutabaga	<i>Brassica campestris</i> var. <i>napobrassica</i> (= <i>Brassica napus</i> )
Red algae	Member of Phylum Rhodophyta, Kingdom Protista; representative genera include <i>Chondrus</i> , <i>Eucheuma</i> , <i>Gelidium</i> , <i>Gigartina</i> , <i>Gracilaria</i> , <i>Polysiphonia</i> , <i>Porphyra</i> , and <i>Pterocladi</i> ; there are about 3,900 spp. of red algae	Rye	<i>Secale cereale</i>
		Ryegrass	<i>Lolium</i> spp.
		Safflower	<i>Carthamus tinctorius</i>
		Saffron (true)	<i>Crocus sativus</i>
		Saffron, meadow	<i>Colchicum autumnale</i>
		Sage <sup>26</sup>	<i>Salvia officinalis</i> <sup>26</sup>
		Sagebrush	<i>Artemisia tridentata</i>
		Sage, Jerusalem	<i>Phlomis fruticosa</i>

<sup>25</sup>At the beginning of the year 2000, the International Rice Research Institute in the Philippines had in storage the seeds of 20 species and more than 81,000 different varieties of rice. The staple food of nearly 2 billion people, rice cultivation presently occupies 11% of agricultural land. Rice has been cultivated in Asian countries for more than 7,000 years. Although the great majority of rice cultivated is *Oryza sativa*, some forms of *Oryza glaberrima* are also cultivated.

<sup>26</sup>This sage, which is in the Mint Family (Lamiaceae), should not be confused with sagebrush, which is in the Sunflower Family (Asteraceae).

Snowy owl	<i>Nyctea scandiaca</i>		<i>Strychnos nux vomica</i> and other <i>Strychnos</i> spp.

<sup>27</sup>Linnaeus applied the name *Allium ascalonicum* to what was probably an *Allium* cultigen believed to have originated in Asia Minor, and the name *Allium ascalonium* since has generally been applied to shallots. Shallots seldom set seed, however, and seeds sold under the name *Allium ascalonicum* have sometimes proved to be those of other *Allium* spp. The current practice of considering shallots to be a form of *Allium cepa* should lessen the confusion.

Sycamore	<i>Platanus occidentalis</i> and others	Turtle	<i>Brassica rapa</i>
Tamarack	<i>Larix</i> spp.	Twinflower	<i>Chelydra</i> spp., <i>Chrysemys</i> spp., and others
Tamarisk	<i>Tamarix</i> spp.	Ulothrix	<i>Linnaea borealis</i>
Tangerine	<i>Citrus reticulata</i>	Ultraviolet light, flowers seen in	<i>Ulothrix</i> spp.
Tapir	<i>Tapirus</i> spp.	Unicorn plant	<i>Rudbeckia</i> sp.
Taro	<i>Colocasia esculenta</i>	Venus's flytrap	<i>Proboscidea</i> spp.
Tarragon	<i>Artemisia dracunculus</i>	Vetch	<i>Dionaea muscipula</i>
Tarweed	<i>Grindelia</i> spp.	Vetchling, yellow	<i>Vicia</i> spp.
Tarweed, western	<i>Calycadenia</i> sp.	Vinegar weed	<i>Lathyrus aphaca</i>
Tea	<i>Camellia sinensis</i>	Violet	<i>Trichostema</i> spp.
Tent caterpillar	<i>Malacosoma americanum</i> and others	Violet, African	<i>Viola odorata</i> and other <i>Viola</i> spp.
Teosinte (annual)	<i>Zea mexicana</i>	Violet, gold	<i>Saintpaulia ionantha</i> and other <i>Saintpaulia</i> spp.
Teosinte (perennial)	<i>Zea diploperennis</i>	Virginia creeper	<i>Viola douglasii</i>
Tequila, source of	<i>Agave</i> spp.	Virus <sup>29</sup>	<i>Parthenocissus quinquefolia</i>
Termite	<i>Odontotermes</i> spp., <i>Reticulitermes</i> spp., and others	Vole	<i>Microtus</i> spp. and others
Texas paintbrush	<i>Castilleja indivisa</i>	Wahoo	<i>Euonymus alata</i> and others
Thalloid liverworts	<i>Marchantia</i> spp., <i>Conocephalum</i> spp., and others	Wake-robin	<i>Trillium</i> spp.
Thimbleberry	<i>Rubus parviflorus</i>	Wallflower, western	<i>Erysimum capitatum</i>
Thistle	<i>Cirsium</i> spp. and others	Walnut	<i>Juglans</i> spp.
Thistle, Canada	<i>Cirsium arvense</i>	Walnut, black	<i>Juglans nigra</i>
Thrasher	<i>Toxostoma</i> spp.	Warbler	<i>Dendroica</i> spp. and others
Thyme	<i>Thymus vulgaris</i> and others	Watercress	<i>Nasturtium officinale</i>
Ti (Ki) plant	<i>Cordyline fruticosa</i>	Water fern, oriental	<i>Ceratopteris thalictroides</i>
Tiger	<i>Panthera tigris</i>	Watermelon	<i>Citrullus lanatus</i>
Toad	<i>Bufo americanus</i>	Water mold	member of Phylum Oomycota, Subkingdom Mastigobionta, Kingdom Protista
Tobacco	<i>Nicotiana tabacum</i> , <i>N. rustica</i>	Water net	<i>Hydrodictyon</i> spp.
Tomato <sup>28</sup>	<i>Solanum esculentum</i>	Watersilk	<i>Spirogyra</i> spp.
Tomato, Galápagos	<i>Solanum esculentum</i> var. <i>minor</i> , <i>S. pimpinellifolium</i> , <i>S. cheesmanii</i> (salt tolerant sp.)	Water weed	<i>Elodea</i> spp.
Tomato fruitworm	<i>Heliothis armigera</i>	Water weed, yellow	<i>Ludwigia repens</i>
	<i>Heliothis armigera</i>	Wattle	<i>Acacia decurrens</i> , <i>A. mearnsii</i> , and others
Tomato hornworm	<i>Protoparce quinquemaculata</i>	Weaver birds	<i>Anaplectes</i> spp., <i>Hyphantoris</i> spp., and others
Toothwort	<i>Dentaria</i> spp.		
Tortoise, giant Galápagos	<i>Testudo elephantopus porteri</i>		
Touch-me-not	<i>Impatiens glandulifera</i> and others		
Tree fern	<i>Cibotium glaucum</i>		

<sup>28</sup>DNA evidence indicates the tomato, long known as *Lycopersicum esculentum*, belongs in the genus *Solanum* and should be transferred to that genus, making the correct name *Solanum esculentum*.

<sup>29</sup>Depending on the classification used, viruses may not have a scientific name. Many are named after the disease they cause; e.g., tobacco mosaic virus causes tobacco mosaic disease. One classification attempts to give them at least a Latin prefix, so that the virus for warts is *Papavovirus*; for smallpox, *Poxvirus*; for polio, *Picornavirus*; for measles and mumps, *Paramyxovirus*.

Common Names and Scientific Names of Organisms			
Common Name	Scientific Name	Common Name	Scientific Name
Webworm, fall	<i>Hyphantria cunea</i>	Witch hazel	<i>Hamamelis virginiana</i>
Welwitschia	<i>Welwitschia mirabilis</i>	Woad, dyer's	<i>Isatis tinctoria</i>
Whale, sperm	<i>Physeter catodon</i>	Woadwaxen	<i>Genista tinctoria</i>
Wheat <sup>30</sup>		Wolfsbane	<i>Aconitum vulparia</i>
Wheel tree	<i>Trochodendron aralioides</i>	Wolverine	<i>Gulo luscus, G. gulo</i>
Whisk fern	<i>Psilotum spp.</i>	Woodpecker	<i>Dendrocopos spp. and others</i>
Whisk fern, fossil relatives of	<i>Asteroxylon spp., Psilophyton spp., Rhynia spp., and others</i>	Wormwood	<i>Artemisia annua, A. absinthium</i>
Whisk fern, living relatives of	<i>Timesipteris spp.</i>	Yam	<i>Dioscorea alata, D. cayensis, D. composita, D. esculenta, D. floribunda, D. rotundata, D. trifida</i>
White pine blister rust	<i>Cronartium ribicola</i>	Yareta	<i>Azorella yareta</i>
Willow	<i>Salix spp.</i>	Yarrow, American	<i>Achillea lanulosum</i>
Willow Family	<i>Salicaceae</i>	Yarrow, European	<i>Achillea millefolium</i>
Window leaves, plants with	<i>Fenestraria spp. and others</i>	Yeast, baking/brewing	<i>Saccharomyces cerevisiae</i>
Wintergreen oil, sources of	<i>Gaultheria procumbens</i> and others	Yellow-green algae	member of Phylum Chromophyta, Kingdom Protista
Wisteria	<i>Wisteria sinensis</i> and other <i>Wisteria spp.</i>	Yew	<i>Taxus spp.</i>
		Yew, Japanese	<i>Taxus cuspidata</i>
		Zebra	<i>Equus zebra</i> and others
		Zinnia	<i>Zinnia elegans</i> and others

<sup>30</sup>More than 20,000 varieties of cultivated bread wheat, which has a history dating back thousands of years, are presently recognized. The ancestry and cytology are complex and still not fully understood. The principal ancestors appear to have been *Triticum monococcum* (which, after mutant forms were incorporated, became known as einkorn wheat) and species of *Aegilops*, especially *A. speltoides*, with several other mutations and natural hybridizations having occurred throughout the past several thousand years. Emmer wheat has been recognized as *Triticum dicoccum* or *T. turgidum* var. *dicoccum*; durum wheat as *T. durum* or *T. turgidum* var. *durum*; Polish wheat (also known as Jerusalem rye) as *T. polonicum*; and common bread wheat as *T. aestivum* (which is believed to be have been derived from *T. turgidum* and a genome from *Aegilops tauschii*). Other taxa believed to have played a role in the development of cultivated wheat include *T. longissima* and *T. searsii*. Uncertainty as to the precise evolutionary history of wheat persists, however, and awaits further investigation.
