Preface

xvii

1. Groundwater: Introduction, Occurrence, and Assessment	1
1.1 General	1
1.2 Groundwater Vis-À-Vis Surface Water	3
1.3 Groundwater: A Component of Hydrologic Cycle	4
1.4 Origin and Age of Groundwater	5
1.5 Definition of Groundwater	6
1.6 Porous Media Properties	7
1.7 Vertical Distribution of Subsurface Water	11
1.8 Surface Water and Groundwater Interaction	14
1.9 Groundwater Assessment	15
1.10 Climate Change and Groundwater	17
<i>Problems</i>	18
2. Groundwater: Aquifers and Indian Scenario	19
2.1 General	19
2.2 Types of Aquifers	20
2.3 Geologic Formations as Aquifers	22
2.4 Fence Diagrams	23
2.5 Aquifer Mapping	24
2.6 Indian Aquifers	26
2.7 Groundwater Resources Status of India	29
2.8 Groundwater Level	32
2.9 Trans-Boundary Aquifer Systems	32
<i>Problems</i>	35
3. Groundwater Prospecting	36
3.1 General	36
3.2 Geologic Method	37
3.3 Remote Sensing	37
3.4 Geophysical Exploration	38
3.5 Electric Resistivity Method	39
3.6 Seismic Method	48
3.7 Ground Penetrating Radar and Other Methods	53
3.8 Subsurface Investigation	54
<i>Solved Examples</i>	55
<i>Problems</i>	61

4. Well Logging and Construction	62
4.1 General	62
4.2 Type of Wells	63
4.3 Selection of Well Site	67
4.4 Well Logging	72
4.5 Well Construction Techniques	87
4.6 Well Completion	103
4.7 Piezometers and Water Table Observation Wells	110
<i>Problems</i>	111
5. Principles of Groundwater Movement in Porous Media	113
5.1 Darcy's Experimental Law	113
5.2 Hydraulic Head	114
5.3 Velocity Potential	114
5.4 Direction of Groundwater Flow	115
5.5 Hydraulic Conductivity and Intrinsic Permeability	116
5.6 Relation Between Darcy Velocity and Interstitial Velocity	118
5.7 Validity of Darcy's Law	118
5.8 Derivation of Darcy's Law from N – S Equations	119
5.9 Homogeneity and Isotropy	121
5.10 Generalized Darcy's Equations	121
5.11 Laplace Equation	123
5.12 Stream Function	123
5.13 Flownet	125
5.14 Different Boundaries in a Porous Medium	128
5.15 Transformation of Inhomogeneous into Homogeneous Medium	130
5.16 Transformation of Anisotropic into Isotropic Medium	133
5.17 Flow Through Two Media (Flow Crossing Anisotropy)	138
<i>Solved Examples</i>	140
<i>Problems</i>	142
6. Theory of Groundwater Flow	146
6.1 Governing Equations in Cartesian Coordinates	146
6.2 Compressibility of Aquifers	149
6.3 Governing Equation Considering Compressibility	153
6.4 Dupuit—Forchheimer Assumptions and 2-D Equations for Unconfined Flow	153
6.5 Solution and Boundary Conditions	155
6.6 Analytical Solutions for Simple Groundwater Flow Problems	157
<i>Solved Examples</i>	162
<i>Problems</i>	174

7. Contaminant Transport in Groundwater	179
7.1 Origins of Groundwater Contamination	179
7.2 Classification of Groundwater Contamination	182
7.3 Transport Mechanism	184
7.4 GE for Contaminant Transport in Saturated Porous Media	190
7.5 Transport of Reactive Pollutants	195
<i>Solved Examples</i>	197
<i>Problems</i>	199
8. Groundwater Flow Solutions by Complex Analysis	201
8.1 General	201
8.2 Complex Numbers	201
8.3 Complex Function	202
8.4 Mapping	203
8.5 Conformal Mapping	204
8.6 Linear and Inverse Mapping Functions	205
8.7 Velocity Hodograph	206
8.8 Zhukovsky Functions	208
8.9 Schwarz–Christoffel Transformation	209
8.10 Mapping Examples	210
<i>Solved Examples</i>	217
<i>Problems</i>	235
9. Flow through Unsaturated Porous Media	240
9.1 General	240
9.2 Suction Pressure	241
9.3 Water Retention Characteristics	243
9.4 Hydraulic Conductivity Relations	250
9.5 Flow Equation in Unsaturated Porous Medium	253
9.6 Infiltration of Surface Water	256
<i>Solved Examples</i>	260
<i>Problems</i>	262
10. GE in Radial Coordinates and Steady-State Solutions	264
10.1 General	264
10.2 Governing Equations in Radial Coordinates	265
10.3 Steady-Flow Solutions	269
<i>Solved Examples</i>	296
<i>Problems</i>	301
11. Unsteady State Solutions to Confined Aquifer Problems	305
11.1 Single-Well Solution	305
11.2 Computation of Well Function	308

11.3 Multiple Wells (Well Field) in a Confined Aquifer	311
11.4 Residual Drawdown	315
11.5 Wells Near Boundaries (Method of Images)	317
11.6 Stream Depletion	329
11.7 Unsteady Well Flow in Uniform Flow Field	331
<i>Solved Examples</i>	331
<i>Problems</i>	339
12. Unsteady-State Solutions to Special Cases	344
12.1 Single-Well Solution	344
12.2 Unconfined Aquifer	344
12.3 Leaky Aquifer	349
12.4 Partially Penetrating Well	357
12.5 Large Diameter Wells	363
12.6 Flowing Well	365
12.7 Multilayer Aquifer	367
12.8 Well Losses	369
<i>Solved Examples</i>	372
<i>Problems</i>	378
13. Estimation of Aquifer Parameters	382
13.1 General	382
13.2 Pumping Test Techniques	382
13.3 Confined Aquifer Parameters	385
13.4 Unconfined Aquifer Parameters	397
13.5 Leaky Aquifer Parameters	400
13.6 Slug Test Techniques	407
13.7 Other Techniques	419
<i>Solved Examples</i>	421
<i>Problems</i>	430
14. Design, Development, and Maintenance of Water Wells	432
14.1 General	432
14.2 Well Design	433
14.3 Well Development	449
14.4 Well Maintenance and Rehabilitation	458
<i>Solved Examples</i>	467
<i>Problems</i>	467
15. Managed Groundwater Recharge	469
15.1 Introduction	469
15.2 Objective and Purpose of MGR	471
15.3 Methods of MGR	471
15.4 Features of MGR Systems	486
15.5 Artificial Recharge Strategy and Identification of Potential Areas	487
15.6 Source Water Availability and Assessment	488

15.7	Reuse and Recycling Wastewater	493
15.8	Recharge Mounds	496
15.9	Recharge Scheme in Pal–Doli–Jhanwar Area	501
15.10	MAR in NCT of Delhi-Like Metro Cities	503
	<i>Solved Examples</i>	509
	<i>Problems</i>	511
16.	Saline Water Intrusion In Aquifers	513
16.1	General	513
16.2	Occurrence of Saline Water Intrusion	513
16.3	Ghyben–Herzberg Relation Between Fresh and Saline Waters	514
16.4	Shape of the Freshwater–Saltwater Interface	515
16.5	Effect of Wells on Seawater Intrusion	517
16.6	Effect of Tides on Seawater Intrusion	519
16.7	Upconing of Saline Water	521
16.8	Freshwater–Saltwater Relations on Oceanic Islands	524
16.9	Identification of Seawater in Groundwater	525
16.10	Control of Saline Water Intrusion	525
16.11	Management of Coastal Aquifers	527
16.12	Seawater Intrusion in India	530
	<i>Solved Examples</i>	531
	<i>Problems</i>	533
17.	Groundwater-Modeling Techniques	535
17.1	Introduction	535
17.2	Physical Models	537
17.3	Analog Models	538
17.4	Model-based Analytical Formulas Coupled with Experience	545
17.5	Numerical Models	545
17.6	Finite Difference Method	551
17.7	Case Study	562
	<i>Solved Examples</i>	565
	<i>Problems</i>	576
18.	Management of Groundwater Quantity	579
18.1	General	579
18.2	Groundwater Quantity	580
18.3	Conjunctive Use	581
18.4	Water Laws	584
18.5	Groundwater Management Techniques	585
	<i>Problems</i>	590
19.	Management of Groundwater Quality	591
19.1	General	591
19.2	Groundwater Contaminants	594
19.3	Soluble Salts in Groundwater	595

19.4 Sources of Groundwater Contamination 598
 19.5 Groundwater Pollution Control 599
 19.6 Treatment of Contaminated Aquifer 605
 19.7 Restoration of Contaminated Aquifer 610
 19.8 Monitoring of Groundwater Quality 617
 19.9 Groundwater Risk and Disaster Management 620
 Solved Examples 626
 Problems 628

Bibliography **630**

Appendices **631**

A Groundwater Resources Availability, Utilization and Stage of Development in India (CGWB 2011) 632
B Categorization of groundwater assessment units (CGWB 2011) 634
C Error Function, Normal distribution, complete elliptic integral, and modified Bessel's function 636
D Theis well function $W(u)$ 640
E Well function for an unconfined aquifer 641
F Hantush (1956) Well Function $W(u, r/B)$ for a leaky aquifer 647
G Hantush (1956) well function $H(u, \beta)$ for a leaky aquifer 657
H Papadopulos and Cooper (1967) well function $S(u_w, \rho')$ for large diameter wells 659
I Flowing well function 660
J Chow's (1952) Function $F(u)$ 664
K Values for slug test type curves by Papadopulos et al (1973) 665
L Values of Hantush (1963) recharge mound function

$$F(\alpha, \beta) = \int_0^1 \text{erf}(\alpha/\sqrt{\tau}) \cdot \text{erf}(\beta/\sqrt{\tau}) d\tau$$
 666
