

Contents

<i>Preface</i>	<i>v</i>
<i>Acknowledgements</i>	<i>vii</i>
1. Introduction: Cluster to Grid Computing <i>Dharanipragada Janakiram</i>	3
1.1 Cluster Computing Models	3
1.2 Grid Models	5
1.3 Mobile Grid Models	5
1.4 Applications	6
1.5 DOS Grid: Vision of Mobile Grids	7
2. Parset: System-independent Parallel Programming on Distributed Systems <i>Rushikesh K. Joshi, Dharanipragada Janakiram</i>	8
2.1 Motivation and Introduction	8
2.2 Semantics of the Parset Construct	11
2.3 Expressing Parallelism through Parsets	16
2.4 Implementing Parsets on a Loosely Coupled Distributed System	21
2.5 Discussion and Future Work	28
2.6 Conclusions	29
<i>References</i>	<i>29</i>
3. Anonymous Remote Computing Model <i>Rushikesh K. Joshi, Dharanipragada Janakiram</i>	31
3.1 Introduction	31
3.2 Issues in Parallel Computing on Interconnected Workstations	33
3.3 Existing Distributed Programming Approaches	36
3.4 The ARC Model of Computation	39

3.5	The Two-tiered ARC Language Constructs	46
3.6	Implementation	54
3.7	Performance	59
3.8	Conclusions	65
	<i>References</i>	66
4.	Integrating Task Parallelism with Data Parallelism	70
	<i>K. J. Binu, Dharanipragada Janakiram</i>	
4.1	Introduction and Motivation	70
4.2	A Model for Integrating Task Parallelism into Data Parallel Programming Platforms	71
4.3	Integration of the Model into ARC	76
4.4	Design and Implementation	82
4.5	Applications	87
4.6	Performance Analysis	90
4.7	Guidelines for Composing User Programs	94
4.8	Related Work	96
4.9	Future Work	96
4.10	Appendix	98
	<i>References</i>	101
5.	Anonymous Remote Computing and Communication Model	103
	<i>K. J. Binu, R. Karthikeyan, Dharanipragada Janakiram</i>	
5.1	Introduction	103
5.2	Location-independent Inter-task Communication with DP	104
5.3	DP Model of Iterative Grid Computations	105
5.4	Design and Implementation of Distributed Pipes	111
5.5	Case Study	119
5.6	Performance Analysis	124
5.7	Future Works	132
	<i>References</i>	132
6.	Parallel Programming Model on CORBA	134
	<i>Dharanipragada Janakiram, A. Vijay Srinivas, P. Manjula Rani</i>	
6.1	Introduction	134
6.2	Existing Works	135
6.3	Notion of Concurrency	138
6.4	System Support	142
6.5	Implementation	165
6.6	Performance	167
6.7	Suitability of CORBA: An Introspection	174
6.8	Conclusions	174

References 175

End Notes 179

7. Vishwa: A Reconfigurable P2P Middleware for Grid Computations

M. Venkateswara Reddy, A. Vijay Srinivas, Tarun Gopinath, Dharanipragada Janakiram

181

7.1 Introduction 181

7.2 Vishwa: A Two Layered P2P Middleware for Grid Computing 182

7.3 Case Studies 188

7.4 Related Work 194

7.5 Conclusions 196

References 196

End Notes 198

8. Virat: Node-Capability-Aware Replica Management for Peer-to-Peer Grids

A. Vijay Srinivas, Dharanipragada Janakiram

199

8.1 Introduction 199

8.2 Two-Layered Architecture for P2P Grids 202

8.3 Dynamic Replica Management in Virat 204

8.4 Virat: A Two-Layered P2P Architecture-Based Reconfigurable and Scalable Shared Object Space 207

8.5 Implementation of the Two-Layered Architecture 209

8.6 Performance Studies 210

8.7 Related Work 225

8.8 Conclusions 226

References 227

End Notes 231

9. Introducing Mobility into Anonymous Remote Computing and Communication Model

M. A. Maluk Mohamed, A. Vijay Srinivas, Dharanipragada Janakiram

232

9.1 Introduction 232

9.2 Issues in Mobile Clusters and Parallel Computing on Mobile Clusters 234

9.3 Maset Overview 238

9.4 Maset Computation Model 240

9.5 Implementation 242

9.6 Performance 245

9.7 Conclusions and Future Work 250

References 250

10. Distributed Simulated Annealing Algorithms for Job Shop Scheduling	
<i>K. Krishna, K. Ganeshan, Dharanipragada Janakiram</i>	253
10.1 Introduction	253
10.2 Overview	254
10.3 Distributed Algorithms for Job Shop Scheduling	257
10.4 Implementation	263
10.5 Results and Observation	266
10.6 Conclusions	270
<i>References</i>	271
11. Parallel Simulated Annealing Algorithms	
<i>Dharanipragada Janakiram, T.H. Sreenivas, K. Ganapathy Subramaniam</i>	272
11.1 Introduction	272
11.2 Simulated Annealing (SA) Technique	273
11.3 Clustering Algorithm for Simulated Annealing (SA)	274
11.4 Combination of Genetic Algorithm and Simulated Annealing (SA) Algorithm	275
11.5 Implementation of the Algorithms	276
11.6 Case Studies	278
11.7 Conclusions	282
<i>References</i>	282
12. Arogyasree: An Enhanced Grid-Based Approach to Mobile Telemedicine	
<i>Sriram Kailasam, Santosh Kumar, Dharanipragada Janakiram</i>	284
12.1 Introduction	284
12.2 Related Work	287
12.3 System Model	289
12.4 Application Scenario, Implementation, and Limitations	301
12.5 Performance Studies	303
12.6 Conclusions	306
<i>References</i>	306
13. Emerging Trends in Cloud Computing and Big Data	
<i>Dharanipragada Janakiram</i>	313
13.1 Cloud Computing and Big Data	313
13.2 Emerging Trends in Cloud Computing and Big Data	315
13.3 Getting Human into the Loop in End-to-End Service Composition	320
13.4 Conclusions	321
<i>References</i>	321

- 14. Chisel: A Resource Savvy Approach for Handling Skew in MapReduce Applications**
*Prateek Dhawalia, Sriram Kailasam,
Dharanipragada Janakiram* **323**
- 14.1 Introduction 323
 - 14.2 Background 326
 - 14.3 Design Requirements 328
 - 14.4 Chisel 329
 - 14.5 Implementation 335
 - 14.6 Performance Evaluation 336
 - 14.7 Related Work 340
 - 14.8 Conclusion 341
 - References* 342
 - End Notes* 343
- 15. Generate-Map-Reduce: An extension to Map-Reduce to Support Shared Data and Recursive Computations**
Geeta Iyer, Sriram Kailasam **344**
- 15.1 Introduction 344
 - 15.2 Motivation For GMR 346
 - 15.3 Generate-Map-Reduce (GMR) 349
 - 15.4 Runtime 353
 - 15.5 Shared Data Structure 356
 - 15.6 Case Studies 359
 - 15.7 Refinements 364
 - 15.8 Performance Study 367
 - 15.9 Discussion on Shared Data Structure 375
 - 15.10 Related Work 376
 - 15.11 Conclusion and Future Work 379
 - References* 379
 - Endnotes* 384
- 16. KAAS: Kernel As A Service**
*Vineet Rajani, Hemang Mehta, S. J. Balaji,
Dharanipragada Janakiram* **385**
- 16.1 Introduction 385
 - 16.2 Defining Cloud Operating System 386
 - 16.3 Designing SICLOPS 388
 - 16.4 Empirical Study 393
 - 16.5 Related Work 395
 - 16.6 Conclusion 396
 - References* 396
 - Endnotes* 398

17. Dhara: A Service Abstraction-Based OS Kernel Design Model	399
<i>Dharanipragada Janakiram, Hemang Mehta, S. J. Balajiv</i>	
17.1 Introduction	399
17.2 Motivation	401
17.3 Generic Framework of Dhara	402
17.4 Case Study: Linux Kernel	409
17.5 Performance Study	414
17.6 Related Work	418
17.7 Conclusion and Future Work	420
<i>References</i>	420
18. Optimizing Ordered Throughput Using Autonomic Cloud Bursting Schedulers	423
<i>Sriram Kailasam, Nathan Gnanasambandam, Dharanipragada Janakiram, and Naveen Sharma</i>	
18.1 Introduction	423
18.2 Problem Definition	426
18.3 Opportunistic Bursting	429
18.4 Design of Cloud Bursting Scheduler	433
18.5 Performance Evaluation	439
18.6 Related Work	459
18.7 Conclusion	464
<i>References</i>	465
<i>Endnotes</i>	469
19. Stabilizing Peer-to-peer Systems Using Public Cloud: A Case Study of Peer-to-peer Search	470
<i>Dharanipragada Janakiram, Harisankar Haridas</i>	
19.1 Introduction	470
19.2 Background on Peer-To-Peer Search	472
19.3 Effect of Query Spikes in Peer-To-Peer Search	473
19.4 Cloud-Assisted Peer-To-Peer Search (CAPS)	475
19.5 Cloud Payment Model	479
19.6 Addressing Concerns Due to Centralized Cloud	480
19.7 Evaluation	480
19.8 Related Works	486
19.9 Conclusion and Future Work	487
<i>References</i>	487
<i>Endnotes</i>	488
